## Acknowledgement

This report presents statistical data compiled by the Bureau of Dangerous Drugs (B.D.D.). It concerns drug-related criminal offences, licit drug diversion from medical supply channels, patients on the methadone maintenance program, and analysis of seizures of illicit drugs for the calendar year 1988.

The data were extracted from case reports submitted to the Bureau by law enforcement agencies, health professionals, Bureau inspectors and Field Operations Directorate of Health and Welfare Canada.

The Bureau of Dangerous Drugs gratefully acknowledges the co-operation of the above parties, whose contributions made this publication possible.

## Remerciements

Ce rapport présente les données statistiques pour l'année civile 1988 compilées par le Bureau des drogues dangereuses (BDD) concernant les infractions criminelles liées aux drogues, les détournements de drogues licites à partir de sources médicales, les traitements à la méthadone et les analyses des saisies de drogues illicites.

Les données ont été tirées de fiches d'observations soumises au Bureau par les différents services de police, les professionnels de la santé, les inspecteurs du BDD et la Direction des opérations régionales du ministère de la Santé nationale et du Bien-être social.

Le Bureau des drogues dangereuses tient à remercier sincèrement les organismes ci-haut mentionnés qui, par leur collaboration, ont permis la publication du présent rapport.

Statistiques sur les analyses de drogues 77 - 80

## **Introduction**

## Introduction

This report is divided into several sections. The analysis section provides highlights of data available in preceding sections in table format. Ten-year trends of available data are presented in graphic charts to facilitate readability.

Section one of the tables contains legal statistics on disposition of charges and resulting sentences by narcotic, controlled and restricted drug related legislation. Data for this section were extracted from the Drug Offence and Disposition Reports, submitted to B.D.D. by all enforcement agencies in Canada.

Section two contains statistical data on the use of methadone in the management of opioid dependence in Canada. Data for this section of the report were extracted from Patient Information Forms submitted by physicians authorized to prescribe methadone. This section replaces in part the User Statistics section which is no longer published in this report. The User Statistics section may be obtained separately by contacting or submitting requests to the address listed below.

Section three contains data on the diversion of licit narcotic and controlled drugs from the health care system, for non-medical use. Narcotic and Controlled Drug Loss and Theft Reports and the Forgery Reports are submitted to B.D.D. by health professionals as well as by Bureau inspectors.

Section four contains data on the number of drugs analysed at the request of enforcement agencies for evidence gathering purpose. The compiled reports are submitted to B.D.D. by Field Operations Directorate of Health and Welfare Canada.

In interpreting statistical data contained in this report, in addition to points made in each section of the report, the following should be noted:

- data for the years 1984 to 1987 have been updated by including information from reports received after the annual June 30th data capture cut-off date. For some drugs, this update may change the already published data for the previous year.

## Introduction

Le rapport est divisé en plusieurs sections. La section "analyse" présente les principaux éléments des données exposées sous forme de tableaux dans les sections qui précèdent. Afin de faciliter la lecture du rapport, les tendances des données sur une période de dix ans sont présentées sous forme de graphiques.

La première section des tableaux contient des statistiques judiciaires sur le règlement des accusations et les sentences consécutives, selon les lois régissant les stupéfiants, les drogues contrôlées et les drogues d'usage restreint. Les données de cette section ont été extraites des rapports sur les infractions liées aux drogues et le règlement des cas, soumis au BDD par tous les services de police du Canada.

La deuxième section contient des données statistiques sur l'usage de la méthadone dans le traitement de la dépendance à l'égard des opioïdes au Canada. Les données de cette section proviennent des formulaires d'information concernant le patient soumis par les médecins autorisés à prescrire de la méthadone. Cette section remplace en partie la section sur les statistiques concernant les usagers, qui n'est plus publiée dans ce rapport. La section sur les statistiques concernant les usagers peut être obtenue sur demande en communiquant à l'adresse ci-dessous.

La troisième section contient des données sur les stupéfiants et les drogues contrôlées licites détournées du système de soins à des fins non médicales. Des rapports sur les pertes et les vols de stupéfiants et de drogues contrôlées et sur les contrefaçons sont soumis au BDD par les professionnels de la santé et les inspecteurs du Bureau.

La quatrième section présente des données sur le nombre de drogues analysées à la demande des services de police en prévision de poursuites en justice. Les rapports compilés sont soumis au BDD par la Direction des opérations régionales de Santé et Bien-être social Canada.

Dans l'interprétation des données statistiques présentées dans ce rapport, il importe de tenir compte des points suivants, en plus des précisions apportées dans chaque section :

- les données des années 1984 à 1987 ont été mises à jour par inclusion des rapports reçus après le 30 juin, la date limite de saisie annuelle des données. Ces mises à jour peuvent modifier les données de l'année précédente concernant certaines drogues.

- the source data are extracted from case reports and retrieved from information systems which support both program operations and statistics. Thus, as in other similar reporting systems, these statistics may be influenced by operational priorities of the contributing parties.

- the fact that these statistics are based on information on known drug abuse related criminal activities which came to the attention of the above mentioned contributing parties and were reported to the Bureau, means that they are a subset of all these activities in Canada.

- overall patterns, trends and comparison analysis are more reliable than analysis of detailed breakdown of data or of total counts as an absolute measure of drug abuse problems.

Comments or inquiries concerning the content and use of this publication should be addressed to Information Services Division, Bureau of Dangerous Drugs, Ottawa, Ontario, K1A 1B9, (613)954-6791.

- les données de base sont extraites de fiches d'observations et de systèmes d'information qui viennent étayer tant les opérations des programmes que les données statistiques. Par conséquent, comme dans le cas d'autres systèmes semblables, les priorités opérationnelles des services participants peuvent influencer sur les statistiques.

- comme seules sont enregistrées les activités criminelles connues qui sont signalées aux services participants susmentionnés et qui sont déclarées au Bureau, ces activités ne représentent qu'un sous-ensemble de la situation réelle de l'abus des drogues au Canada.

- comme mesure absolue des problèmes de consommation de drogues, les tendances globales et les analyses comparatives sont plus fiables que l'analyse d'une ventilation détaillée des données ou des dénombrements totaux.

Tout commentaire ou toute question concernant le contenu et l'usage de la présente publication doit être adressé à la Division des services d'information, Bureau des drogues dangereuses, Ottawa, Ontario, K1A 1B9 (613) 954-6791.

**Analysis    Section**

**Section de l'analyse**

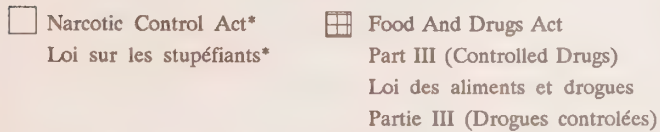

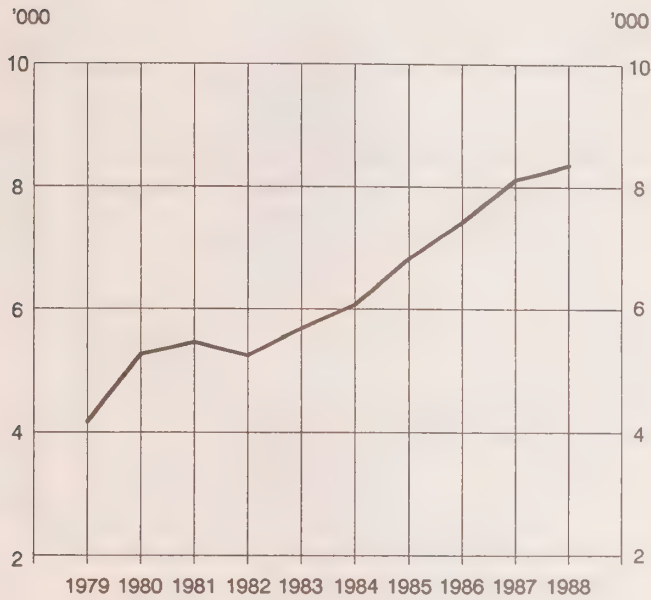

## Total Convictions and Percentage Distribution for All Federal Drug Related Legislation

**Figure 1**

Total Convictions, 1979-1988

Toutes les Condamnations, 1979-1988

NOTE: Due to rounding procedures, percentages may not aggregate to 100%

The total number of all convictions under all federal drug related legislation reported by all enforcement agencies across Canada increased steadily between 1979 and 1988, with a slight decrease in 1982. Total convictions have increased by 10% in 1987, from 7,416 in 1986 to 8,132 in 1987. A similar increase is expected for the 1988 calendar year, as more complex cases will be finalized in courts, reported and ultimately updated in the statistics. Current figures indicate a 3% increase in 1988, over 1987. Drug analysis statistics, showing a 29% increase in 1988 seem to support this upward trend.

In 1988, convictions under the Narcotic Control Act accounted for 81% of the total convictions, while in 1979 they accounted for 46%. The number of convictions under all other drug related legislation have decreased from 54% in 1979 to 19% in 1988. Criminal Code drug related convictions, reported to B.D.D., account for a small percentage, 2% in 1988, of total drug convictions.

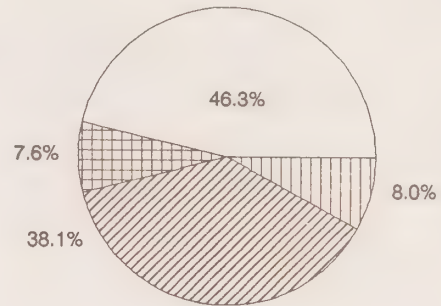

## Nombre total des condamnations et répartition en pourcentage des données en vertu de toutes les lois fédérales relatives aux drogues

**Figure 2**

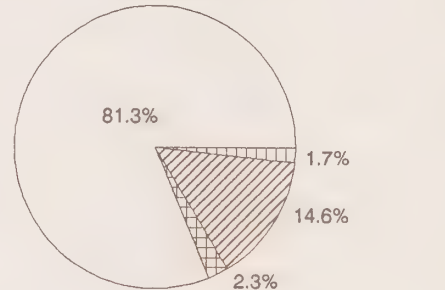

Percentage Distribution, 1979 and 1988

Répartition en pourcentage, 1979 et 1988

1979

1988

NOTA: En raison de l'arrondissement, les pourcentages peuvent ne pas s'élever au total de 100%

Le nombre total des condamnations prononcées en vertu de toutes les lois fédérales relatives aux drogues et déclarées par tous les organismes de police du Canada a augmenté régulièrement entre 1979 et 1988, malgré une légère réduction en 1982. Les condamnations ont augmenté de 10 p. 100 en 1987, passant de 7 416 en 1986 à 8 132 en 1987. Une augmentation semblable est prévue pour l'année civile 1988, à mesure que les cas plus complexes seront réglés devant les tribunaux, déclarés, puis inscrits dans les statistiques. Les chiffres actuels indiquent une augmentation de 3 p. 100 en 1988 par rapport à l'année précédente. Les statistiques sur les analyses de drogues semblent appuyer une tendance ascensionnelle, puisqu'elles montrent une hausse de 29 p. 100 en 1988.

En 1988, les condamnations prononcées en vertu de la Loi sur les stupéfiants ont représenté 81 p. 100 du total des condamnations, par opposition à 46 p. 100 en 1979. Le nombre des condamnations prononcées en vertu de toutes les autres lois relatives aux drogues est tombé de 54 p. 100 en 1979 à 19 p. 100 en 1988. Les condamnations liées aux drogues prononcées en vertu du Code criminel et signalées au BDD représentent un faible pourcentage (2 p. 100 en 1988) du total des condamnations.

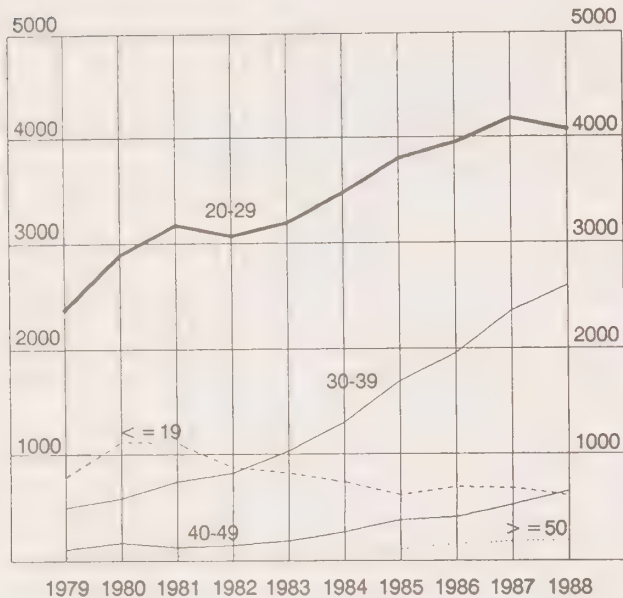

\* Excluding cannabis.

\* Excluant le cannabis.

### Convictions Under All Federal Drug Related Legislation by Age Group

Figure 3

Convictions\*, 1979-1988  
Condamnations\*, 1979-1988

NOTE: Due to rounding procedures, percentages may not aggregate to 100%

As shown in figure 3, the total number of convictions under all federal drug related legislation for the age group of 19 and under have been decreasing steadily since 1981. The annual increases in the number of convictions for the 20 to 29 age group are more gradual than those for the 30 to 39 age group, which is more upwardly scaled. This may also indicate that the 40 and up age groups are likely to follow the 30 to 39 age group example.

This trend is more apparent in figure 4. The 19 and under and 20 to 29 age groups, as a percentage share of total drug convictions have decreased, from 84% in 1979 to 58% in 1988, while 30 to 39, 40 to 49 and 50 and over age groups have shown increases, from 17% in 1979 to 42% in 1988.

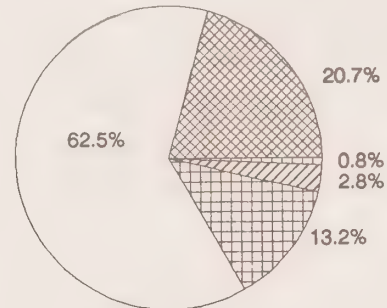

\* Excluding cannabis and Criminal Code

### Condamnations en vertu de toutes les lois fédérales relatives aux drogues selon les groupes d'âge

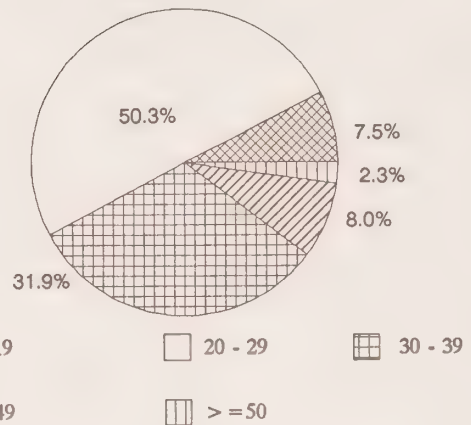

Figure 4

Percentage Distribution\*, 1979 and 1988  
Répartition en pourcentage\*, 1979 et 1988

1979

1988

NOTA: En raison de l'arrondissement, les pourcentages peuvent ne pas s'élever au total de 100%

Comme le montre la figure 3, le nombre total des condamnations prononcées en vertu de toutes les lois fédérales relatives aux drogues pour le groupe d'âge des 19 ans et moins décroît régulièrement depuis 1981. Les augmentations annuelles du nombre de condamnations pour le groupe d'âge des 20 à 29 ans sont plus graduelles que celles pour le groupe des 30 à 39 ans, dont la courbe ascendante est plus prononcée. Cela pourrait également indiquer que les groupes d'âge de 40 ans et plus sont susceptibles de suivre l'exemple du groupe des 30 à 39 ans.

Cette tendance est plus apparente à la figure 4. Les groupes d'âge des 19 ans et moins et des 20 à 29 ans, comme pourcentage du nombre total de condamnations liées aux drogues, ont connu une baisse, tombant de 84 p. 100 en 1979 à 58 p. 100 en 1988, alors que les groupes de 30 à 39 ans, de 40 à 49 ans et de 50 ans et plus ont affiché une augmentation, passant de 17 p. 100 en 1979 à 42 p. 100 en 1988.

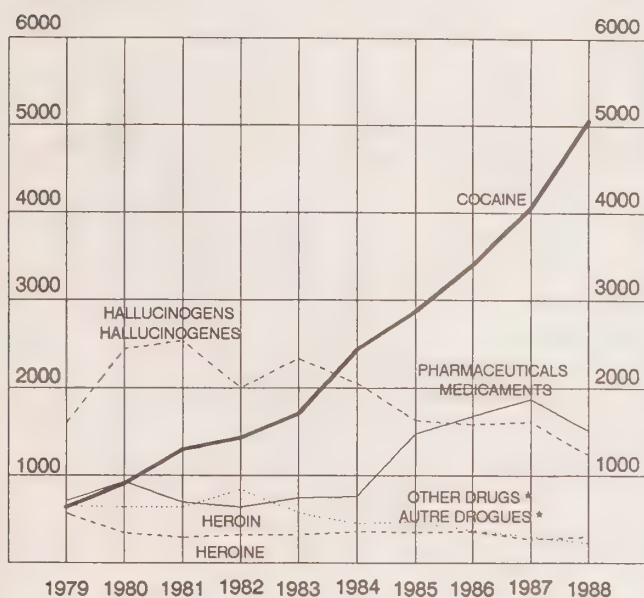

\* l'exclusion du cannabis et le Code criminel

## Convictions Under All Federal Drug Related Legislation

**Figure 5**

By type of drugs, 1979-1988

Selon le genre de drogue, 1979-1988

1979 1980 1981 1982 1983 1984 1985 1986 1987 1988

NOTE: Due to rounding procedures, percentages may not aggregate to 100%

In a ten-year period convictions for cocaine and pharmaceuticals have increased while convictions for hallucinogens, heroin and other drugs have decreased or remained relatively the same, as shown in figure 5. In 1988, a decrease of 19% is currently noted for pharmaceuticals, from 1871 convictions in 1987 to 1518 in 1988.

Compared to 1979, the 1988 convictions for heroin, cocaine, pharmaceuticals (prescription drugs), hallucinogens and other drugs as a percentage share of total drug convictions have become less evenly distributed, as shown in figure 6. Convictions for cocaine and pharmaceuticals have increased from 15% and 17% in 1979, to 61% and 18% in 1988 respectively. In contrast, convictions for heroin, hallucinogens and other drugs have decreased and no longer account for the majority of total drug convictions.

\* Other Drugs include methamphetamine, phencyclidine (PCP) and drugs not available on the Canadian medical market.

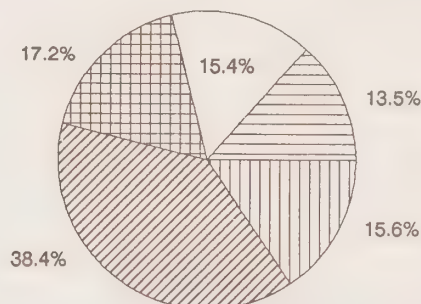

## Condamnations en vertu de toutes les lois fédérales relatives aux drogues

**Figure 6**

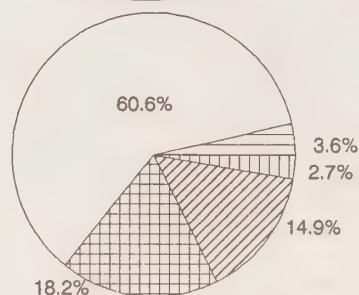

By type of drugs, 1979 and 1988

Selon le genre de drogue, 1979 et 1988

1979

1988

|                                 |                                   |                                |
|---------------------------------|-----------------------------------|--------------------------------|
| Heroin<br>Héroïne               | Cocaine<br>Cocaïne                | Pharmaceuticals<br>Médicaments |
| Hallucinogens<br>Hallucinogènes | Other Drugs *<br>Autres Drogues * |                                |

NOTA: En raison de l'arrondissement, les pourcentages peuvent ne pas s'élever au total de 100%

Sur une période de dix ans, le nombre des condamnations liées à la cocaïne et aux médicaments de prescription a connu une hausse, tandis que le nombre des condamnations liées aux hallucinogènes, à l'héroïne et aux autres drogues a diminué ou est demeuré relativement le même, comme le montre la figure 5. En 1988, on remarque une diminution de 19 p. 100 quant aux médicaments de prescription, pour lesquels les condamnations tombent de 1 871 en 1987 à 1 518 en 1988.

Comparativement à 1979, les taux de condamnations enregistrées en 1988 en ce qui concerne l'héroïne, la cocaïne, les médicaments de prescription, les hallucinogènes et les autres drogues se sont répartis moins uniformément, comme le montre la figure 6. Les condamnations liées à la cocaïne et aux médicaments sont passées respectivement de 15 p. 100 et de 17 p. 100 en 1979 à 61 p. 100 et à 18 p. 100 en 1988. Par opposition, les condamnations liées à l'héroïne, aux hallucinogènes et aux autres drogues ont régressé et ne représentent plus la part la plus importante du nombre total de condamnations.

\* Autres drogues comprend la méthamphétamine, la phencyclidine (PCP) et les drogues qui ne sont pas disponibles sur le marché médical.

## Heroin and Cocaine Convictions Under All Federal Drug Related Legislation

## Condamnations dans les causes impliquant l'héroïne en vertu de toutes les lois fédérales relatives aux drogues

Figure 7  
Heroin(e) 1979-1988

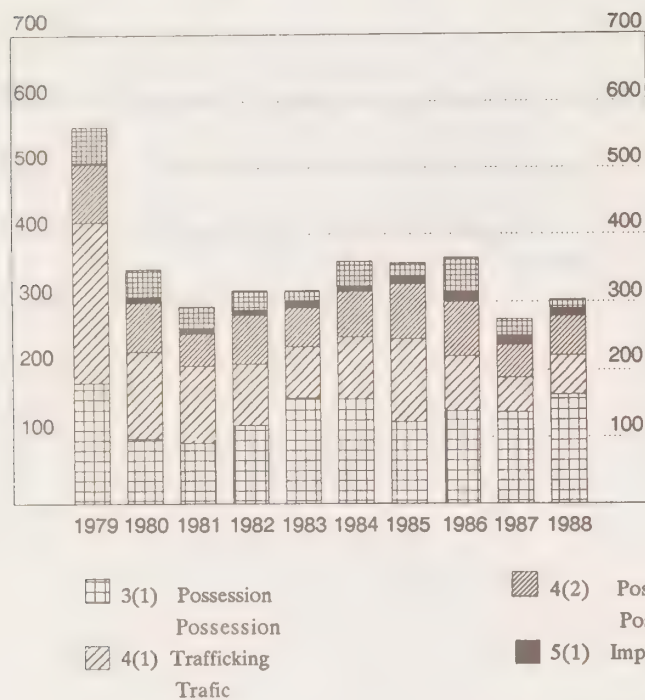

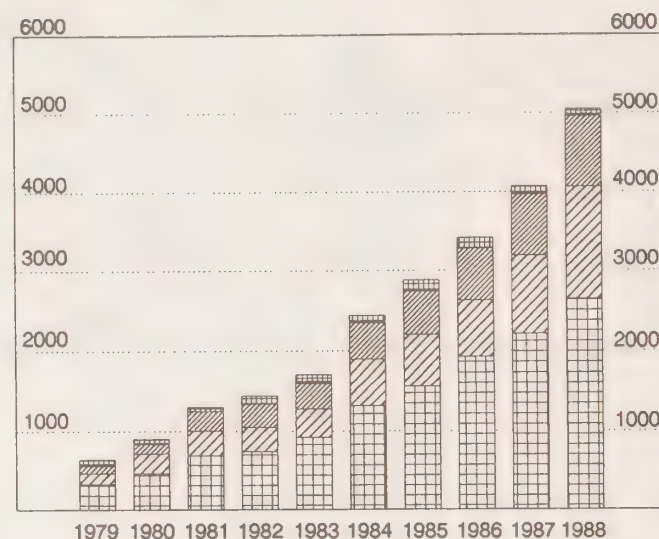

Figure 8  
Cocaine 1979-1988

As shown in figure 7, the number of convictions involving heroin, under all federal drug related legislation, remained relatively the same over the 1980-1988 period. In most years trafficking and possession for the purpose of trafficking, when considered together, account for the majority of heroin convictions. For 1988, heroin convictions show an increase of 11% over last year, from 274 in 1987 to 303 in 1988. An updated figure for 1987 heroin convictions, shows an increase of 12% over last year's published figure.

Comme le montre la figure 7, le nombre de condamnations liées à l'héroïne prononcées en vertu de toutes les lois fédérales régissant les drogues est demeuré relativement stable au cours de la période de 1980 à 1988. Pour la plus grande partie de cette période, la plupart des condamnations sont attribuables au trafic et à la possession d'héroïne en vue d'en faire le trafic. Pour 1988, le nombre de condamnations liées à l'héroïne est en hausse de 11 p. 100 par rapport à l'année précédente, passant de 274 en 1987 à 303 en 1988. Une mise à jour des données pour 1987 montre une augmentation de 12 p. 100 par rapport aux chiffres publiés l'année précédente.

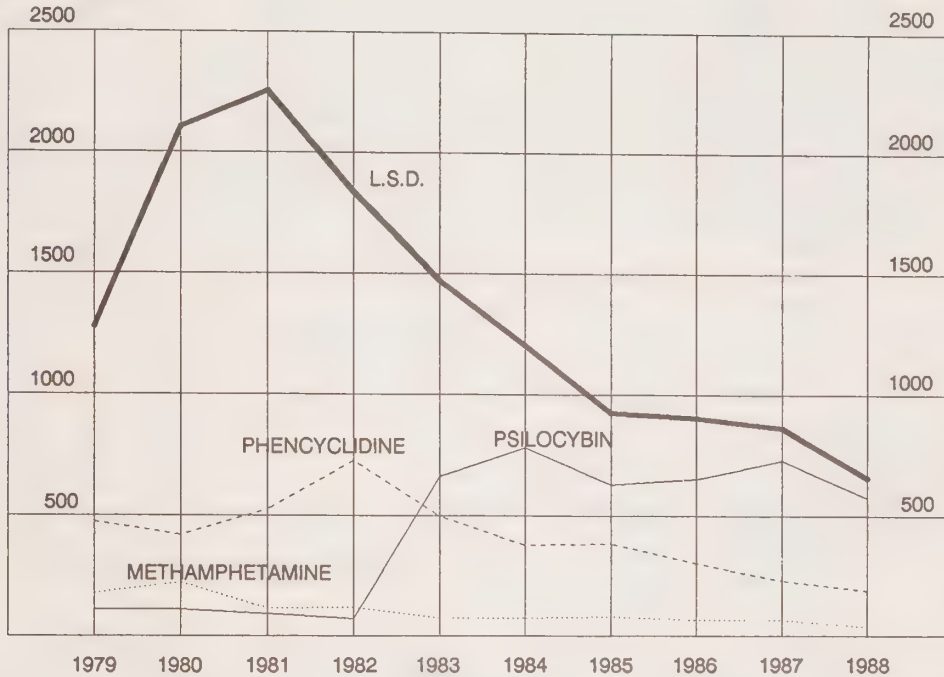

Convictions involving cocaine, under all federal drug related legislation show a consistent increase over a ten-year period, as shown in figure 8. In 1988 the number of cocaine convictions has increased by 25%, from 4,063 in 1987 to 5,060 in 1988. Simple possession still accounts for the majority of all cocaine convictions, however trafficking and possession for the purpose of trafficking has increased by 32% in 1988, from 1,749 convictions in 1987 to 2,317 in 1988. The number of samples of cocaine analyzed during 1988 rose by 50%, from 10,289 samples in 1987 to 15,424 samples in 1988. All indicators point to an increased availability of cocaine. It is anticipated that this increasing trend in cocaine convictions will continue.

Le nombre de condamnations mettant en cause la cocaïne enregistrées en vertu des lois fédérales relatives aux drogues s'est accru de façon régulière sur une période de 10 ans, comme le montre la figure 8. En 1988, le nombre des condamnations a augmenté de 25 p. 100, passant de 4 063 en 1987 à 5 060 un an plus tard. La simple possession représente toujours la majorité des condamnations, mais celles pour trafic et possession en vue de trafic ont augmenté de 32 p. 100 en 1988, passant de 1 749 en 1987 à 2 317 en 1988. Le nombre des échantillons de cocaïne analysés au cours de cette dernière année s'est accru de 50 p. 100, passant de 10 289 en 1987 à 15 424 en 1988. Tous les indicateurs mettent en évidence une augmentation de l'offre de la cocaïne. Cette tendance à la hausse dans le nombre des condamnations devrait théoriquement se poursuivre.

**Convictions Under All Federal Drug Related Legislation For Phencyclidine, LSD, Psilocybin and Methamphetamine**

**Condamnations en vertu de toutes les lois fédérales relatives à la phencyclidine, au LSD, à la psilocybine et à la méthamphétamine**

**Figure 9**  
1979-1988  
Convictions/Condamnations

The number of convictions under all federal drug related legislation involving phencyclidine (PCP) have been generally decreasing since 1982. A decrease of 17% is currently noted for 1988, from 229 convictions in 1987 to 189 in 1988.

The number of convictions under all federal drug related legislation involving methamphetamine have been generally decreasing since 1982, as shown above.

The number of convictions under all federal drug-related legislation involving hallucinogens have been declining gradually since 1983, as shown previously in figure 5. Convictions for lysergic acid diethylamine have been decreasing since 1981. In 1988, convictions for LSD should show only a slight decrease, although current figures show a high decrease of 24%, from 866 convictions in 1987 to 657 convictions in 1988. An updated figure for 1987 LSD convictions, shows an increase of 15% over last year's published figure. Convictions for psilocybin have remained relatively the same since 1983.

Le nombre de condamnations prononcées en vertu des lois fédérales relatives aux drogues qui mettent en cause la phencyclidine (PCP) connaît, de façon générale, une diminution depuis 1982. Le nombre des condamnations est tombé de 229 en 1987 à 189 en 1988, soit une réduction de 17 p. 100.

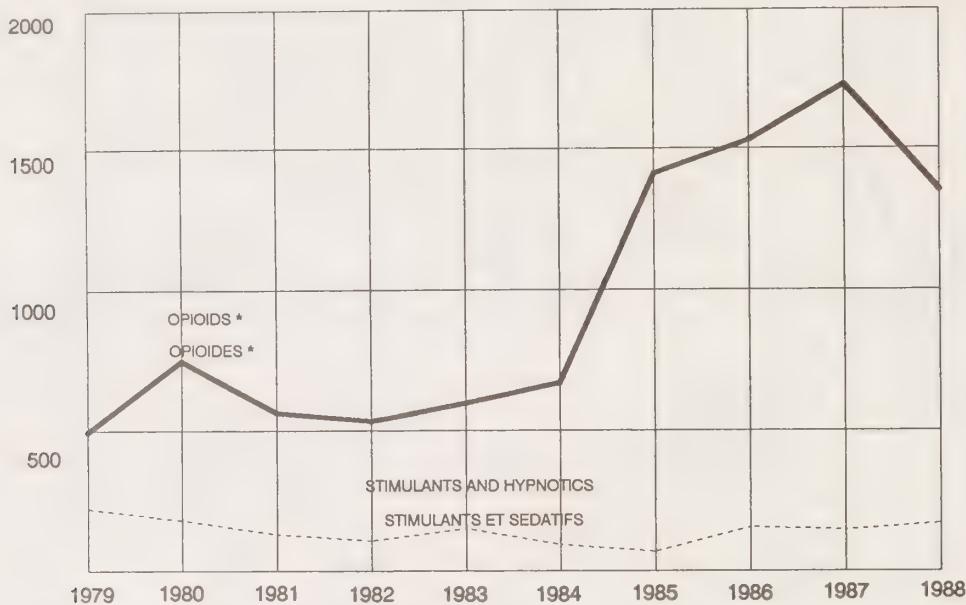

Comme le montre le schéma ci-dessus, le nombre de condamnations prononcées en vertu des lois fédérales relatives aux drogues qui mettent en cause la méthamphétamine connaît une diminution générale depuis 1982.

Le nombre de condamnations enregistrées en vertu des lois fédérales relatives aux drogues qui mettent en cause des hallucinogènes décroît de façon graduelle depuis 1983, ainsi qu'il est indiqué plus haut à la figure 5. Les condamnations liées au diéthylamide de l'acide lysergique diminuent depuis 1981. En 1988, les condamnations concernant le LSD ne devraient afficher qu'une faible réduction, encore que les chiffres courants révèlent une forte diminution de 24 p. 100, les condamnations tombant de 866 en 1987 à 657 en 1988. Une mise à jour des données pour 1987 révèle une augmentation de 15 p. 100 du nombre des condamnations par rapport aux chiffres publiés l'année précédente. En ce qui a trait à la psilocybine, le nombre des condamnations est demeuré relativement stable depuis 1983.

**Convictions Under All Federal Drug Related Legislation Involving Prescription Opioids, Stimulants and Hypnotics**

**Condamnations en vertu de toutes les lois fédérales relatives aux opioïdes, stimulants et sédatifs de prescription**

**Figure 10**  
1979-1988  
Convictions/Condamnations

Convictions for prescription narcotic and controlled drugs under all federal drug related legislation, have been increasing steadily since 1982, as shown previously in figure 5. The number of these convictions currently shows a decrease of 19% over last year, from 1,875 convictions in 1987 to 1522 in 1988.

The majority of prescription drug convictions involve opioids. In 1988 opioids accounted for 93% of total prescription drug convictions while stimulants and hypnotics (controlled drugs) accounted for 7%.

Over a ten-year period the number of convictions for stimulants and hypnotics has remained essentially the same, as shown in figure 10. In 1988, convictions for stimulants and hypnotics have shown an increase from 148 convictions in 1987 to 169 convictions in 1988. This increase is largely due to an increase in convictions for methylphenidate, from 75 convictions in 1987 to 148 convictions in 1988.

The total number of convictions under the Criminal Code related to these same narcotic drugs remained essentially the same, 18 convictions in 1987 and 23 in 1988.

Les condamnations liées aux stupéfiants et aux drogues contrôlées de prescription prononcées en vertu des lois fédérales relatives aux drogues sont en régression constante depuis 1982, comme le montre plus haut la figure 5. Ces condamnations affichent actuellement une réduction de 19 p. 100 par rapport à l'an dernier, tombant de 1 875 en 1987 à 1 522 en 1988.

Les condamnations liées aux médicaments de prescription mettent en cause pour la plupart des opioïdes. En 1988, ces derniers ont compté pour 93 p. 100 du nombre total des condamnations liées aux médicaments de prescription, alors que les stimulants et les hypnotiques (drogues contrôlées) ont été responsables de 7 p. 100 des condamnations.

Sur une période de 10 ans, le nombre des condamnations liées aux stimulants et aux hypnotiques est demeuré essentiellement le même, comme le montre la figure 10. En 1988, les condamnations ont connu une augmentation, passant de 148 en 1987 à 169 en 1988, phénomène largement attribuable à une hausse du nombre des condamnations concernant le méthylphénidate, qui est passé de 75 en 1987 à 148 un an plus tard.

Le nombre total de condamnations prononcées en vertu du Code criminel et liées à ces mêmes stupéfiants est demeuré essentiellement le même, soit 18 en 1987 et 23 en 1988.

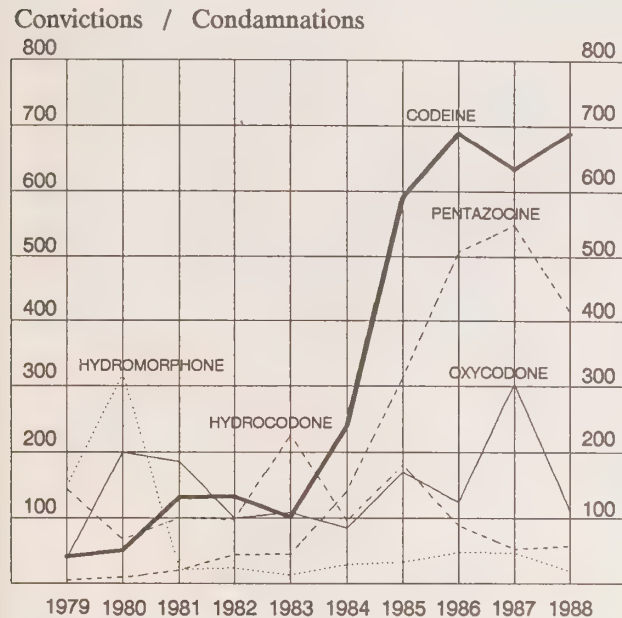

- \* Opioids includes natural and synthetic substances with morphine-like actions.
- \* Sont comprises dans opioïdes, les substances naturelles et synthétiques agissant comme la morphine.

## Convictions Under All Federal Drug Related Legislation Involving Prescription Opioids

**Figure 11**

By drug, 1979-1988

Selon la drogue, 1979-1988

NOTE: Due to rounding procedures, percentages may not aggregate to 100%

As shown in figure 11, convictions for codeine and pentazocine have generally increased since 1983. In 1988, only codeine and hydrocodone show increases, while pentazocine, oxycodone and hydromorphone currently show decreases. As shown in figure 12, in 1979 convictions under all federal drug related legislation for hydromorphone, hydrocodone and other opioids accounted for 83% of all opioid drug convictions, while in 1988, codeine, pentazocine and oxycodone account for 90% of these convictions.

Total convictions for all opioid drugs currently show a decrease of 22% in 1988, from 1728 convictions in 1987 to 1352 convictions in 1988. Increase is noted primarily for products containing codeine, from 634 convictions in 1987 to 689 in 1988. Decreases are noted for oxycodone, from 305 in 1987 to 109 in 1988, pentazocine, from 548 in 1987 to 414 in 1988, and hydromorphone from 47 in 1987 to 17 in 1988.

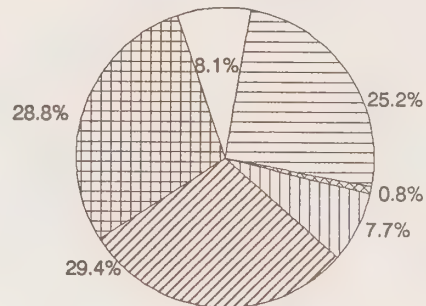

## Condamnations en vertu de toutes les lois fédérales relatives aux opioïdes de prescription

**Figure 12**

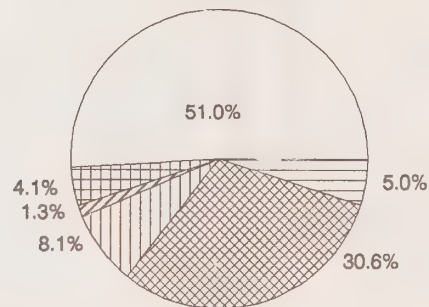

Percentage Distribution, 1979 and 1988

Répartition en pourcentage, 1979 et 1988

1979

1988

□ Codeine/Codéine    ▨ Hydrocodone    ▩ Hydromorphone  
 ▤ Oxycodone    ▦ Pentazocine    □ Other/Autres

NOTA: En raison de l'arrondissement, les pourcentages peuvent ne pas s'élever au total de 100%

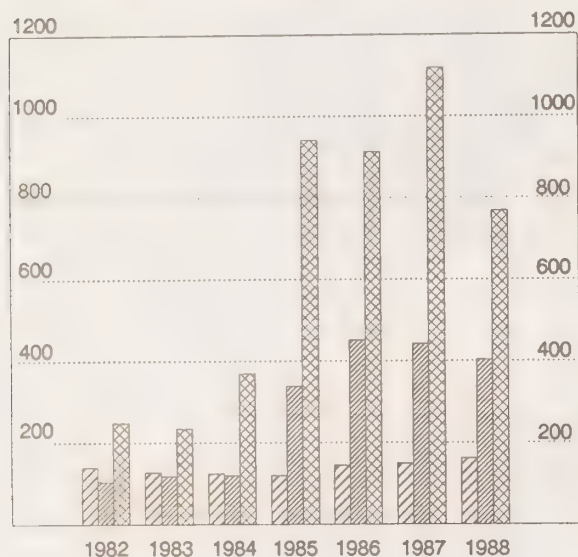

Comme l'illustre la figure 11, les condamnations imputables à la codéine et à la pentazocine ont, de façon générale, augmenté depuis 1983. En 1988, seules celles relatives à la codéine et à l'hydrocodone ont augmenté, tandis que celles concernant la pentazocine, l'oxycodone et l'hydromorphone ont diminué. Comme le montre la figure 12, en 1979, le nombre des condamnations en vertu des lois fédérales relatives aux drogues pour l'hydromorphone, l'hydrocodone et les autres opioïdes a représenté 83 p. 100 de l'ensemble des condamnations relatives aux opioïdes, alors qu'en 1988, la codéine, la pentazocine et l'oxycodone ont été à l'origine de 90 p. 100 de ces condamnations.

Le nombre des condamnations liées aux opioïdes affiche une réduction de 22 p. 100 en 1988, tombant de 1 728 en 87 à 1 352 l'année suivante. La principale augmentation s'observe au niveau des produits contenant de la codéine, le nombre des condamnations passant de 634 en 1987 à 689 en 1988. Des réductions sont enregistrées en ce qui concerne l'oxycodone (305 en 1987 et 109 en 1988), la pentazocine (548 en 1987 et 414 en 1988) et l'hydromorphone (47 en 1987 par rapport à 17 en 1988).

## Convictions Under the Narcotic Control Act Involving Prescription Drugs

**Figure 13**

By conviction type, 1982-1988  
Selon le genre de condamnation, 1982-1988

▨ Trafficking \*      ▩ Possession  
 ▨ Traffic \*          ▩ Possession  
 ▤ Multiple Doctoring \*\*/Consultations Médicales multiples \*\*

NOTE: Due to rounding procedures, percentages may not aggregate to 100%

Figure 13 shows that since 1984 convictions involving prescription drugs for multiple doctoring and possession, under the Narcotic Control Act, have increased substantially. In 1988, multiple doctoring convictions accounted for 57% of the total convictions, compared to 51% in 1982. Possession, as a percentage share, increased as well, from 27% in 1982 to 30% in 1988. The total number of convictions for trafficking have remained essentially the same.

Codeine, which historically accounted for a high number of multiple doctoring convictions, accounted for 78% of convictions in 1988, as shown in figure 14. The number of multiple doctoring convictions involving oxycodone, pethidine and pentazocine decreased substantially in 1988, while convictions for hydrocodone and codeine showed slight increases over 1987.

\* Trafficking includes possession for the purpose of trafficking and importation.

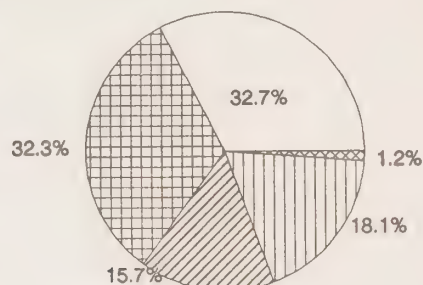

\*\* Obtaining drugs from more than one physician within a 30-day period and may result in multiple charges.

## Condamnations en vertu de la loi sur les stupéfiants relatives aux médicaments

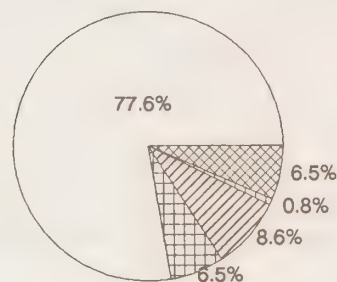

**Figure 14**

Multiple Doctoring / Consultations médicales multiples  
Percent Distribution, 1982 and 1988  
Répartition en pourcentage, 1982 et 1988

1982

1988

□ Codeine/Codéine    ▨ Hydrocodone  
 ▨ Péthidine          ▤ Other/Autres    ▨ Oxycodone

NOTA: En raison de l'arrondissement, les pourcentages peuvent ne pas s'élever au total de 100%

Selon la figure 13, depuis 1984, les condamnations prononcées en vertu de la Loi sur les stupéfiants pour possession et consultations médicales multiples visant des médicaments de prescription ont augmenté considérablement. En 1988, les condamnations pour consultations médicales multiples ont représenté 57 p. 100 du total des condamnations, comparativement à 51 p. 100 en 1982. Les condamnations pour raison de possession ont également augmenté en termes de pourcentage, passant de 27 p. 100 en 1982 à 30 p. 100 en 1988. Le nombre total des condamnations pour trafic est demeuré essentiellement le même.

La codéine, qui a toujours été responsable d'un nombre élevé des condamnations pour consultations médicales multiples, a représenté 78 p. 100 des condamnations en 1988, comme le montre la figure 14. Le nombre de condamnations pour consultations médicales multiples visant l'oxycodone, la péthidine et la pentazocine a connu une baisse importante en 1988, tandis que les condamnations mettant en cause l'hydrocodone et la codéine ont augmenté légèrement par rapport à 1987.

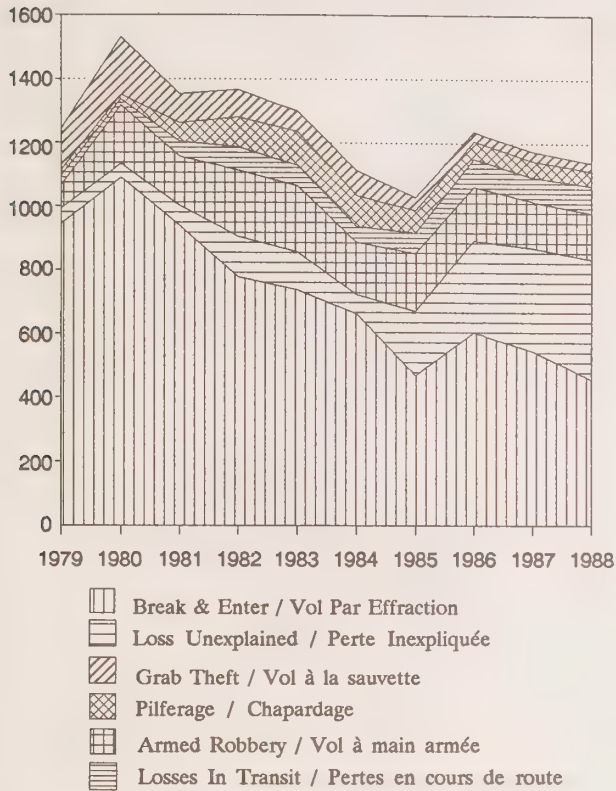

\* Inclus avec le trafic sont les condamnations de possession pour fin de trafic et importation.

\*\* Obtention de drogues de plus d'un médecin au cours d'une période de 30 jours.

## Total Cases Of Theft and Other Losses and Percentage Distribution of 1988 Data

**Figure 15**

Total Of All Cases / Total de tous les cas

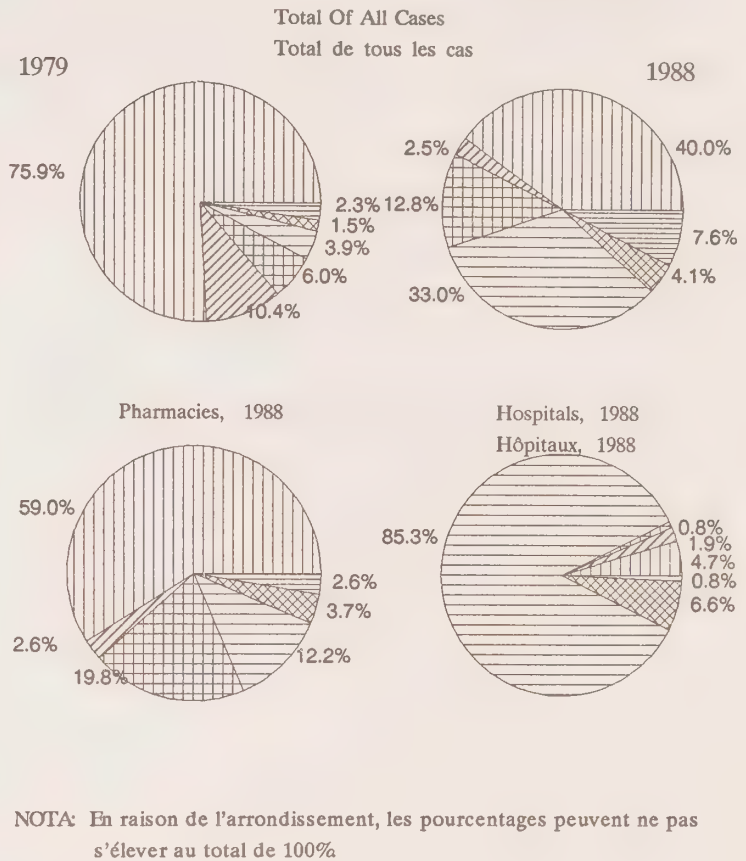

NOTE: Due to rounding procedures, percentages may not aggregate to 100%

## Nombre total de cas de vols et autres pertes et répartition en pourcentage des données pour 1988

**Figure 16**

Percentage Distribution / Répartition en pourcentage

NOTA: En raison de l'arrondissement, les pourcentages peuvent ne pas s'élever au total de 100%

The total number of reported diversion cases, through thefts and other losses, involving narcotic and/or controlled drugs, with the exception of an increase in 1986, has been gradually decreasing since 1980, as shown in figure 15. This decrease is largely due to a decline in the number of break and entry cases.

As shown in figure 16, in 1979 break and entry accounted for 76% of the total theft and other losses cases while in 1988 break and entry accounted for 40% of all the cases. Pharmacies historically accounted for the majority of all theft and other losses cases (64% in 1988). Break and entry (59% in 1988) and armed robbery (20% in 1988) are the two highest modes of diversion of prescription drugs from pharmacies. A decrease of 7% of theft and losses cases is recorded for pharmacies, from 781 cases in 1987 to 27 in 1988. Loss unexplained and pilferage are the two highest modes of diversion for hospitals. Losses in transit (48% in 1988) and loss unexplained (49%) are the two highest modes of diversion for licenced dealers. An increase is recorded for licenced dealers, from 99 theft and losses cases in 1987 to 134 in 1988.

Le nombre total de cas de détournements déclarés, sous la forme de vol et d'autres pertes, impliquant des stupéfiants et/ou des drogues contrôlées, à l'exception d'une augmentation en 1986, a diminué de façon progressive depuis 1980, comme le montre la figure 15. Cette diminution est largement attribuable à une baisse du nombre de vols avec effraction.

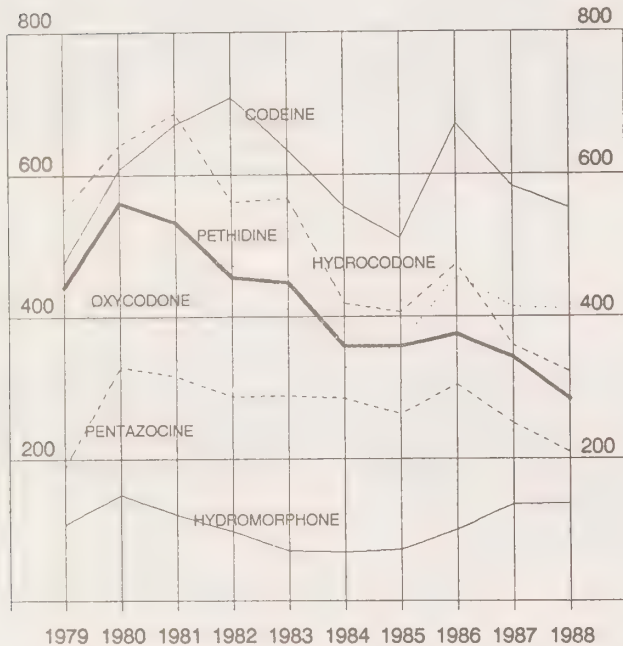

Comme le montre la figure 16, en 1979, le nombre des vols avec effraction a représenté 76 p. 100 du nombre total des cas de détournements par vols et autres pertes, alors qu'en 1988, les vols avec effraction ont constitué 40 p. 100 de tous les cas. La plupart des vols et des autres pertes de stupéfiants et de drogues contrôlées se sont produits, comme par le passé, dans des pharmacies (64 p. 100 en 1988). Les vols avec effraction (59 p. 100 en 1988) et les vols à main armée (20 p. 100 en 1988) sont les deux principales méthodes de détournement de médicaments de prescription à partir des pharmacies. Le nombre de vols et de pertes enregistrés dans les pharmacies a diminué de 7 p. 100, tombant de 781 cas en 1987 à 27 en 1988. Les pertes inexpliquées et le chapardage constituent les deux principaux modes de détournement dans le cas des hôpitaux. Les pertes lors du transport (48 p. 100 en 1988) et les pertes inexpliquées (49 p. 100) sont les deux principaux modes de détournement constatés chez les distributeurs autorisés, qui accusent une augmentation, le nombre des vols et des pertes passant de 99 en 1987 à 134 en 1988.

## Number Of Reported Thefts And Other Losses for Opioid Drugs\* and Percent Distribution

Figure 17

By Drug, 1979 - 1988

Selon la drogue, 1979 - 1988

NOTE: Due to rounding procedures, percentages may not aggregate to 100%

As in convictions, opioids have historically accounted for the majority of theft and other losses cases and in 1988 they account for 80% of all cases while stimulants and hypnotics account for 20%. As shown in figure 17, the number of cases for such drugs as codeine, oxycodone and hydromorphone has remained relatively consistent over a ten-year period.

As shown in figure 18, there are no significant changes between 1979 and 1988. In 1988, codeine remains an opioid drug with the highest number of theft and losses incidences (20%), while oxycodone is second highest (15%) and hydrocodone (11%) and pethidine (10%) have dropped to third and fourth highest. Only morphine, oxycodone and hydromorphone have remained with relatively the same number of theft and losses cases in 1988 as in 1987, while all other opioids have shown decreases over 1987.

\* Opioids include natural and synthetic substances with morphine-like actions.

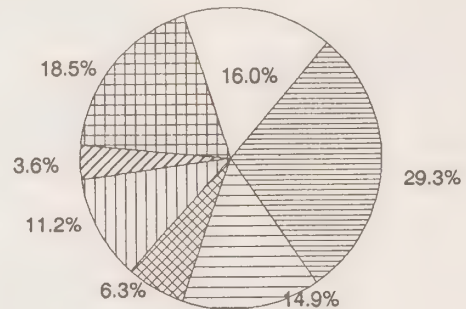

## Nombre de vols et autres pertes rapportés pour les opioïdes\* et répartition en pourcentage

Figure 18

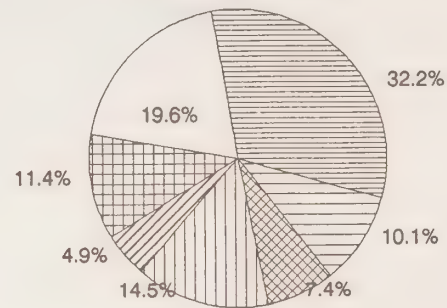

Percent Distribution, 1979 and 1988

Répartition en pourcentage, 1979 et 1988

1979

1988

|                 |                   |                     |
|-----------------|-------------------|---------------------|
| Codeine/Codéine | Hydrocodone       | Hydromorphone       |
| Oxycodone       | Pentazocine       | Pethidine/Péthidine |
| Other Opioids   | / Autres Opioïdes |                     |

NOTA: En raison de l'arrondissement, les pourcentages peuvent ne pas s'élever au total de 100%

Ainsi qu'on le constate dans le cas des condamnations, les opioïdes ont été, comme par le passé, à l'origine de la plupart des cas de vols et d'autres pertes, représentant 80 p. 100 de tous les cas en 1988, alors que les stimulants et les hypnotiques ont compté pour 20 p. 100. Comme le montre la figure 17, le nombre de cas correspondant à des produits comme la codéine, l'oxycodone et l'hydromorphone est demeuré relativement stable sur une période de 10 ans.

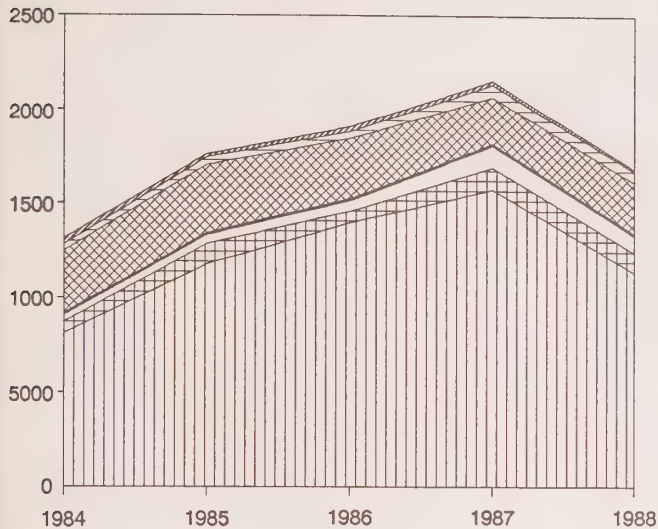

Comme le montre la figure 18, il n'y a pas de différences importantes entre 1979 et 1988, année au cours de laquelle la codéine a continué de faire l'objet du nombre le plus élevé de vols et de pertes (20 p. 100), alors que l'oxycodone venait au deuxième rang (15 p. 100) et que l'hydrocodone (11 p. 100) et la péthidine (10 p. 100) ont glissé au troisième et quatrième rang. Seules la morphine, l'oxycodone et l'hydromorphone ont fait l'objet de vols et de pertes relativement semblables en 1988 et en 1987, tandis que les autres opioïdes ont accusé des augmentations par rapport à 1987.

\* Sont compris comme opioïdes, les substances naturelles et synthétiques agissant comme la morphine.

## Cases of Perscription Forgeries By Type of Forgery and By Drug

## Cas d'ordonnances contrefaites selon le genre de faux et selon la drogue

**Figure 19**  
By Forgery Type, 1984-1988  
Selon le genre de faux, 1984-1988

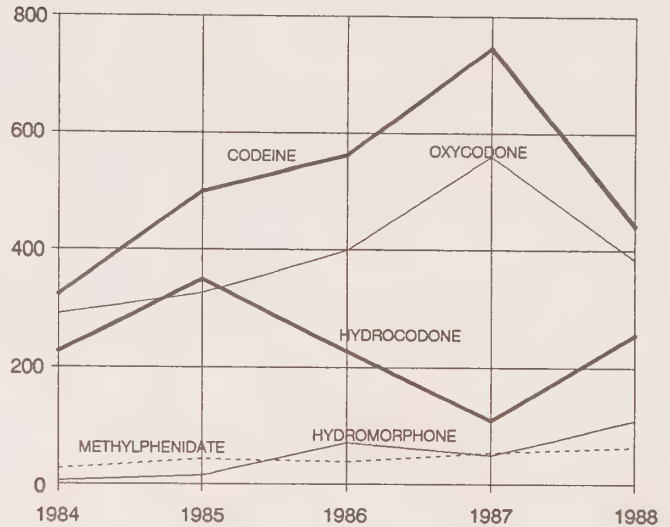

|  |                      |  |                          |
|--|----------------------|--|--------------------------|
|  | Written & Filled     |  | Written & Not Filled     |
|  | Écrite et exécutée   |  | Écrite et non exécutée   |
|  | Verbal & Filled      |  | Verbal & Not Filled      |
|  | Verbale et exécutée  |  | Verbale et non exécutée  |
|  | Altered & Filled     |  | Altered & Not Filled     |
|  | Modifiée et exécutée |  | Modifiée et non exécutée |

The number of detected and reported diversion cases through forged prescriptions involving narcotic and controlled drugs increased between 1984 and 1987, as shown in figure 19. A decrease of 22% is currently shown for 1988, from 2147 forgery cases in 1987 to 1676 in 1988. This decrease is largely due to a 28% decrease in written and filled forged prescriptions, from 1577 in 1987 to 1142 in 1988. The percentage share of total prescription forgery cases not filled remains at 20% in 1988, essentially the same as in previous years, as shown above.

The number of prescription forgeries for products containing codeine and oxycodone increased between 1984 and 1987, as shown in figure 20. In 1988, hydrocodone and hydromorphone showed increases, while codeine and oxycodone show decreases over 1987.

**Figure 20**  
By Drug, 1984-1988  
Selon la drogue, 1984 - 1988

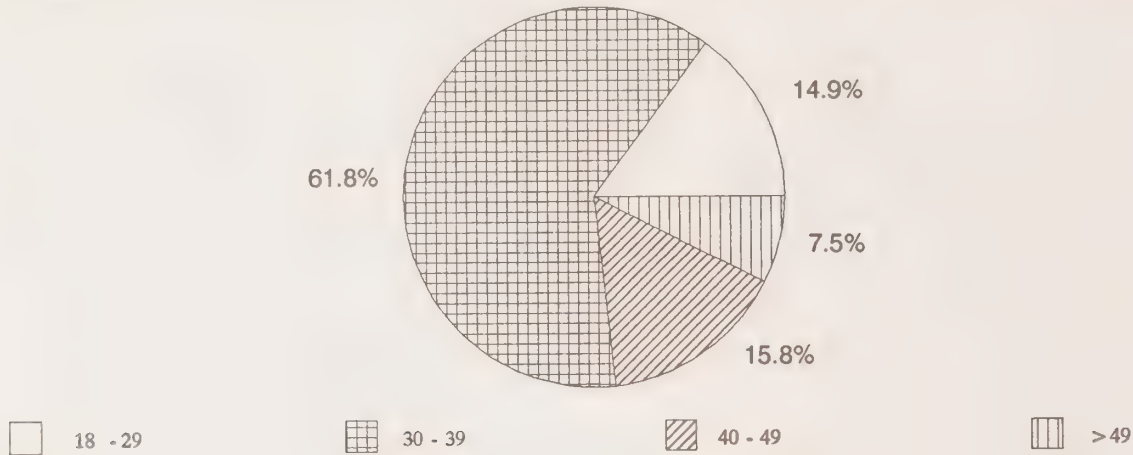

Le nombre des cas de détournement décelés et déclarés sous la forme d'ordonnances contrefaites visant des stupéfiants et des drogues contrôlées a augmenté entre 1984 et 1987, comme le montre la figure 19. Une réduction de 22 p. 100 apparaît actuellement pour 1988, le nombre de cas tombant de 2 147 contrefaçons en 1987 à 1 676 en 1988. Cette réduction est en grande partie attribuable à une baisse de 28 p. 100 dans le nombre des contrefaçons d'ordonnances écrites et exécutées, qui tombent de 1 577 en 1987 à 1 142 en 1988. Sur le nombre total de contrefaçons, la proportion des ordonnances non exécutées demeure à 20 p. 100 en 1988, essentiellement la même que pendant les années précédentes, comme il est indiqué ci-dessus.

Le nombre des ordonnances contrefaites visant des produits contenant de la codéine et de l'oxycodone a augmenté entre 1984 et 1987, comme le montre la figure 20. En 1988, l'hydrocodone et l'hydromorphone ont connu des augmentations, alors que la codéine et l'oxycodone ont affiché des réductions par rapport à 1987.

## Reported Patients on the Methadone Program

**Figure 21**  
Percentage Distribution by Age Group, 1988

NOTE : Not shown is one patient under 18 years and the six not specified.

In 1988 there were 1267 patients receiving methadone treatment in Canada. Sixty percent of these patients were males. Sixty-eight percent of the 1267 patients resided in British Columbia. Figure 21 shows that the majority of patients were in the 30 - 39 age group.

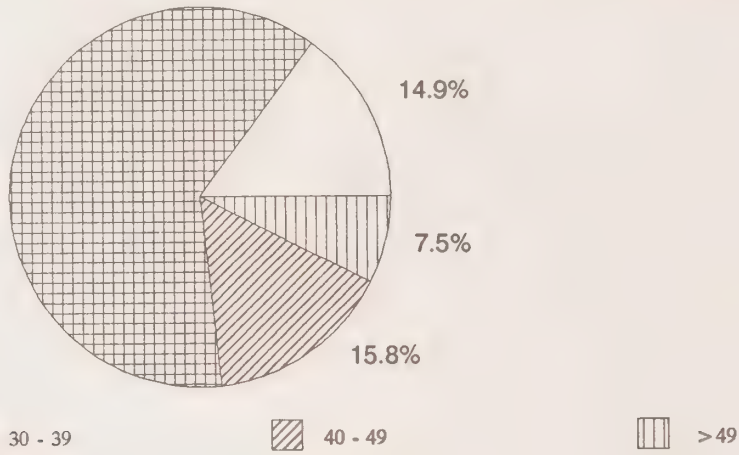

Of the 1267 patients, the date of first treatment with methadone was specified for 998. Of these more than half (55%) first received methadone over ten years ago.

The drug of dependence was specified for 1138 patients. Eighty-three percent mentioned heroin as the drug of dependence prior to methadone treatment.

Where specified 96% of the patients admitted to a history of intravenous drug use, 78% to a history of needle sharing and 78% to a history of illicit activity associated with drug seeking behaviour.

## Personnes déclarées traitées à la méthadone

**Figure 21**  
Répartition en pourcentage selon le groupe d'âge, 1988

NOTA : Ne sont pas incluses les données concernant une personne de moins de dix-huit ans et six personnes dont l'âge n'est pas précisé.

En 1988, 1 267 personnes recevaient un traitement à la méthadone au Canada. Soixante pour cent de ces personnes étaient de sexe masculin. Soixante-huit pour cent des 1 267 personnes traitées résidaient en Colombie-Britannique. La figure 21 montre que la plupart de ces personnes faisaient partie du groupe d'âge des 30 à 39 ans.

La date du premier traitement de ces 1 267 personnes est connue pour 998 d'entre elles. Parmi ce groupe, plus de la moitié (55 p. 100) participent au programme de traitement depuis plus de dix ans.

La drogue responsable de la toxicomanie a été précisée pour 1 138 personnes. Quatre-vingt-trois pour cent ont déclaré être héroïnomanes avant d'entreprendre le traitement à la méthadone.

Parmi les personnes ayant accepté de préciser leur réponse, 86 p. 100 ont admis avoir pris des drogues par voie intraveineuse, 78 p. 100 avoir partagé des aiguilles et 78 p. 100 avoir pratiqué des activités illicites liées à la recherche de drogues.

## **SECTION II**

### **METHADONE TREATMENT STATISTICS**

**Tables 61 - 68**

### **STATISTIQUES SUR LES TRAITEMENTS A LA METHADONE**

**Tableaux 61 - 68**

## Methadone Treatment Statistics

Methadone is a long acting synthetic opioid which can be used in the treatment of persons dependant on heroin or other opioids. The Bureau of Dangerous Drugs authorizes practitioners to prescribe methadone in the treatment of opioid dependant patients. Every practitioner is required to submit information to the Bureau for each patient receiving methadone.

Information concerning identification of the patient is used to monitor for compliance with regulations, while other is used to supplement statistics.

Tables 61 to 68 refer to national results. Data by province not included here for reasons of brevity, may be obtained upon written request, with the exception of Ontario.

It should be noted that 1988 is the first year for which data presented in these tables was entered on the computer.

## Statistiques sur les traitements à la méthadone

La méthadone est un opioïde de synthèse à longue durée d'action que l'on peut utiliser dans le traitement des personnes qui ont une dépendance à l'égard de l'héroïne ou d'autres opioïdes. Le Bureau des drogues dangereuses autorise des médecins à prescrire de la méthadone pour le traitement des narcomanes. C'est pourquoi les médecins doivent communiquer des renseignements au Bureau sur chacun des patients recevant de la méthadone.

Les renseignements concernant l'identification du patient permettent de vérifier le respect de la réglementation, tandis que les autres renseignements viennent compléter les données statistiques.

Les tableaux 61 à 68 présentent des données pour l'ensemble du Canada. Les données par province n'ont pas été incluses pour des raisons de concision, mais on peut se les procurer sur demande, à l'exception de celles concernant l'Ontario.

Il est à signaler que 1988 est la première année pour laquelle les données présentées dans ces tableaux ont été informatisées.

### SECTION III

#### DIVERSION STATISTICS

Tables 69 - 76

#### STATISTIQUES SUR LES DETOURNEMENTS

Tableaux 69 - 76

## Diversion Statistics

For the purpose of these statistics "diversion" is defined as the movement of licit narcotic and controlled drugs from the health care system for non-medical use. It encompasses the following:

- theft in all forms including break and entry, armed robbery, snatch and grab, pilferage;
- unexplained losses;
- losses during transit;
- forged prescriptions;
- verbal misrepresentation

Diversion may occur at any point between the manufacturing or importation of the drug and its utilization by the patient.

The Regulations to the Narcotic Control Act and the Food and Drugs Act stipulate that the loss or theft of a narcotic or controlled drug must be reported to the Minister of Health and Welfare within ten days of discovery. Information is extracted from these reports, compiled and published as a component of the Diversion Statistics. In interpreting tables on the thefts and losses cases by drug involved, it should be noted that most cases (incidents) involve more than one drug.

Reports involving the diversion of narcotic and controlled drugs obtained by means of forged prescriptions and verbal misrepresentation are received from various sources including police agencies, inspection staff with the Bureau of Dangerous Drugs and, on a voluntary basis, from pharmacists.

In order to promote and facilitate the reporting of diversion by prescription forgery and verbal misrepresentation a reporting system has been developed. The basis of the system is a form to be submitted by pharmacists when successful or attempted diversion by these means is identified. The data collected is presented for 1984 to 1988.

## Statistiques sur les détournements

Aux fins des présentes statistiques, le terme "détournement" désigne le mouvement de stupéfiants et de drogues contrôlées licites obtenus par l'intermédiaire du système de santé et destinés à des usages non médicaux. Il englobe:

- le vol sous toutes ses formes, dont le vol par effraction, le vol à main armée, le vol à la sauvette et le chapardage;
- les pertes inexplicables;
- la perte de drogues pendant leur transport;
- les ordonnances contrefaites;
- les déclarations trompeuses.

Il peut y avoir détournement à n'importe quel point entre le moment où le médicament est fabriqué ou importé, et celui où il est utilisé par le patient.

Les règlements respectifs de la Loi sur les stupéfiants et de la Loi des aliments et drogues stipulent que la perte ou le vol d'un stupéfiant ou d'une drogue contrôlée doit être signalé au ministre de la Santé nationale et du Bien-être social dans les dix jours qui suivent la constatation. Les renseignements tirés de ces rapports sont réunis et publiés dans les statistiques sur les détournements. Lors de l'interprétation des tableaux sur les vols et pertes, selon les drogues concernées, il est bon de se rappeler que dans la plupart des cas plus d'une drogue est concernée.

Les rapports ayant trait au détournement de stupéfiants et de drogues contrôlées par fausses ordonnances et déclarations trompeuses proviennent de diverses sources dont les corps de police, les inspecteurs du Bureau des drogues dangereuses et les pharmaciens agissant de leur propre chef.

Un système a été mis au point afin d'encourager et de faciliter la présentation de rapports sur les détournements résultant d'ordonnances contrefaites ou de déclarations trompeuses. Ce système repose sur l'utilisation d'une formule que doivent remplir les pharmaciens témoins d'une tentative (réussie ou ratée) de détournement par ces moyens. Les données ainsi recueillies sont présentées pour les années 1984 à 1988.

## SECTION IV

### DRUG ANALYSIS STATISTICS

Tables 77 -80

### STATISTIQUES SUR LES ANALYSES DE DROGUES

Tableaux 77 -80

### Drug Analysis Statistics

The information contained in the following tables represents workload measurement data regarding the identity and number of drug samples analyzed by regional offices of Bureau of Field Operations (Field Operations Directorate, Health Protection Branch) and Bureau of Drug Research (Drugs Directorate, Health Protection Branch). The drug samples in question are submitted for analysis by police agencies as part of the evidence gathering process in preparation for the prosecution of a drug related charge. Used in conjunction with other data these tables can demonstrate trends in drug misuse and street availability.

### Statistiques sur les analyses de drogues

Les renseignements contenus dans les tableaux suivants représentent des données sur le volume de travail relatif à l'identification et au nombre d'échantillons de drogue analysés par les bureaux régionaux du Bureau des opérations régionales (Direction des opérations régionales, Direction générale de la protection de la santé) et par le Bureau de recherche, Médicaments (Direction des médicaments, Direction générale de la protection de la santé). Les échantillons en question sont soumis pour analyse par des corps de police en prévision de poursuites relatives à une accusation d'infraction aux lois sur les drogues. Utilisées conjointement avec d'autres données, les données de ces tableaux peuvent indiquer certaines tendances en matière de consommation et de disponibilité des drogues.

## Preface

On May 25, 1987, the federal government formally launched the National Drug Strategy, **Action on Drug Abuse**. The overall objective of the strategy is to reduce the harm to individuals, families and communities from psychoactive drugs by adopting a balanced approach that is acceptable to Canadians. Canada's National Drug Strategy aims to reduce demand through prevention and education as it reduces supply through interdiction, enforcement and control. The Department of National Health and Welfare is responsible for overall coordination of the six strategy components identified for simultaneous and coordinated action. One of the six components is information on society's response to the problem of drug abuse and research. The **Narcotic, Controlled and Restricted Drug Statistics** outline the nature, extent and patterns of activities associated with the supply reduction program components of the strategy.

The information provided by this report on a variety of drug-related activities reflects several aspects of the drug strategy. Information on charges and convictions for drug-related criminal offences comprises the first half of the report; it reflects on the extent of enforcement activity and resulting court decisions. The information on the movement of licit drugs from the medical supply market to non-medical use that follows provides an indication of demand for psychoactive pharmaceuticals and the effectiveness of controls. A brief examination of methadone maintenance information provides insights into the demographics of persons undergoing treatment for opioid dependence.

These statistics should be interpreted mainly as indicators of society's response to illicit drug involvement and use in Canada and only indirectly as approximate indicators of the actual drug use. Data for these statistics are retrieved from information systems set up to support program operations and statistical reporting.

## Préface

Le 25 mai 1987, le gouvernement fédéral a officiellement lancé la Stratégie nationale antidrogue : **Action contre les drogues**. L'objectif global de cette stratégie est d'atténuer le préjudice causé aux personnes, aux familles et aux collectivités par l'abus de psychotropes grâce à une approche sensée qui soit acceptable pour les Canadiens. La Stratégie nationale antidrogue du Canada vise une réduction de la demande, par la prévention et la sensibilisation, ainsi qu'une réduction de l'offre, par l'application de la loi et la surveillance. Le Ministère de la Santé nationale et du Bien-être social voit à l'organisation globale des six composantes de la stratégie, qui ont été déterminées en vue d'une action simultanée et coordonnée. L'une de ces composantes est l'information et la recherche. La réaction de la société en ce qui a trait au problème de l'abus de drogues doit en effet constituer un élément important de la stratégie. Les **Statistiques concernant les stupéfiants, les drogues contrôlées et les drogues d'usage restreint** donnent une idée de la nature, de l'étendue et de l'évolution des activités associées aux composantes relatives à la réduction de l'offre dans la stratégie.

Dans le présent rapport, les informations sur les activités liées aux drogues reflètent plusieurs des aspects de la Stratégie antidrogue. La première moitié du rapport englobe les informations portant sur les accusations et les condamnations qui concernent les infractions liées aux drogues. Elle témoigne de la mesure dans laquelle la loi est appliquée et des jugements qui en découlent. Suivent des informations relatives à l'usage frauduleux de drogues licites de sources médicales, indications de la demande de psychotropes et de l'efficacité de la surveillance. Un bref examen des renseignements sur le traitement à la méthadone donne un aperçu des caractéristiques démographiques des personnes qui sont traitées en raison d'une dépendance à l'égard des opioïdes.

Ces statistiques devraient être interprétées comme des indicateurs de la réaction de la société face à l'utilisation de drogues illicites au Canada et comme des indicateurs approximatifs et indirects seulement de l'utilisation réelle des drogues. Les données sont extraites de systèmes d'information qui viennent étayer les opérations des programmes.

## Acknowledgements

The Bureau of Dangerous Drugs (BDD) compiles data from case reports received from law enforcement agencies, health professionals and BDD Inspectors. Data are also received at the aggregate level from the Bureau of Drug Research of the Drugs Directorate and Field Operations Directorate of the Health Protection Branch, Health and Welfare Canada.

We gratefully wish to acknowledge the cooperation of the previously mentioned parties, who on a consistent and timely basis submit completed case reports and whose contributions made this publication possible.

We also wish to thank all those parties who have reviewed and commented on the preliminary drafts prepared by the Chief, Information Services Division.

Comments are requested, particularly on the aspects that the readership would like to see addressed in this report. Information and comments on this report may be addressed to:

## Remerciements

Le Bureau des drogues dangereuses (BDD) réunit des données à partir des fiches d'observation soumises par les autorités policières, les professionnels de la santé et par ses propres inspecteurs. Des données globales proviennent également du Bureau de recherche sur les médicaments, Direction des médicaments, et de la Direction des opérations régionales, Direction générale de la protection de la santé, Santé et Bien-être social Canada.

Nous tenons à remercier sincèrement les collaborateurs précités qui ont soumis, de manière constante et opportune, des fiches d'observation dûment remplies et qui, par leur contribution, ont permis la publication du présent rapport.

Nous aimerions également remercier tous ceux qui ont fourni un appui technique et qui ont vérifié et commenté les versions préliminaires préparées par le Chef de la Division des services d'information.

Nous aimerions recevoir vos commentaires, particulièrement ceux qui concernent les points dont vous aimeriez que nous parlions dans le présent rapport. Les informations et les commentaires peuvent être envoyés à l'adresse suivante :

## List of Figures

1. Total Number of Charges and Convictions under All Federal Drug Legislation, Canada, 1980-1989
2. Distribution of Convictions by Federal Drug Legislation, Canada, 1980 and 1989
3. Distribution of Sentences under All Federal Drug Legislation, Canada, 1980-1989
4. Distribution of Sentences under All Federal Drug Legislation, the Provinces, 1989
5. Rate per 100,000 Population for Convictions, Canada and the Provinces/Territories, 1980 and 1989
6. Total Convictions for Possession, Trafficking and Multiple Doctoring Drug Offences, Canada, 1980-1989
7. Percentage Distribution of Drug Offences, by Sentence, Canada, 1989
8. Rate per 100,000 Population for Drug Offence Convictions, Canada and the Provinces/Territories, 1989
9. Total Convictions by Type of Drug, Canada, 1980-1989
10. Convictions for Heroin Offences, Canada, 1980-1989
11. Convictions for Cocaine Offences, Canada, 1980-1989
12. Convictions for Cocaine Offences by Sentence, Canada, 1989
13. Offence Convictions for Hallucinogen Drug Offences, Canada, 1980-1989
14. Total Convictions for Selected Hallucinogens and Methamphetamine, Canada, 1980-1989
15. Convictions for Pharmaceutical Drug Offences, Canada, 1980-1989
16. Total Convictions for Selected Pharmaceuticals, Canada, 1980-1989
17. Rate per 100,000 Population of Convictions by Type of Drug, Canada and the Provinces/Territories, 1989
18. Distribution of Cocaine Convictions, by Offence, Canada and the Provinces, 1989

## Liste des figures

1. Nombre total d'accusations et de condamnations en vertu de toutes les lois fédérales relatives aux drogues, Canada, 1980-1989
2. Répartition des condamnations selon les lois fédérales relatives aux drogues, Canada, en 1980 et en 1989
3. Répartition des peines en vertu de toutes les lois fédérales relatives aux drogues, Canada, 1980-1989
4. Répartition des condamnations en vertu de toutes les lois fédérales relatives aux drogues, provinces, 1989
5. Taux de condamnations pour 100 000 habitants, Canada, provinces et territoires, en 1980 et en 1989
6. Nombre total de condamnations pour possession, trafic et consultations médicales multiples, Canada, 1980-1989
7. Répartition en pourcentage des infractions liées aux drogues selon les peines, Canada, 1989
8. Taux de condamnations liées aux drogues pour 100 000 habitants, Canada, provinces et territoires, 1989
9. Nombre total de condamnations pour chaque catégorie de drogue, Canada, 1980-1989
10. Nombre de condamnations liées à l'héroïne, Canada, 1980-1989
11. Nombre de condamnations liées à la cocaïne, Canada, 1980-1989
12. Nombre de condamnations liées à la cocaïne, selon les peines, Canada, 1989
13. Nombre de condamnations liées aux hallucinogènes, 1980-1989
14. Nombre total de condamnations liées à certains hallucinogènes et à la méthamphétamine, 1980-1989
15. Nombre de condamnations liées aux médicaments, Canada, 1980-1989
16. Nombre total de condamnations liées à certains médicaments, Canada, 1980-1989
17. Taux de condamnations par catégorie de drogue pour 100 000 habitants, Canada, provinces et territoires, 1989
18. Répartition des condamnations liées à la cocaïne, selon les infractions, Canada et provinces, 1989

19. Distribution of Cocaine Convictions, by Sentence, Canada and the Provinces/Territories, 1989
20. Rate per 500,000 Population of Convictions for Selected Pharmaceuticals, Canada and the Provinces/Territories, 1989
21. Total Convictions by Age Groups, Canada, 1980-1989
22. Percentage Distribution of Drug Offences by Age Groups, Canada, 1989
23. Number of Convictions by Age Group for Heroin, Cocaine, Pharmaceuticals and Hallucinogens, Canada, 1980-1989
24. Average Age Distribution of Persons Convicted by Type of Drug, Canada, 1980-1989
25. Percentage Distribution of Convictions by Sex, for Selected Drugs, Canada, 1980-1989
26. Total Cases of Theft and Other Losses, Canada, 1980-1989
27. Number of Thefts and Losses Involving Selected Drugs, Canada, 1980-1989
28. Rate per 500,000 Population of Theft and Losses Cases, Canada and the Provinces, 1989
29. Rate per 500,000 Population of Thefts and Losses for Selected Opioids, Canada and the Provinces, 1989
30. Total Cases of Prescription Forgeries, Canada, 1984-1989
31. Total Cases of Prescription Forgeries for Selected Drugs, Canada, 1984-1989
32. Rate per 500,000 Population of Prescription Forgeries, Canada and the Provinces, 1989
33. Total Number of Methadone Maintenance Cases, Canada and the Provinces, 1988 and 1989
34. Distribution of Methadone Maintenance Cases by Age Group and Sex, Canada, 1989
35. Percentage Distribution in Years of Treatment and by Sex, Canada, 1989
36. Distribution by Duration of Dependence Prior to Treatment and by Sex, Canada, 1989
19. Répartition des condamnations liées à la cocaïne, selon les peines, Canada, provinces et territoires, 1989
20. Taux de condamnations pour 500 000 habitants pour certains médicaments d'ordonnance, Canada, provinces et territoires, 1989
21. Nombre total de condamnations selon les groupes d'âge, Canada, 1980-1989
22. Répartition en pourcentage des condamnations liées aux drogues selon le groupe d'âge, Canada, 1989
23. Nombre de condamnations selon le groupe d'âge pour l'héroïne, la cocaïne, les médicaments et les hallucinogènes, Canada, 1980-1989
24. Répartition selon la moyenne d'âge des personnes condamnées pour chaque catégorie de drogue, Canada, 1980-1989
25. Répartition en pourcentage des condamnations liées à certaines drogues, selon le sexe, Canada, 1980-1989
26. Nombre total de vols et d'autres pertes, Canada, 1980-1989
27. Nombre de vols et pertes concernant certaines drogues, Canada, 1980-1989
28. Taux pour 500 000 habitants de vols et pertes, Canada et provinces, 1989
29. Taux pour 500 000 habitants de vols et pertes pour certains opioïdes, Canada et provinces, 1989
30. Nombre total de contrefaçons d'ordonnance, Canada, 1984-1989
31. Nombre total de contrefaçons d'ordonnance pour certaines drogues, Canada, 1984-1989
32. Taux pour 500 000 habitants de contrefaçons d'ordonnance, Canada et provinces, 1989
33. Nombre total de personnes traitées à la méthadone, Canada et provinces, en 1988 et en 1989
34. Répartition des personnes traitées à la méthadone, selon l'âge et le sexe, Canada, 1989
35. Répartition selon la durée de traitement et le sexe, Canada, 1989
36. Répartition selon la durée de la dépendance avant le traitement, selon le sexe, Canada, 1989

## Liste des tableaux

1. Nombre total d'accusations et de condamnations -- vol, pertes et contrefaçons d'ordonnance, Canada, 1980-1989
2. Répartition des peines imposées en vertu de toutes les lois fédérales relatives aux drogues, Canada, 1980-1989
3. Répartition des peines imposées en vertu de toutes les lois fédérales relatives aux drogues, Canada, provinces et territoires, 1989
4. Nombre de condamnations pour les infractions relatives aux drogues, Canada, 1980-1989
5. Taux pour 100 000 habitants de condamnations pour des infractions relatives aux drogues, Canada, provinces et territoires, 1989
6. Nombre de condamnations selon la catégorie de drogue, Canada, 1980-1989
7. Nombre de peines selon la catégorie de drogue, Canada, 1989
8. Nombre d'accusations et de condamnations liées au *crack* et à la cocaïne, selon l'article, la province, l'infraction et l'âge, Canada, 1989
9. Répartition des condamnations liées à la cocaïne, selon la peine, Canada, provinces et territoires, 1989
10. Nombre de condamnations pour des infractions relatives aux drogues, selon les groupes d'âge, Canada, 1980-1989
11. Nombre de condamnations selon les groupes d'âge et la catégorie de drogue, Canada, 1980-1989
12. Nombre de condamnations, selon le groupe d'âge, le sexe et la catégorie de drogue, Canada, 1980-1989
13. Nombre de vols et autres pertes concernant certains médicaments, Canada, 1980-1989
14. Taux pour 100 000 habitants de vols et autres pertes, Canada et provinces, en 1980 et en 1989
15. Taux pour 500 000 habitants de vols et autres pertes concernant certains médicaments, Canada et provinces, 1989
16. Taux pour 500 000 habitants de contrefaçons d'ordonnance, Canada et provinces, 1989

## Highlights

### Introduction

Two changes of note have occurred with the 1989 Narcotic, Controlled and Restricted Drug Statistics Report. First, the data collection and analysis section has been defined and expanded further to include more graphics and has been published separately from the data tables. Second, in this Analysis Report, 1989 figures have been estimated, based on the traditional consistent lag observed in previous years between preliminary and final data. This lag is caused primarily by late receipt of data from the various reporting sources.

### Disposition of Charges and Convictions

Both charges and convictions reported under all federal drug legislation (excluding cannabis) have more than doubled in numbers and rate per population since 1980, due largely to a substantial increase in cocaine offences. Based on the estimated figures there were approximately 15,600 drug charges and 11,600 convictions (excluding cannabis) in 1989. The proportion of convicted to charged has increased from two-thirds to approximately three-quarters in this time. The increase in rate of convictions has been especially pronounced in British Columbia and Quebec, although all provinces and territories showed some increase.

Over a third of convictions have resulted in fines, half in custodial sentences and the remainder in suspended sentences, probation or discharges. Custodial sentences were more pronounced in Saskatchewan and Ontario, and fines were more pronounced in Quebec and British Columbia.

### Drug Offences

Of the four major categories of drug offences – possession, trafficking, multiple doctoring and importation – possession accounted for 51%, trafficking for 41%, multiple doctoring (for prescription drugs) for 7% and importation for less than 1% of convictions. Conviction rates for these categories were geographically dependent: British Columbia had the highest rate for possession, Quebec had the highest rate for trafficking and the Prairie provinces had the highest rate for multiple doctoring.

## Points importants

### Introduction

Pour 1989, le Rapport sur les statistiques concernant les stupéfiants, les drogues contrôlées et les drogues d'usage restreint a subi deux modifications notables. D'abord, la collecte et l'analyse des données ont été définies avec plus de précision et élargies afin d'inclure davantage de graphiques; elles font maintenant l'objet d'une rubrique distincte des tableaux. Ensuite, dans le Rapport d'analyse, on a estimé les chiffres pour 1989 en se fondant sur l'écart habituellement observé entre les valeurs préliminaires et définitives des années précédentes. L'arrivée tardive des données provenant des diverses sources en est principalement la cause.

### Aboutissement des accusations et des condamnations

Depuis 1980, le nombre et le taux d'accusations et de condamnations enregistrés par population, conformément à toutes les lois fédérales relatives aux drogues (à l'exception du cannabis), ont plus que doublé; cette hausse est largement imputable à l'augmentation importante du nombre d'infractions liées à la cocaïne. Selon les estimations, en 1989, il y a eu approximativement 15 600 accusations et 11 600 condamnations liées aux drogues (à l'exception du cannabis). Pendant cette période, le nombre de condamnations par rapport aux seules mises en accusation s'est accru (de deux tiers à environ trois quarts). Cet accroissement du taux de condamnations a été particulièrement marqué en Colombie-Britannique et au Québec, même si toutes les provinces et les territoires ont connu une certaine augmentation à ce point de vue.

Plus d'un tiers des condamnations ont entraîné des amendes, la moitié, des peines de détention, et le reste, des sursis de peine, des probation ou des acquittements. Il y avait plus de peines de détention en Saskatchewan et en Ontario et, plus d'amendes, au Québec et en Colombie-Britannique.

### Infractions liées aux drogues

Les quatre principales catégories d'infractions liées aux drogues qui ont entraîné des condamnations sont la possession (51 %), le trafic (41 %), les consultations médicales multiples pour des médicaments d'ordonnance (7 %) et l'importation (moins de 1 %). Les taux de condamnations pour ces catégories varient selon les régions; ainsi, les taux les plus élevés pour la possession sont relevés en Colombie-Britannique, pour le trafic, au Québec, et pour les consultations multiples, dans les Prairies.

Sentences for drug convictions varied according to the type of offence. For possession, the majority (72%) of convictions resulted in fines or other non-custodial sentences (or discharge), and of the 28% remaining, over half were custodial sentences of less than one month. In contrast, for trafficking, only 21% of convictions resulted in fines or other non-custodial sentences, and of the remaining 79%, more than half were custodial sentences of six months or more.

### ***Convictions by Type of Drug***

In the past decade, cocaine offences have increased dramatically; the number of convictions has risen nearly tenfold. In 1989, about 70% of all drug offences (excluding cannabis) were cocaine related. Consistently over these years slightly more than half of the cocaine convictions have been for simple possession. Of persons convicted for cocaine possession in 1989, slightly less than one-third received short-term custodial sentences. In contrast, about four-fifths received custodial sentences for cocaine trafficking and more than half received a term of six months or more. Cocaine conviction rates were very dependent on geographical location, with particularly high rates (relative to other drugs) in British Columbia, Ontario and Quebec.

Convictions for heroin have remained constant over the past decade, accounting for about 3% of the total convictions in recent years. Among drugs, sentences for heroin offences were highest in severity of penalties: the average term length of custodial sentences was longer than for either cocaine or hallucinogens. British Columbia had the highest rate of convictions for heroin.

Total convictions for hallucinogen offences declined over the past 10 years, due primarily to a fourfold drop in convictions for LSD from a 1981 high of approximately 2,200. The Prairie provinces had the highest rate of convictions for hallucinogenic drugs, although Quebec accounted for most of the phencyclidine convictions in 1989.

Pharmaceutical convictions, the majority of which were for multiple doctoring offences, increased somewhat by 1987 but appeared to be declining once again. Nearly 90% of convictions were for opioid pharmaceuticals. Of the opioids, the predominant drugs involved were codeine, pentazocine and oxycodone; methylphenidate was the most predominant of the stimulants and hypnotics. Among

Les peines varient selon le genre d'infraction. La plupart des condamnations pour possession (72 %) ont donné lieu à des amendes ou à d'autres peines n'entraînant pas de détention (ou encore un acquittement); plus de la moitié des autres condamnations (28 %) ont entraîné des peines de détention de moins d'un mois. Par contraste, seulement 21 % des condamnations pour trafic se sont traduites par des amendes ou d'autres peines n'entraînant pas de détention et du reste des peines soit 79% plus de la moitié sont peines de détention de six mois ou plus.

### ***Nombre de condamnations selon la catégorie de drogue***

Au cours de la dernière décennie, le nombre d'infractions liées à la cocaïne s'est considérablement accru, et le nombre de condamnations a presque décuplé. En 1989, environ 70 % de toutes les infractions liées à la drogue (à l'exception du cannabis) concernaient la cocaïne. Pendant ces années, la simple possession a représenté de façon constante un peu plus de la moitié des condamnations liées à la cocaïne. En 1989, un peu moins du tiers des condamnations pour possession de cocaïne ont entraîné une peine de détention de courte durée. Par contraste, près des quatre cinquièmes des condamnations pour trafic de cocaïne ont donné lieu à des peines de détention dont plus de la moitié étaient de six mois ou plus. Les taux de condamnations liées à la cocaïne varient considérablement selon les régions; ils sont particulièrement élevés (par comparaison aux autres drogues) en Colombie-Britannique, en Ontario et au Québec.

Le nombre de condamnations liées à l'héroïne est demeuré assez stable au cours de la dernière décennie. Depuis quelques années, il compte pour environ 3 % du nombre total de condamnations. La durée moyenne de détention est la plus importante dans le cas de l'héroïne; elle est en effet plus longue que dans le cas de la cocaïne ou des hallucinogènes. Dans le cas de l'héroïne, le taux de condamnations le plus élevé est celui de la Colombie-Britannique.

Le nombre de condamnations liées aux hallucinogènes a diminué depuis dix ans, principalement en raison de la chute du nombre de condamnations associées au LSD, qui est quatre fois inférieur au sommet atteint en 1981 (environ 2 200 condamnations). Le plus haut taux de condamnations liées aux hallucinogènes a été relevé dans les Prairies, même si, en 1989, c'est au Québec qu'on a prononcé la plupart des condamnations associées à la phencyclidine.

Les condamnations liées aux médicaments, dont la plupart étaient attribuables à l'obtention d'ordonnances multiples, se sont accrues jusqu'en 1987, mais elles semblent encore une fois diminuer. Près de 90 % de ces condamnations sont liées à des opioïdes. Les principaux médicaments en jeu sont la codéine, la pentazocine et l'oxycodone (opioïdes) ainsi que le méthylphénidate (stimulants et sédatifs). La durée moyenne de détention est la moins importante dans le cas des

drugs, pharmaceuticals had the lowest severity of penalties; the average length of custodial sentences was shortest and the proportion of suspended sentences, probation and discharges was highest. Pharmaceutical drug conviction rates were highest (higher than cocaine) in the Western provinces, low in Ontario and the Atlantic provinces, and virtually non-existent in Quebec.

### ***Drug Convictions by Age and Sex***

In 1989, persons under 20 years and over 39 years of age accounted in total for less than 20% of all drug convictions. Half of the convictions occurred in the 20 to 29 year age group. Over the past 10 years the number of convictions declined, but they have remained relatively stable since the mid-1980's for persons under 20 years of age, become less pronounced in increases for persons 20 to 29 years of age, and more pronounced for those 30 to 39 years of age. The average age at conviction for cocaine has risen from 26 in 1980 to 29 in 1989. In contrast, the average age at conviction in 1989 was 32 years for heroin and 35 years for pharmaceuticals. Among drugs, persons convicted for hallucinogens were the youngest, at 24 years of age.

Over the past 10 years, women have consistently accounted for less than 20% of all drug convictions. For the apparent second drug of choice (cannabis first), cocaine, men accounted for nearly 90% of convictions. In contrast, for pharmaceutical drugs, women accounted for nearly a third of convictions. For the past several years, the average age at conviction for women has remained about two years younger than for men for cocaine and about one year younger for pharmaceuticals.

### ***Diversion of Pharmaceuticals through Thefts and Losses***

In 1989, slightly more than an estimated 1,200 reported cases of drug diversion were due to theft and other losses such as break and entry, pilferage and losses in transit. Since 1980, the number of reported cases decreased, due primarily to a decline in reports of thefts through break and entry (by about half), but this was offset in part by increases in reports of pilferage and loss unexplained. During the past decade, the total number of cases of diversion from pharmacies declined; however, this was partially offset by increases in reports of loss from hospitals and licensed dealers.

médicaments. La proportion des sursis de peine, des probations et des acquittements est très élevée. Les taux de condamnations liées aux médicaments sont les plus élevés (plus que dans le cas de la cocaïne) dans les provinces de l'Ouest, les plus faibles, en Ontario et dans les provinces de l'Atlantique, et presque nuls, au Québec.

### ***Nombre de condamnations liées aux drogues selon l'âge et le sexe***

En 1989 moins de 20 % de toutes les condamnations liées aux drogues concernent des personnes de moins de 20 ans et de plus de 39 ans. La moitié sont associées aux personnes de 20 à 29 ans. Au cours de la dernière décennie, le nombre de condamnations a diminué, mais il est demeuré relativement stable depuis le milieu des années 80 pour les personnes de moins de 20 ans; son accroissement a été moins marqué pour les personnes de 20 à 29 ans, mais plus important pour celles qui avaient entre 30 et 39 ans. L'âge moyen enregistré au moment d'une condamnation liée à la cocaïne est passé de 26 ans, en 1980, à 29 ans, en 1989. Par contraste, en 1989 toujours, la même donnée s'établissait à 32 ans, dans le cas de l'héroïne, et à 35 ans, dans le cas des médicaments. Quant aux hallucinogènes, l'âge moyen au moment de la condamnation était le moins élevé, soit 24 ans.

De façon constante depuis dix ans, les femmes comptent pour moins de 20 % de toutes les condamnations liées aux drogues. Près de 90 % des condamnations liées à la cocaïne, qui semble se trouver au secondrang des drogues les plus utilisées (cannabis vientau premierang), sont associées aux hommes. Par contre, près d'un tiers des condamnations liées aux médicaments impliquent des femmes. Depuis plusieurs années, l'âge moyen des femmes au moment d'une condamnation est moins élevé pour ce qui est de la cocaïne (environ 2 ans) et des médicaments (environ un an).

### ***Détournement de médicaments : vols et pertes***

On estime qu'il y a eu en 1989 un peu plus de 1 200 cas signalés de détournement de drogue par vols et autres pertes : infractions, chapardage et pertes en cours de transport, etc. Depuis 1980, le nombre de cas a diminué, principalement parce moins de vols par effraction ont été signalés (environ la moitié); en revanche, les cas de chapardage et pertes inexplicables ont été relevés en plus grands nombres. Le nombre total de cas de détournement dans les pharmacies a diminué au cours de la dernière décennie, mais il y a eu un accroissement du nombre de pertes dans les hôpitaux et chez les distributeurs autorisés.

Break and entry and armed robbery were the two highest modes of diversion from pharmacies. Pilferage and loss unexplained accounted for most of the diversion from hospitals. Losses in transit and loss unexplained were the two highest modes for licensed dealers. In 1989, opioid drugs, such as codeine, oxycodone and hydrocodone, were in demand in the majority (80%) of theft and losses cases, while stimulants and hypnotics accounted for the remainder.

### ***Diversion of Prescription Drugs through Forged Prescriptions***

The number of cases of detected and reported prescription forgeries has increased over the past six years, to a 1989 estimated total of about 2,260 (1,306 in 1984). The majority of these cases involved written forgeries. Only about one-fifth of reported cases involved written, verbal or altered forgeries that were attempted but not filled. Ontario, Manitoba and Quebec had the highest rate of cases; the Atlantic provinces had the lowest. As in convictions and theft and losses cases, the drugs frequently involved historically and in 1989 were opioids such as codeine, oxycodone, hydrocodone and pentazocine.

### ***Methadone Maintenance***

In 1989, the total number of patients who received methadone increased over 1988 by 192 to a year-end total of 1,459. Roughly two-thirds of these patients were men. The majority of all patients were in the 30 to 39 year age group, and for four-fifths of all patients the drug of dependence before methadone treatment was heroin. In 1989, as in previous year, most (72%) of methadone patients resided in British Columbia, the province with the highest rate of heroin convictions.

Les vols par effraction et vols à main armée constituent les deux principales méthodes de détournement dans les pharmacies. Dans les hôpitaux, ce sont le chapardage et les «pertes inexpliquées», et chez les distributeurs autorisés, ce sont les pertes en cours de transport et les pertes inexpliquées. En 1989, les opioïdes, comme la codéine, l'oxycodone et l'hydrocodone, étaient à l'origine de la majorité (80 %) des cas de vols et de pertes, alors que les stimulants et les hypnotiques l'étaient dans les 20 % qui restaient.

### ***Détournement de médicaments d'ordonnance au moyen de contrefaçons***

Depuis six ans, le nombre de cas de détournement décelés et déclarés s'est accru pour atteindre environ 2 260 cas, en 1989 (1 306 en 1984). Les contrefaçons d'ordonnance représentaient la majorité de ces cas. Environ un cinquième des cas signalés seulement concernait de fausses ordonnances non exécutées - écrites, verbales ou modifiées. Les taux les plus élevés étaient ceux de l'Ontario, du Manitoba et du Québec, et les plus faibles, ceux des provinces de l'Atlantique. Comme c'était le cas pour les condamnations et les vols et pertes, en 1989 tout comme auparavant, les principales drogues en jeu étaient les opioïdes comme la codéine, l'oxycodone, l'hydrocodone et la pentazocine.

### ***Traitement d'entretien par la méthadone***

En 1989, 1 459 personnes ont reçu un traitement à la méthadone (compte de fin d'année - 192 de plus par rapport 1988). Environ deux tiers de ces personnes étaient des hommes. La plupart des personnes traitées étaient âgées de 30 à 39 ans, et les quatre cinquièmes présentaient une dépendance à l'héroïne avant le traitement. En 1989, tout comme l'année précédente, la majorité des personnes traitées (72 %) résidait en Colombie-Britannique, province où le taux de condamnations liées à l'héroïne est le plus élevé.

## ***INTRODUCTION***

## ***INTRODUCTION***

## Background

The Narcotic, Controlled and Restricted Drug Statistics have been produced by the Bureau of Dangerous Drugs (BDD) under various formats and titles since the 1940's. The data sources for these **operational-based statistics** were usually case reports, the information from which was required for program operations. The content, method of processing, presentation and format of data have undergone changes over the years, most recently for the 1980 calendar year report.

The 1980 report included extensive revisions of detail in the legal offence tabulations, introduction of five-year data and the update of data for preceding years. To process more of the reports received after the calendar year and to increase the degree of coverage, the **cutoff** date for statistical processing was extended by three months, from the end of March to the end of June.

Except for changes to the content of the report, the method of processing, format and detailed presentation of data has remained essentially unchanged since the 1980 report. The changes to content were as follows:

- (i) The analysis sections have been expanded to include graphic presentation and ten-year trends starting with the 1987 report.
- (ii) Cannabis statistics on the disposition of charges and convictions have not been compiled since the 1985 reporting period due to the high volume of data and economic restraint measures. Other related indicators on cannabis drug offences can be obtained from the Canadian Centre for Justice Statistics, Statistics Canada and by referring to Drug Analysis Statistics (Appendix C).
- (iii) Statistics on known drug users have low reliability. They have been excluded from the main body of the report and replaced with the Methadone Maintenance Statistics. User statistics can be obtained upon request.

A major change to the 1989 Narcotic, Controlled and Restricted Drug Statistics is the publication of two separate reports. The **Analysis Report** was created by providing further insights in the analysis of data available in tables. This report replaces the analysis section of the previous report. Five-year data, previously presented in tables, are being distributed to current clients or upon request under a separate cover, subtitled **Tables Report**.

## Généralités

Depuis les années 40, les Statistiques concernant les stupéfiants, les drogues contrôlées et les drogues d'usage restreint ont été produites par le BDD sous des formes et des titres différents. Pour établir ces **statistiques fondées sur les opérations**, on recueillait habituellement des données provenant de fiches d'observation, dont l'information était nécessaire à la prestation des programmes. Au cours des années, le contenu, la méthode de traitement, la présentation et la disposition des données ont subi certains changements, le plus récemment en 1980.

Dans le rapport de 1980, on retrouvait en effet des révisions détaillées de la mise en ordre des données concernant les infractions, l'introduction de données calculées pour une période de cinq ans ainsi qu'une mise à jour des données des années précédentes. Afin de pouvoir traiter un plus grand nombre de fiches reçues après l'année civile en cours et d'élargir la portée des données, on a reporté la **date limite** de traitement des statistiques de trois mois, soit de la fin de mars à la fin de juin.

À l'exception des changements suivants, la méthode de traitement, la forme et la présentation détaillées des données n'ont pas été modifiées depuis le rapport de 1980. Voici les quelques changements qui ont été apportés au contenu :

- (i) des graphiques et des tendances concernant une période de dix ans ont été ajoutés aux sections des analyses (depuis 1987);
- (ii) depuis le rapport de 1985, dans le cas du cannabis, les statistiques concernant l'aboutissement des accusations et des condamnations n'ont pas été établies en raison du volume important de données reçues et de mesures de restriction financière. On peut obtenir d'autres indicateurs des infractions liées au cannabis par l'entremise du Centre canadien de la statistique judiciaire (Statistique Canada) et en se reportant à la section Statistiques sur les analyses de drogues dans le présent rapport (annexe C); et
- (iii) comme les statistiques relatives aux consommateurs de drogue reconnus sont peu fiables, elles ont été exclues de la partie principale du rapport et remplacées par les statistiques concernant les traitements d'entretien par la méthadone. Les statistiques concernant les consommateurs de drogue reconnus peuvent être obtenues sur demande.

Les Statistiques pour 1989 concernant les stupéfiants, les drogues contrôlées et les drogues d'usage restreint font l'objet d'une importante modification : elles sont publiées dans deux rapports distincts. On a mis au point le **Rapport d'analyse** en analysant plus en détail les données retrouvées dans les tableaux. Ce rapport remplace la section d'analyse du rapport précédent. Les données concernant une période de cinq ans, qui étaient présentées auparavant sous forme de tableaux, sont maintenant distribuées aux clients courants ou sur demande, sous pli séparé. Il s'agit du **Rapport sur les tableaux**.

## Report Contents and Data Sources

Throughout this report an attempt has been made to analyse the statistics from a "top-down" approach (from summary to more detailed distributions). Analysis is reported by different categories of legislation, drug offences or illicit activities, type of drug, geographical distribution, age groups and sex. The reader is referred to figure titles and to **highlighted text** that is attributed to subtitles in the Table of Contents. The referenced figures and tables provide further details on annual distribution and ten-year distribution and trends. The interpretation of figures and data available in tables at the higher aggregate level and in the few cases of data available in detail are in the **Tables Report**. Further limited analysis and interpretation on factors that influence results are provided within the context of the relationships between data sets and subject matter of data. No attempt has been made to explain other sources and the multitude of other influential factors.

The report is divided into four sections. The following is a summary description of each section (see Appendix A for more details).

Section one, **Legal Statistics**, contains information on disposition of **charges** and the resulting **convictions** under the narcotic, controlled and restricted drug legislation. Data for this section were extracted from the Drug Offence and Disposition Reports (HPB 3515), submitted to BDD by all enforcement agencies in Canada. All enforcement agencies are required to submit these reports in order that the Minister of National Health and Welfare can fulfil departmental responsibilities in the disposition of drugs and assets seized and in the provision of related support to enforcement and judicial programs.

Drug Analysis Statistics, included in Appendix C of this report, provides further related indicators on enforcement activity and street availability of drugs. The compiled reports on the number of drug samples analysed at the request of enforcement agencies for evidence-gathering purposes are submitted to BDD by Field Operations Directorate and the Bureau of Drug Research of Health and Welfare Canada.

The second and third sections contain information on the **diversion** of licit narcotic and controlled drugs from the health care system for non-medical use. The Diversion of Pharmaceutical Drugs through **Thefts and Other Losses** statistics section contains information on thefts in the forms of break and entry, armed robbery, snatch and grab, pilferage and those losses that were not explained and

## Contenu du rapport et sources des données

Dans le présent rapport, on a tenté d'analyser les statistiques selon une approche «descendante» (des répartitions sommaire à des répartitions plus détaillées) et, par différentes catégories de lois, d'infractions liées aux drogues ou d'activités illicites, selon la catégorie de drogue, la région, l'âge et le sexe. Le lecteur est prié de se référer aux titres de tableaux et au **texte surligné** qui correspondent aux sous-titres de la table des matières. Les tableaux et les graphiques designés comme référence fournissent de plus amples renseignements. Le lecteur doit se reporter aux figures et aux tableaux faisant état de la répartition sur un an ainsi que de la répartition et des tendances pour dix ans. L'interprétation des figures et des données globales retrouvées dans les tableaux et, dans quelques cas seulement, des données plus détaillées se trouvent dans le **Rapport sur les tableaux**. On présente également d'autres analyses et interprétations des facteurs qui influent sur les résultats à la lumière des relations entre les ensembles de données et leur contenu. On n'a pas tenté d'expliquer quelles étaient les nombreuses autres sources et les autres facteurs d'importance.

Le présent rapport est divisé en quatre sections. Voici une brève description de chacune d'entre elles (voir l'annexe A pour obtenir plus de détails).

La première section, **Statistiques judiciaires**, renferme des informations sur le résultat des **accusations** et les **peines** imposées selon les lois concernant les stupéfiants, les drogues contrôlées et les drogues d'usage restreint. Les données de cette section sont tirées des rapports sur les infractions liées aux drogues et le règlement des cas (HPB 3515), soumis au BDD par toutes les autorités policières du Canada. Toutes les autorités policières doivent présenter ce rapport pour que le ministre de la Santé nationale et du Bien-être social puisse s'acquitter des responsabilités de son ministère pour ce qui est de disposer des drogues et des biens saisis et d'appuyer les programmes judiciaires et d'application de la loi.

Les Statistiques concernant les analyses de drogues (annexe C) fournissent d'autres indicateurs de l'application de la loi et des drogues offertes dans la rue. Les rapports compilés sur le nombre d'échantillons de drogues analysés à la demande des autorités policières en prévision de poursuites en justice sont soumis au BDD par la Direction des opérations régionales et le Bureau de recherche sur les médicaments de Santé et Bien-être social Canada.

Les deuxième et troisième sections renferment des informations sur les stupéfiants et les drogues contrôlées licites **détournés** du réseau médico-hospitalier à des fins non médicales. La section portant sur le détournement des médicaments par **vols et autres pertes** renferme des données sur les vols, soit les effractions, les vols à main armée, les vols à la sauvette, le chapardage, les pertes inexpliquées et les pertes au cours du transport.

losses that occurred during transit of drugs. As required, and stipulated in the regulations of drug legislation, the Narcotic and Controlled Drug Loss and Theft Reports are submitted to BDD by health professionals and bureau inspectors.

The third section, **Diversification of Prescription Drugs through Forged Prescriptions**, contains information on written, altered and verbal forged prescriptions and whether they were filled or not. Data for this section were extracted from the Forgery Reports received from pharmacists, bureau inspectors and police forces.

The fourth section, **Methadone Maintenance Statistics**, contains information on the use of methadone in the management of opioid dependence in Canada. Data for this section of the report were extracted from Patient Information Forms which are required by physicians obtaining authorization for methadone treatment.

## Limitations of Data

### Late Reporting

In interpreting the data it must be remembered that the data received in the calendar year are preliminary and are subject to revision after the date of first publication. In subsequent years these data are revised to reflect the latest information available. Differences between currently available data and final data have decreased slightly over the years for charges (to 19% for 1986-1988) and convictions (to 17%, Table 1, a). In general, the revisions are low for theft and losses (2%) and higher for forgeries (12%, Table 1, b and c). This difference may be due to the voluntary nature of forgery reporting.

The need for these revisions stems from the problems associated with late reporting (because not all reports are received before the **cutoff** date of June 30) as well as the nature of program operations. The reasons are many-fold. Some reports are held until final conclusion of cases; some cases are found or reports are submitted from a previous year upon an audit or an inspection of an institution. Because of the nature of program operation and control mechanisms in place there is no late reporting for methadone.

The above differences can be significant for charges and convictions as well as forgeries data when **preliminary** year (1989) numbers are compared to **final** figures for previous years. To correct this, preliminary numbers have been adjusted as **estimates**. The estimates for overall total numbers for 1989 were

Conformément au règlement des lois régissant les drogues, les rapports sur les pertes et les vols de stupéfiants et de drogues contrôlées doivent être soumis au BDD par les professionnels de la santé et les inspecteurs du Bureau.

La troisième section, **Cas signalés de détournement de médicaments par contrefaçons d'ordonnance**, comprend des informations sur les fausses ordonnances - écrites, modifiées et verbales - et laisse voir si elles ont été exécutées ou non. Les données de cette section proviennent des rapports sur les contrefaçons présentés par les pharmaciens, les inspecteurs du Bureau et les autorités policières.

La quatrième section, **Statistiques concernant le traitement d'entretien par la méthadone**, présente des informations sur l'usage de la méthadone dans le traitement de la dépendance à l'égard des opioïdes au Canada. Les données de cette section proviennent de formulaires d'information concernant le malade et sont soumises obligatoirement par les médecins demandant l'autorisation de prescrire de la méthadone.

## Limites des données

### Rapports soumis après les délais prévus

Lorsqu'on interprète les données, on doit se rappeler que celles qui sont reçues pendant l'année civile sont préliminaires et qu'elles font l'objet d'une révision après la date de la première publication. Au cours des années suivantes, ces données sont révisées afin de refléter les informations les plus récentes dont on dispose. L'écart entre les données préliminaires et définitives a diminué avec les années pour ce qui est des accusations (19 % en 1986-1988) et des condamnations (17 %, tableau 1, a). En général, les changements sont peu marqués pour les vols et pertes (2 %), mais plus prononcés pour les contrefaçons (12 %, tableau 1, b et c). Cette différence tient peut être au fait qu'il n'est pas obligatoire de signaler les contrefaçons.

Les rapports soumis après les délais prévus (ils n'arrivent pas tous avant la **date limite de saisie annuelle des données**, soit le 30 juin) ainsi que la nature du fonctionnement des programmes occasionnent ces révisions. Les raisons des retards s'avèrent assez nombreuses. Certains rapports sont retenus jusqu'à ce qu'on connaisse l'issue du cas. La vérification ou l'inspection d'un établissement permettent de repérer certains cas ou d'obtenir certains rapports d'une année antérieure. En raison du fonctionnement des programmes et des mécanismes de vérification qui sont en place, les statistiques concernant la méthadone doivent être présentées dans les délais prévus.

Ces écarts peuvent se révéler importants en ce qui concerne les données relatives aux accusations, aux condamnations et aux contrefaçons, si on compare les chiffres **préliminaires** de l'année (1989) aux chiffres **définitifs** des années précédentes. Voilà pourquoi les chiffres préliminaires ont été rajustés par **estimation**. Les estimations globales pour 1989 sont fondées

based on the percent difference between preliminary and final figures for 1988 (Table 1). The estimates for intergroup comparison between years and within the same year were done using the numbers and percentage distribution of the group from 1989 preliminary figures in conjunction with the estimates for the overall totals. Based on fluctuations in percent differences between the preliminary and final figures for the past three years (1986-1988), these estimates should be correct within 5%. The reader is referred to figures and tables, with the noted estimates. These estimated figures were not applied when they were small and where fluctuations could be high.

### **Operational Sources**

The data are extracted from case reports and retrieved from information systems set up to support both program operations and statistics. As in other similar reporting systems, these statistics may be influenced by operational priorities of the contributing parties. For example, higher resource assignment priority placed on cocaine may mean lower emphasis on other drugs, which may result in an increase in the number of reports for cocaine. In addition, factors such as reporting consistency, quality of completion and timing in submission of reports are influenced by administrative procedures and constraints of the parties involved.

### **Coverage and Quality**

Because the legal and diversion statistics are based on reported information on known drug abuse-related criminal or illicit activities that came to the attention of the law enforcement agencies and health care professionals, the **findings** are a **subset** of all of these activities in Canada.

Because an extensive review of reporting practices and validation of data has not been conducted, it is difficult to specify the degree of coverage, the rate (if any) of under-reporting or the error rate within the data. For example, there may be some cases in which police do not report a drug charge, particularly when drugs or assets seizures were not involved. Some drug diversion cases are influenced by detection and/or investigative techniques (hit/miss ratio), which will affect the statistics. This is particularly true for such cases as pilferage or forgeries, which may represent an even smaller subset compared to other types of diversion cases.

sur la différence en pourcentage entre les chiffres préliminaires et définitifs de 1988 (tableau 1). Les estimations concernant les comparaisons entre les groupes, que ce soit d'une année à l'autre ou au cours d'une même année, ont été effectuées à l'aide, d'une part, de la répartition en pourcentage et des chiffres figurant dans les données préliminaires de 1989 et, d'autre part, des estimations globales. Compte tenu des variations en pourcentage observées entre les chiffres préliminaires et définitifs pour les trois dernières années (1986-1988), ces estimations devraient être exactes à 5 % près. Le lecteur doit se reporter aux figures et tableaux où l'on trouve ces estimations. Celles-ci ne s'appliquent pas lorsque les chiffres s'avèrent peu élevés, ou lorsque les fluctuations sont marquées.

### **Sources opérationnelles**

Les données sont tirées de fiches d'observation et de systèmes d'information qui visent à étayer tant les opérations des programmes que les statistiques. Comme c'est le cas pour d'autres formules semblables, l'ordre de priorité des collaborateurs peut influencer les statistiques. Si les ressources attribuées dans le cas de la cocaïne sont plus considérables, par exemple, on accordera peut-être moins d'importance aux autres drogues, d'où un accroissement possible du nombre de rapports sur la cocaïne. De plus, les procédures et les contraintes administratives des parties intéressées peuvent également influencer sur la régularité dans la présentation des rapports, la qualité de l'exécution et le respect des délais.

### **Étendue et qualité**

Comme les statistiques concernant les affaires judiciaires et les détournements sont fondées sur des informations relatives à des activités criminelles ou illicites connues qui sont signalées aux autorités policières et aux professionnels de la santé, les **résultats** ne représentent qu'un **sous-ensemble** de toutes les activités au Canada.

On n'a pas procédé à un examen détaillé des pratiques de déclaration de cas ni du mode de validation des données; voilà pourquoi il est difficile de déterminer l'étendue des données obtenues ainsi que le taux de sous-déclaration ou d'erreur (le cas échéant). Il se peut, par exemple, que la police ne signale pas une accusation portée dans une affaire de drogues, particulièrement lorsqu'elle ne saisit pas de drogues ou de biens. Les techniques de détection ou d'enquête (rapport réussites/échecs) peuvent influencer sur certains cas de détournement de drogues, et cela se répercute sur les statistiques. Cela s'avère particulièrement vrai dans le cas du chapardage et des contrefaçons, qui peuvent constituer un sous-ensemble encore moins important, par comparaison à d'autres genres de détournement.

## Criminal Code Offences

Analysis of charges and convictions for **related** drug offences under the Criminal Code (federal, but separate legislation) are not included here. An unknown portion of all of these convictions, accounting for less than 2% of the overall total of federal drug legislation, is reported to BDD by police forces, mostly when drug seizures are involved. Conspiracy (particularly conspiracy to traffick) accounts for the majority of Criminal Code drug-related offences (Appendix C, Tables 46 and 47).

## Conclusion

If the previously stated limitations are taken into consideration, analysis of overall patterns, trends and intergroup comparison should not be impeded. However, caution is recommended in the analysis of **detailed breakdowns**, in interpreting counts as **absolute measures** and in comparing **preliminary and final year data**. Finally, as previously noted, these statistics are only measures of society's changing response to illicit drug involvement and use in Canada.

These **operational-based statistics** are influenced by different activities of the parties involved, such as periodic program against drug abuse in a certain region or neighbourhood, or increased surveillance and controls over a targeted drug. The activities themselves may be further influenced by any one or all of the following factors such as: drug distribution, supply and degree of controls or reduction activities in place; drug abuse, addiction and associated health risks and social problems; patterns in social acceptance, popularity; and, finally, drug demand and actual drug use. Measuring this response can at most provide some indirect (not actual) indicators of drug use.

## Infractions visées par le Code criminel

Le présent rapport ne comprend pas l'analyse des accusations et des condamnations concernant les infractions **liées** aux drogues visées par le Code criminel (une loi fédérale mais distincte). Une part indéterminée des condamnations prononcées en vertu du Code, qui comptent pour moins de 2 % de la totalité des condamnations imposées conformément à la législation fédérale sur les drogues, est signalée au BDD par les autorités policières, principalement lorsque des drogues sont saisies. Les complots (particulièrement le complot en vue de faire trafic) représentent la majorité des infractions liées aux drogues qui tombent sous la coupe du Code criminel (annexe C, tableaux 46 et 47).

## Conclusion

Les limites mentionnées plus haut ne devraient pas empêcher l'analyse des tendances globales et les comparaisons entre les groupes. Il faut cependant faire preuve de prudence lorsqu'il s'agit d'analyser la **ventilation détaillée** des données, d'interpréter les dénombrements (**ce ne sont pas des mesures absolues**), et de comparer les données **préliminaires et les données définitives d'une année**. Enfin, comme nous l'avons déjà mentionné, les statistiques ne servent qu'à mesurer l'évaluation de la réaction de la société face à l'utilisation de drogues illicites au Canada.

Les diverses activités du parti intéressées, comme les programmes de lutte périodique contre la toxicomanie menés dans une région ou dans un quartier en particulier, ou encore une surveillance accrue exercée quant à une drogue donnée, peuvent influencer sur ces statistiques qui sont **fondées sur les opérations**. Un ou plusieurs des facteurs suivants peuvent notamment avoir un effet sur les activités : distribution des drogues, sources d'approvisionnement, degré de surveillance, activités de réduction. Au même titre, citons la toxicomanie ainsi que le risque pour la santé et les problèmes sociaux qui y sont associés, les tendances au plan de l'assentiment de la société et de la popularité d'une drogue, et, finalement, la demande à l'égard d'une drogue et l'usage que l'on en fait réellement. La mesure de cette réaction ne peut fournir au mieux que des indicateurs indirects (pas forcément exacts) de l'usage des drogues.

## Terms, Notes and Symbols

The following terms, notes and symbols are used in this report for analysis purposes.

### Terms

Analysis was conducted in this document by different categories, such as by legislation, drug sources and types (Appendix C, Table 49) and categories of offences and sentences; hence, the following definitions:

**Pharmaceutical** drugs are defined as psychoactive drugs made available on the Canadian medical market and distributed for therapeutic purposes. In a few cases, particularly for theft and losses statistics, they include pharmaceutical preparations of such drugs as heroin and cocaine.

**Prescription** drugs are those pharmaceutical drugs that can be obtained with a medical prescription.

The term **Licit** is used interchangeably with the words **pharmaceutical** and **prescription**.

**Street** or **Illicit** drugs are drugs which were manufactured, imported or distributed unlawfully. They include narcotic drugs such as cocaine and heroin and all restricted drugs such as Lysergic Acid Diethylamide (LSD) and Psilocybin.

**Opioid** drugs are all narcotic pharmaceutical drugs of natural and/or synthetic substances with morphine-like actions.

**Hypnotics** and **Stimulants** are all controlled pharmaceutical drugs.

**Hallucinogenic** drugs are all restricted drugs and the narcotic drug phencyclidine (PCP).

**Narcotic** drugs can be pharmaceutical or street drugs and are those listed in the schedule to the Narcotic Control Act (NCA).

**Controlled** drugs are all pharmaceutical drugs listed in schedule G to part III of the Food and Drugs Act (FDA part III).

**Restricted** drugs are all street drugs listed in schedule H to part IV of the Food and Drugs Act (FDA part IV).

**Multiple Doctoring** for prescription drugs is defined in this document as obtaining narcotic or controlled drugs from more than one physician within a 30-day period without informing prescribers; a licit drug diversion offence.

## Termes, notes et symboles

Les termes, notes et symboles suivants sont utilisés dans le présent rapport à des fins d'analyse.

### Termes

Dans le présent document, l'analyse a été effectuée selon différentes catégories -- par loi, par source et par genre de drogues (annexe C, tableau 49), par catégorie d'infractions et de peine, etc. Voici les définitions qui ont été utilisées :

**Médicaments** : ce sont des drogues psychotropes offertes sur le marché médical canadien et distribuées à des fins thérapeutiques. Dans certains cas, particulièrement en ce qui concerne les statistiques relatives aux vols et aux pertes, elles comprennent les préparations pharmaceutiques de drogues comme l'héroïne et la cocaïne.

**Médicaments d'ordonnance** : médicaments pouvant être obtenus à l'aide d'une ordonnance.

**Drogues licites** : peut désigner à la fois les **médicaments** et **médicaments d'ordonnance**.

**Drogues illicites** ou **de la rue** : drogues qui ont été fabriquées, importées ou distribuées illégalement. Elles comprennent les stupéfiants comme la cocaïne et l'héroïne ainsi que les drogues d'usage restreint comme le diéthylamide de l'acide lysergique (LSD) et la psilocybine.

**Opioides** : stupéfiants d'origine naturelle et (ou) synthétique dont l'action est comparable à celle de la morphine.

**Hypnotiques et Stimulants** : tous les médicaments d'usage contrôlé.

**Hallucinogènes** : toutes les drogues d'usage restreint et la phencyclidine (PCP), un stupéfiant.

**Stupéfiants** : médicaments ou drogues illicites figurant à l'annexe de la Loi sur les stupéfiants.

**Drogues contrôlées** : médicaments figurant à l'annexe G de la partie III de la Loi sur les aliments et drogues (partie III).

**Drogues d'usage restreint** : drogues illicites figurant à l'annexe H de la partie IV de la Loi sur les aliments et drogues (partie IV).

**Consultations médicales multiples** : façon d'obtenir des drogues contrôlées ou des stupéfiants de plusieurs médecins sur une période de 30 jours sans les informer; infraction liée au détournement de drogues licites.

**Trafficking**, unless specified, includes trafficking and possession for the purpose of trafficking offences (also encompasses importation offences for controlled and restricted drugs).

**Custodial sentences** are sentences involving a specified term (time) in prison (gaol). Custodial sentences are further categorized here into sentence terms of less than six and six months or more

## Notes

1. A note or a symbol to indicate those percentages that may not aggregate to 100% due to rounding procedures is not shown for figures with percentage distribution.

2. The analysis of totals includes all drugs under all federal drug legislation, but excludes drug offences for cannabis, a narcotic drug. Refer to Canadian Crime Statistics, indicating a decrease in 1989 over 1980 in total drug offences with inclusion of cannabis (Reference, Item 1) and Drug Analysis Statistics (Appendix C).

3. In some cases where multiple sentences are imposed and a final sentence option is not chosen or imposed, a priority ranking of custodial sentence over fines over probation is used.

## Symbols

p : preliminary figure due to late reporting

- - - or e : a broken line or “e” after a year (1989e) indicates preliminary figures were adjusted as **estimated** to correct previously mentioned late-reporting factor

(-) : amount too small to be expressed, nil or zero

**Trafic** : sauf indication contraire, il comprend les infractions liées au trafic et à la possession en vue de faire le trafic de drogues, mais également les infractions liées à l’importation de drogues contrôlées ou d’usage restreint.

**Peines de détention** : peines d’une certaine durée qui entraîne une détention (en prison). Les peines de détention sont divisées en deux catégories dans le présent document, soit les peines de moins de six mois et les peines de six mois ou plus.

## Notes

1. Aucune note ni aucun symbole servant à indiquer les pourcentages qui ne totalisent peut-être pas 100 % parce que les chiffres ont été arrondis n’accompagne les répartitions en pourcentage.

2. L’analyse des valeurs totales comprend toutes les drogues dont l’usage est prévu dans les lois fédérales, à l’exception des infractions liées au cannabis (stupéfiant). Consulter la Statistique de la criminalité du Canada, qui indique une diminution en 1989, par rapport à 1980, du nombre total d’infractions liées aux drogues, y compris le cannabis (élément 1), et les Statistiques concernant l’analyse de drogues (annexe C).

3. Dans certains cas, lorsqu’on impose plus d’une peine et que le choix final n’est pas déterminé ni imposé, on procède par ordre de priorité, soit les peines de détention, puis les amendes et les probations.

## Symboles

p : chiffre préliminaire (en raison d’un retard dans la présentation d’un rapport)

- - - ou e : le triple tiret ou le «e» après une année (1989e) indique qu’on a rajusté les valeurs préliminaires par **estimation** afin de corriger les erreurs imputables aux retards préalablement mentionnés.

(-) : trop faible pour être exprimé; nul ou zéro

**ANALYSIS**

**ANALYSE**

**SECTION ONE : Legal Statistics :**

***Disposition of Charges and  
Convictions for Drug Offences***

**1.1 *Total Charges and  
Convictions***

**PREMIÈRE SECTION : Statistiques judiciaires:**

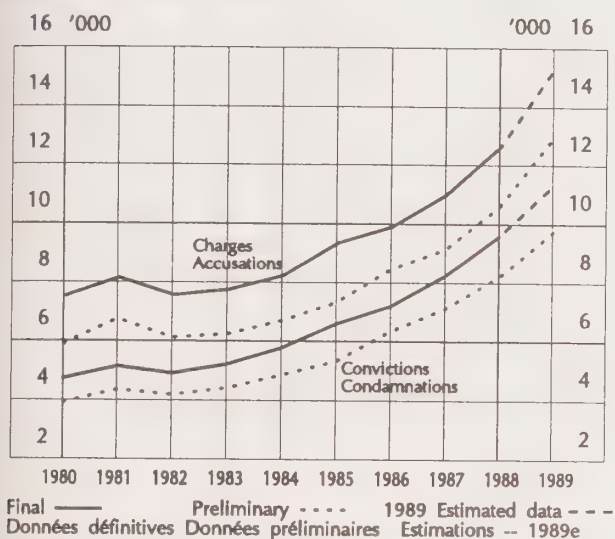

***Résultat des accusations et des condamnations  
relatives aux infractions liées aux drogues***

**1.1 *Nombre total d'accusations et de  
condamnations***

**Total Number of Charges and Convictions (Fig. 1) and Distribution of Convictions by (Fig. 2) Federal Drug Legislation\*, Canada:**

**Figure 1 - 1980-1989e**

**\*Note 2**

The total number of disposed **charges** and resulting **convictions** for drug offences (made under all federal drug legislation and reported by all enforcement agencies across Canada) has increased steadily over the last ten years (Figure 1). The numbers for both charges and convictions have more than doubled in 1989 over 1980 (Table 1, a). It should be noted that this upward **trend** is largely due to the exclusion of cannabis statistics (Note 2, see p. 9) and high and consistent increases in drug offences for the narcotic drug cocaine (the numbers for cocaine convictions increased almost tenfold in 1989 over 1980 and the percent share of total of these convictions increased from 18% in 1980 to 71% in 1989, Table 6).

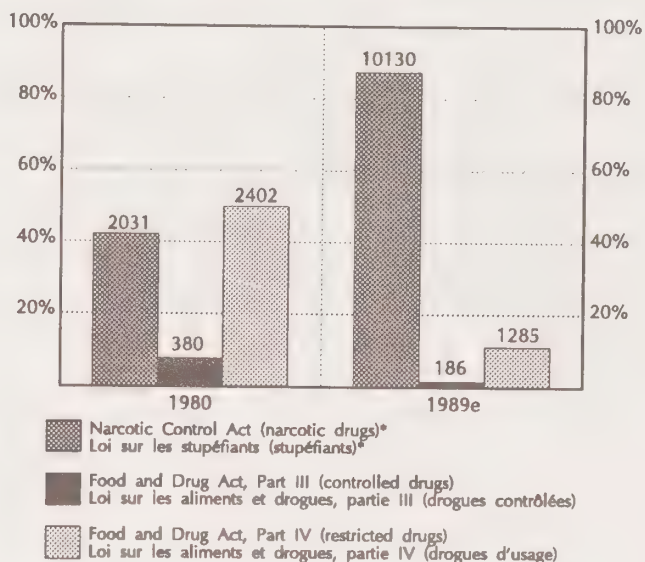

The number of 1988 charges and convictions has increased by 15% and 16% respectively over 1987 and are estimated to increase in 1989 over 1988 (by 22% and 20%, Table 1, a). This estimate, as demonstrated in figure 1, is based on the generally consistent percent difference between preliminary and final numbers for the most recent year, 1988. Drug analysis statistics, showing a 21% increase in the number of 1989 samples analysed over 1988, also support this projection and upward trend (Appendix C, Table 81).

The number of convictions under the **Narcotic Control Act** has been increasing steadily and in 1989 accounted for 87% of the total convictions (Note 2), compared to 42% in 1980 (Figure 2).

The proportion of total charges which resulted in convictions, have increased since 1980 (Table 1, a). About three-quarters (74% to 76%) of the charges resulted in convictions in the late 1980's compared to about two-thirds (63% to 65%) in the early 1980's. This proportion of charges resulting in convictions was higher for **narcotic** (75% in 1989) and for **restricted** (72%) than for **controlled** drugs (57%).

**Nombre total d'accusations et de condamnations (Fig. 1) et répartition des condamnations (Fig. 2) en vertu des lois fédérales relatives aux drogues\* Canada**

**Figure 2 - 1980 and/et 1989e**

Le nombre total d'**accusations** ayant fait l'objet d'une décision et de **condamnations** relatives aux infractions liées aux drogues (en vertu de toutes les lois fédérales et déclarées par toutes les autorités policières du Canada) s'est accru régulièrement au cours de la dernière décennie (figure 1). Le nombre d'accusations et de condamnations a augmenté de plus du double en 1989 par rapport à 1980 (tableau 1, a). Il est à noter que cette **hausse** est largement attribuable à l'exclusion des statistiques relatives au cannabis (note 2, voir p. 9) ainsi qu'à l'augmentation constante et importante du nombre d'accusations relatives à la cocaïne (le nombre de condamnations liées à la cocaïne a presque décuplé entre 1989 et 1980, et le pourcentage du nombre total de ces condamnations est passé de 18 % en 1980 à 71 % en 1989 (tableau 6)).

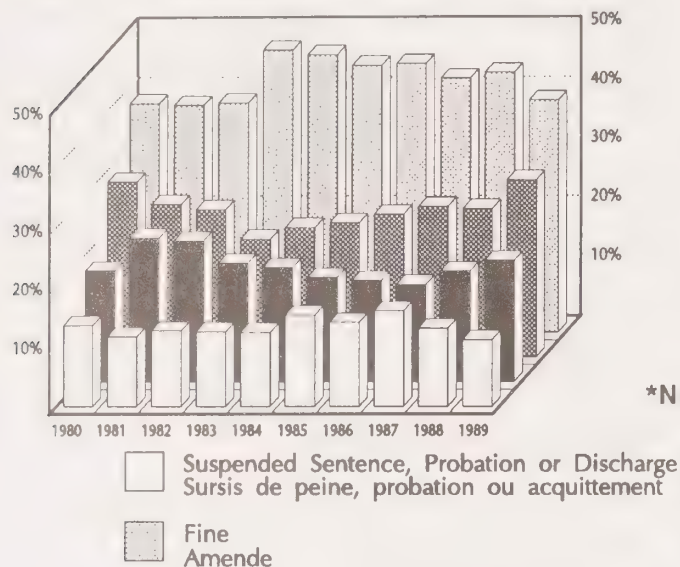

En 1988, les accusations et les condamnations ont augmenté de 15 et 16 % respectivement, par rapport à 1987, et on prévoit une augmentation de ces chiffres en 1989, par rapport à 1988 (de 22 et 20 % (tableau 1, a)). Cette estimation, comme le montre la figure 1, se fonde sur l'écart généralement constant en pourcentage observé entre les données préliminaires et les données définitives pour l'année la plus récente, soit 1988. Les statistiques relatives aux analyses de drogues révèlent une augmentation de 21 % quant au nombre d'échantillons analysés en 1989, par rapport à 1988, et viennent également étayer cette prévision et cette tendance à la hausse (annexe C, tableau 81).

Le nombre de condamnations prononcées en vertu de la **Loi sur les stupéfiants** a augmenté régulièrement et, en 1989, comptait pour 87 % de l'ensemble des condamnations (note 2), par rapport à 42 % en 1980 (figure 2).

La proportion du nombre total d'accusations ayant donné lieu à des condamnations a augmenté depuis 1980 (tableau 1, a). Les trois quarts (de 74 à 76 %) des accusations environ se sont traduites par des condamnations à la fin des années 80, comparativement à quelque deux tiers (de 63 à 65 %) au début de la décennie. La proportion des accusations ayant abouti à des condamnations était plus élevée dans le cas des **stupéfiants** (75 % en 1989) et des drogues d'usage **restreint** (72 %) que dans celui des drogues **contrôlées** (57 %).

## Percent Distribution of Sentences\* under All Federal Drug Legislation:

Figure 3 - Canada, 1980-1989e

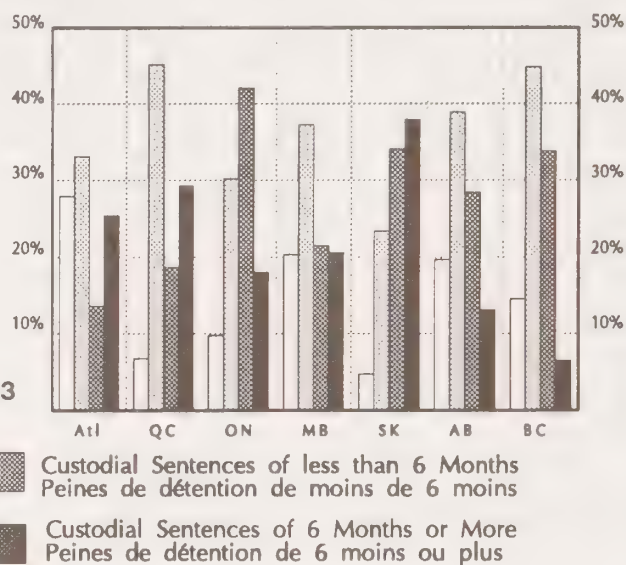

In 1989, half (50%) of the total convictions (11,601) under all drug legislation resulted in a custodial sentence, (Note 3, see p. 9) and over half of these (59%) were for less than 6 months (Table 2). More than one-third (39%) of the total convictions resulted in fines. As shown in Figure 3, these proportions (percentage share) have remained relatively constant over the last ten years. In recent years, however, there was a higher increase in percentage of custodial sentences with prison terms of less than 6 months as opposed to terms of 6 months or more.

Examination of sentencing practices between provinces shows greater variation (Figure 4). British Columbia has the lowest percentage share of custodial sentences with a term of 6 months or more. In 1989, fines in Quebec and British Columbia accounted for the highest share (45% for both) of total sentences, while Saskatchewan and Ontario have the highest share (72% and 60%, respectively) of custodial sentences (gaol/prison, Table 3).

Of the total charges (15,608) in 1989, 26% (4,007) did not lead to a conviction (**non-convictions**). Of these, over half (55%) were withdrawn and the rest were stayed (25%), dismissed (12%) or acquitted (9%, Table 3). The non-convictions, as a percentage portion of total charges in the provinces/territories were highest in Ontario (35%) and British Columbia (33%), and lowest in Quebec (10%) and the Atlantic provinces (12%). Quebec, in this respect, has the highest percentage share (35%) of total convictions for Canada, and a slightly higher share than Ontario (31%), although Ontario has a slightly higher share of charges (35%) than Quebec (29%).

## Répartition des peines prononcées\* en vertu de toutes les lois fédérales relatives aux drogues

Figure 4 - Provinces, 1989e

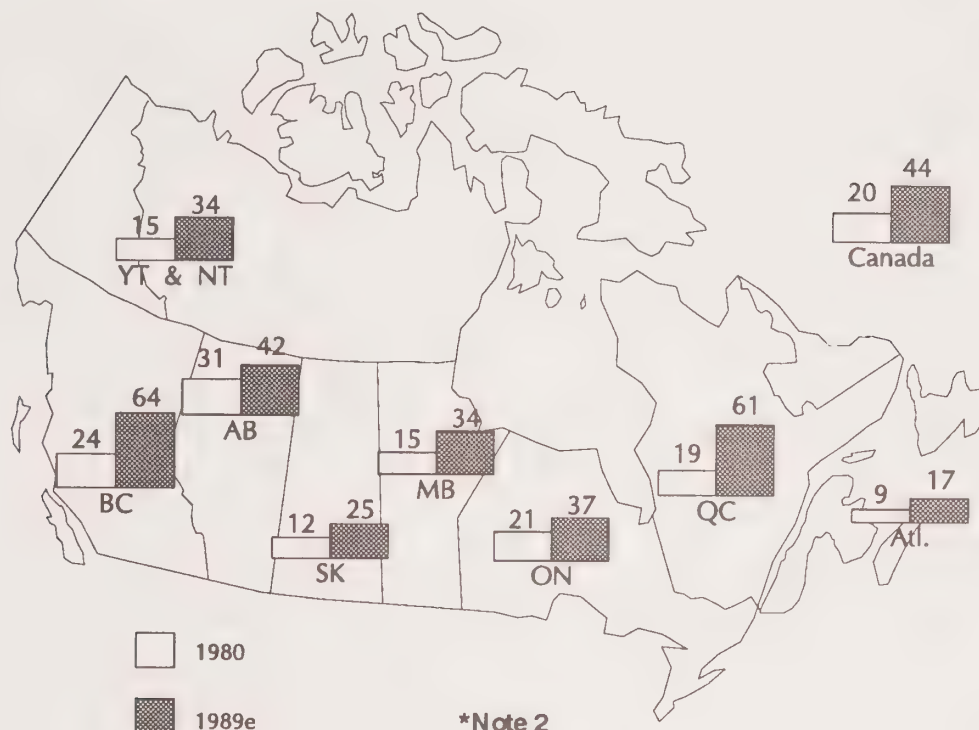

\*Note 3

En 1989, la moitié (50 %) du nombre total de condamnations (11 601) prononcées en vertu de toutes les lois relatives aux drogues a entraîné des **peines de détention** (note 3, voir p. 9), dont plus de la moitié (59 %) était de moins de six mois (tableau 2). Plus d'un tiers (39 %) du nombre total de condamnations ont entraîné une amende. Comme on peut le constater à la figure 3, ces proportions (en pourcentage) sont demeurées relativement constantes durant la dernière décennie. Au cours des dernières années, on a toutefois observé un accroissement plus important du pourcentage de peines de détention visant moins de six mois par rapport aux peines s'élevant à six mois ou plus.

Si on examine les pratiques de détermination de la peine des diverses provinces (figure 4), on observe des variations plus importantes. C'est la Colombie-Britannique qui présente le plus faible pourcentage de peines de détention visant six mois ou plus. En 1989, les amendes comptaient pour la plus grande proportion du nombre total de peines au Québec et en Colombie-Britannique (45 % pour les deux), au même titre que les peines de détention (prison, tableau 3) en Saskatchewan et en Ontario (72 et 60 %, respectivement).

En 1989, 26 % de l'ensemble des accusations (4 007 des 15 608) n'ont entraîné **aucune condamnation**. De ce nombre, plus de la moitié (55 %) ont été retirées, et les autres ont été suspendues (25 %), rejetées (12 %) ou ont donné lieu à un acquittement (9 %, tableau 3). Les accusations n'ayant entraîné aucune condamnation, exprimées en pourcentage du nombre total d'accusations dans les provinces et territoires, étaient les plus courantes en Ontario (35 %) et en Colombie-Britannique (33 %), et les moins fréquentes au Québec (10 %) et dans les provinces de l'Atlantique (12 %). À cet égard, le Québec présente le pourcentage le plus élevé (35 %) par rapport au nombre total de condamnations au Canada, pourcentage légèrement supérieur à celui de l'Ontario (31 %), quoique le pourcentage d'accusations soit légèrement plus élevé en Ontario (35 %) qu'au Québec (29 %).

**Figure 5 - Rate per 100,000 Population for Convictions, Canada and the Provinces/Territories\***

\*Note 2

\* Source for population figures, Statistics Canada, see Reference 2.

The **rate** for convictions in Canada has doubled (Note 2) from 20 convictions per 100,000 population in 1980 to 44 in 1989e (Figure 5).

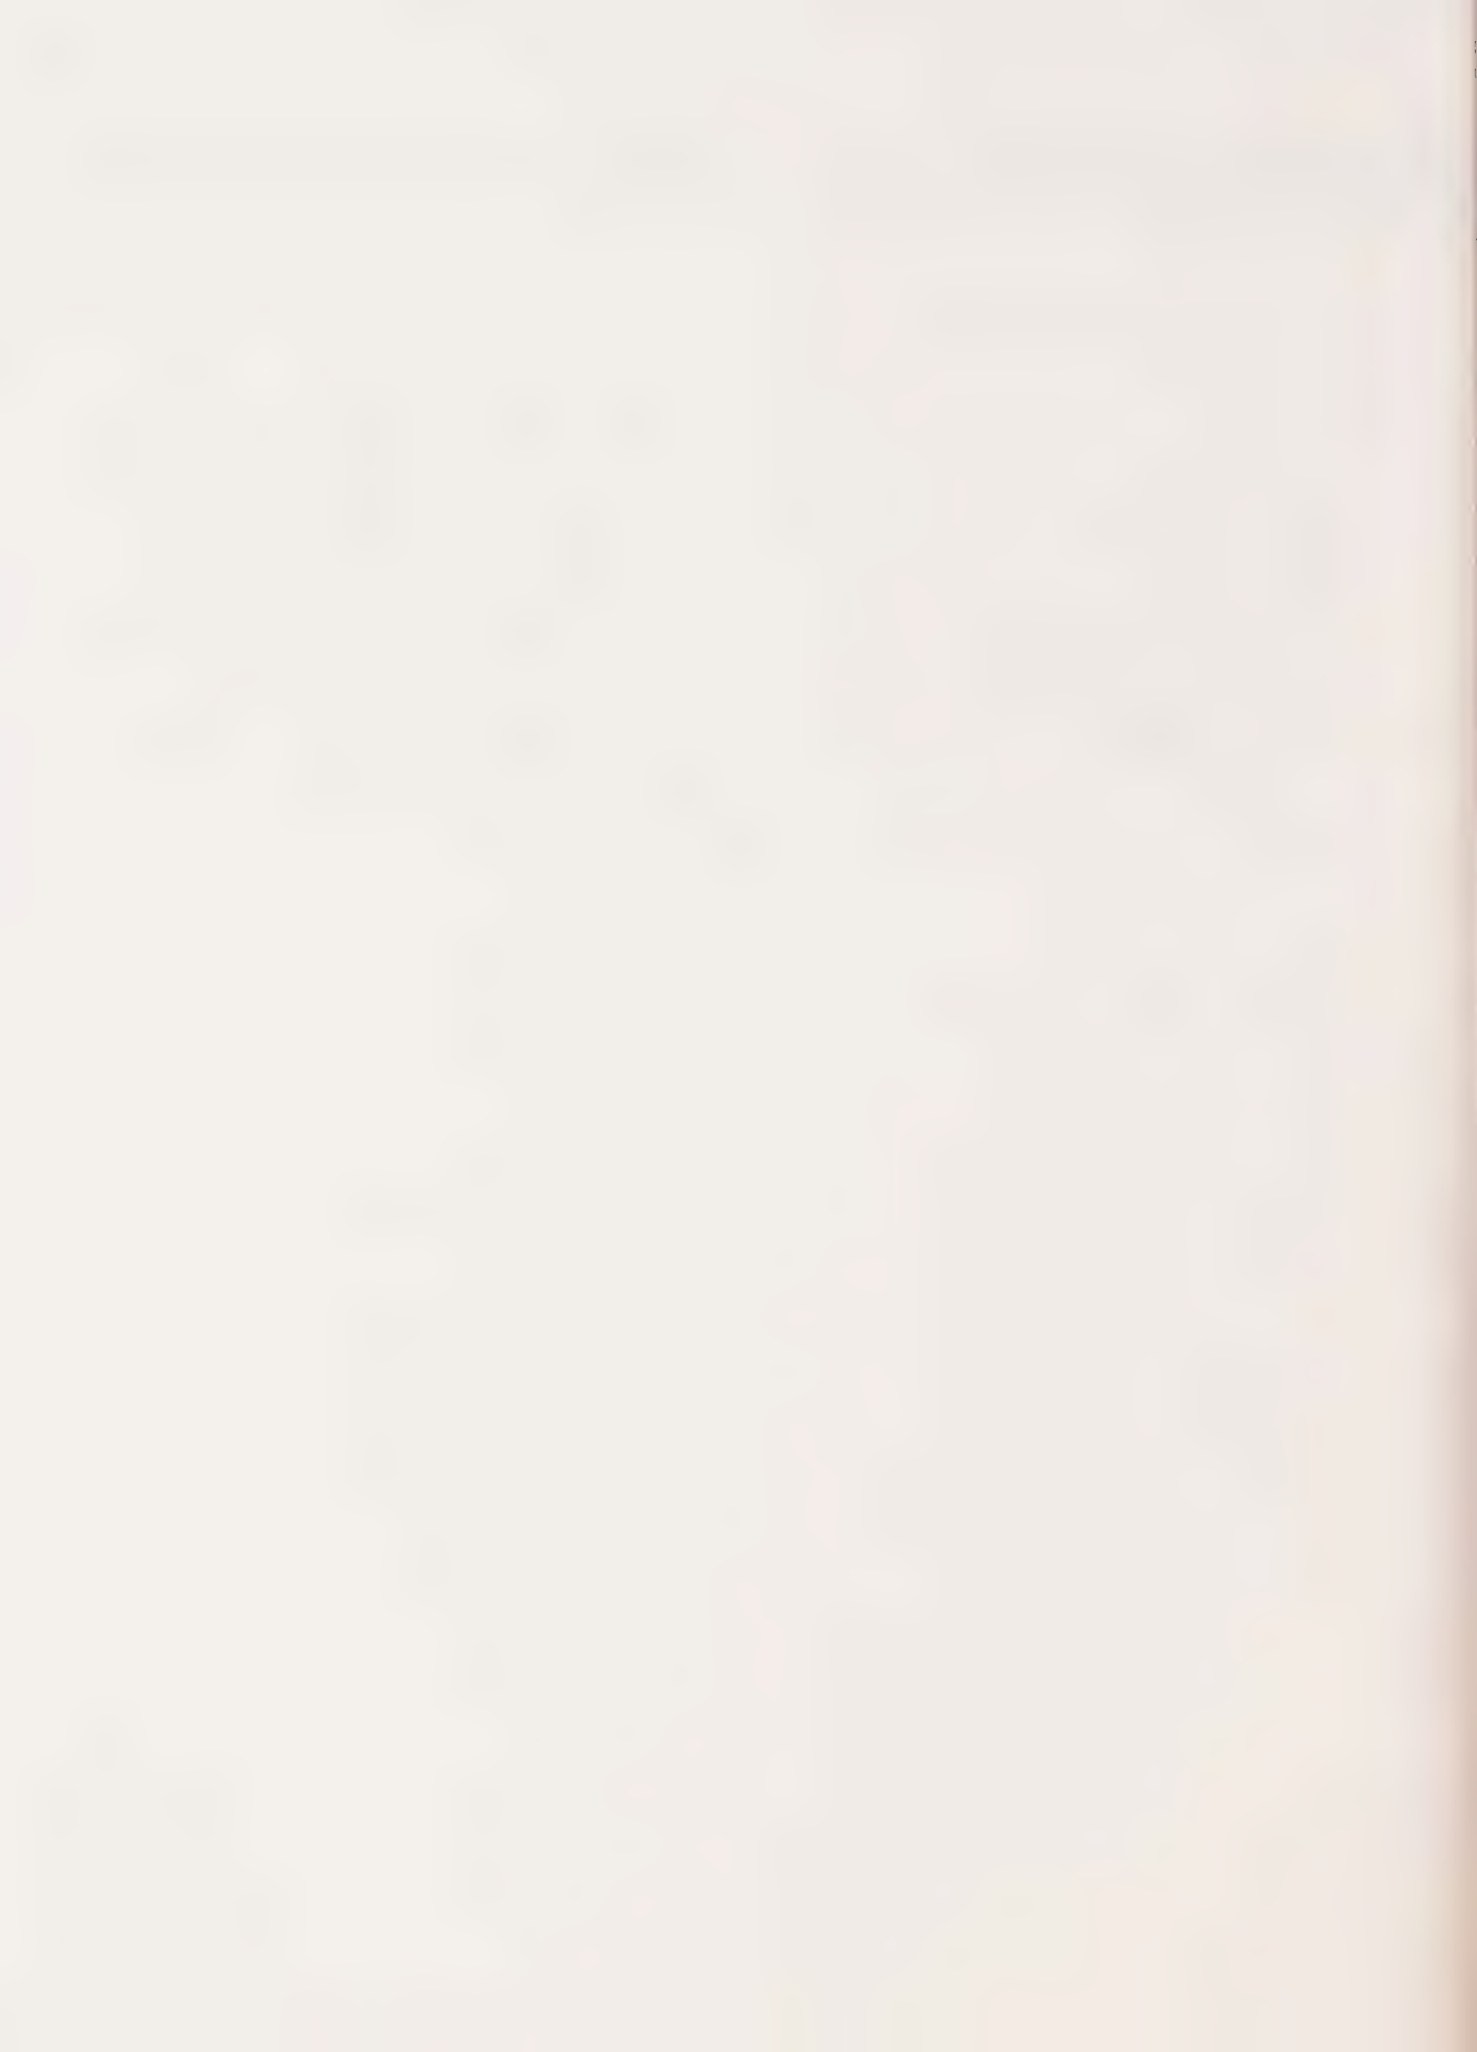

Examination of the provincial/territorial conviction rate for 1989 over 1980, reveals increases for all provinces and territories. British Columbia and Quebec have the highest rates and since 1980 increases for these provinces have more than doubled. In contrast, the Atlantic provinces and Saskatchewan have the lowest rate in 1989 although rates here have also about doubled. It should be noted that the rates for the Yukon and Northwest Territories were based on small numbers for convictions (27 in 1989) and for population.

**Figure 5 - Taux de condamnations pour 100 000 habitants, Canada, provinces et territoires\***

\* Données relatives à la population - voir référence 2, Statistique - Canada.

Au Canada, le **taux** de condamnations est passé (note 2) de 20 condamnations pour 100 000 habitants, en 1980, à 44, en 1989 (figure 5).

Si on compare les taux de condamnations de 1989 par rapport à 1980 pour les provinces et territoires, on s'aperçoit qu'il y a eu des augmentations partout. Les taux les plus élevés sont ceux de la Colombie-Britannique et du Québec, où les chiffres ont augmenté de plus du double depuis 1980. Par contraste, en 1989, les provinces de l'Atlantique et la Saskatchewan présentaient les taux les plus faibles, quoique les chiffres y aient aussi à peu près doublé. Il est à noter que les taux pour le Yukon et les Territoires du Nord-Ouest se fondaient sur petits nombres de condamnations (27 en 1989) et d'habitants.

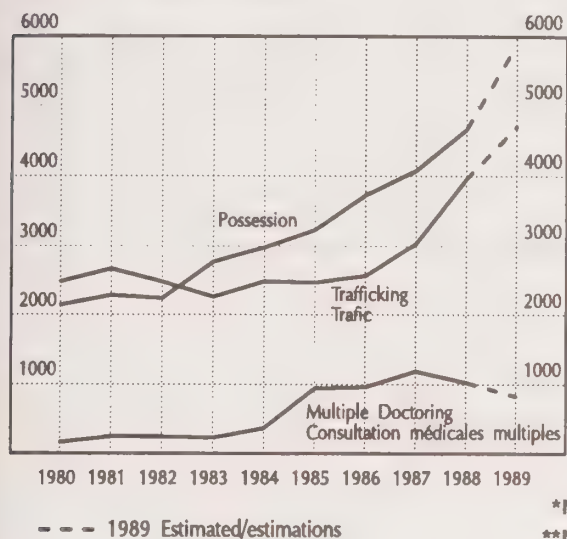

**1.2** *Convictions for Drug Offences*

**1.2** *Condamnations relatives aux  
infractions liées aux drogues*

**Total Convictions (Fig. 6) \*and Percentage Distribution (Fig. 7)\*\*, by Sentence, of Drug Offences, Canada**

**Figure 6 - 1980-1989e**

Since 1983, the number of convictions for possession offences under all drug legislation (Note 2) was higher than that for trafficking, and has steadily increased over the years (Figure 6). Multiple doctoring offence convictions peaked in 1987 and afterwards slightly decreased.

By 1989, possession had increased to 51% of all drug-related charges compared to 45% in 1980, while trafficking decreased to 41% from 52% in 1980 (Table 4). The number of importation offence convictions (an offence for narcotic drugs) had remained about the same since 1980, at less than a 1% share of the total.

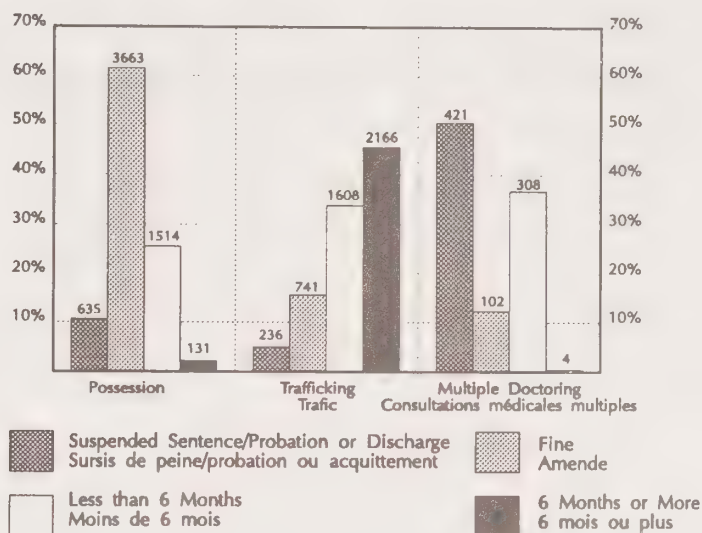

In 1989, 62% of the total possession offence convictions have resulted in sentences involving fines (Note 3, Figure 7). Total custodial sentences accounted for 28% of the total possession offence convictions. It should be noted that over half (59%) of the custodial sentences were for less than one month.

In contrast to possession, a major proportion (79%) of the total 1989 trafficking offence convictions resulted in custodial sentences. Over half of the custodial sentences for trafficking (57%) were for six months or more. Fines accounted for a much smaller proportion (16%) for trafficking than for possession.

More than one-third (37%) of the total multiple doctoring offence convictions in 1989 were custodial sentences, and almost all (99%) were for less than six months. In contrast to possession (11%) and trafficking (5%), about half (51%) of multiple doctoring offences resulted in a suspended sentence, probation or a discharge. Almost all of the importation offences resulted in a custodial sentence (49 of 50 convictions in 1989p) and almost all of these (48) resulted in a term of more than two years.

**Nombre total de condamnations (Fig. 6)\* et répartition en pourcentage, selon les peines (Fig. 7)\*\*, les infractions liées aux drogues, Canada**

**Figure 7 - 1989e**

Depuis 1983, le nombre de condamnations dans le cas des infractions liées à la possession prononcées en vertu de toutes les lois relatives aux drogues (note 2) est plus élevé que celui de condamnations liées au trafic, et il s'est accru constamment au cours des années (figure 6). Le nombre de condamnations liées aux consultations médicales multiples a atteint un sommet en 1987, puis a diminué légèrement.

En 1989, la possession représentait 51 % de l'ensemble des accusations liées aux drogues, comparativement à 45 % en 1980, tandis que les accusations pour trafic passaient de 52 %, en 1980, à 41 %, en 1989 (tableau 4). Le nombre de condamnations pour importation (infraction liée aux stupéfiants) est demeuré assez stable depuis 1980, à moins de 1 % du nombre total de condamnations.

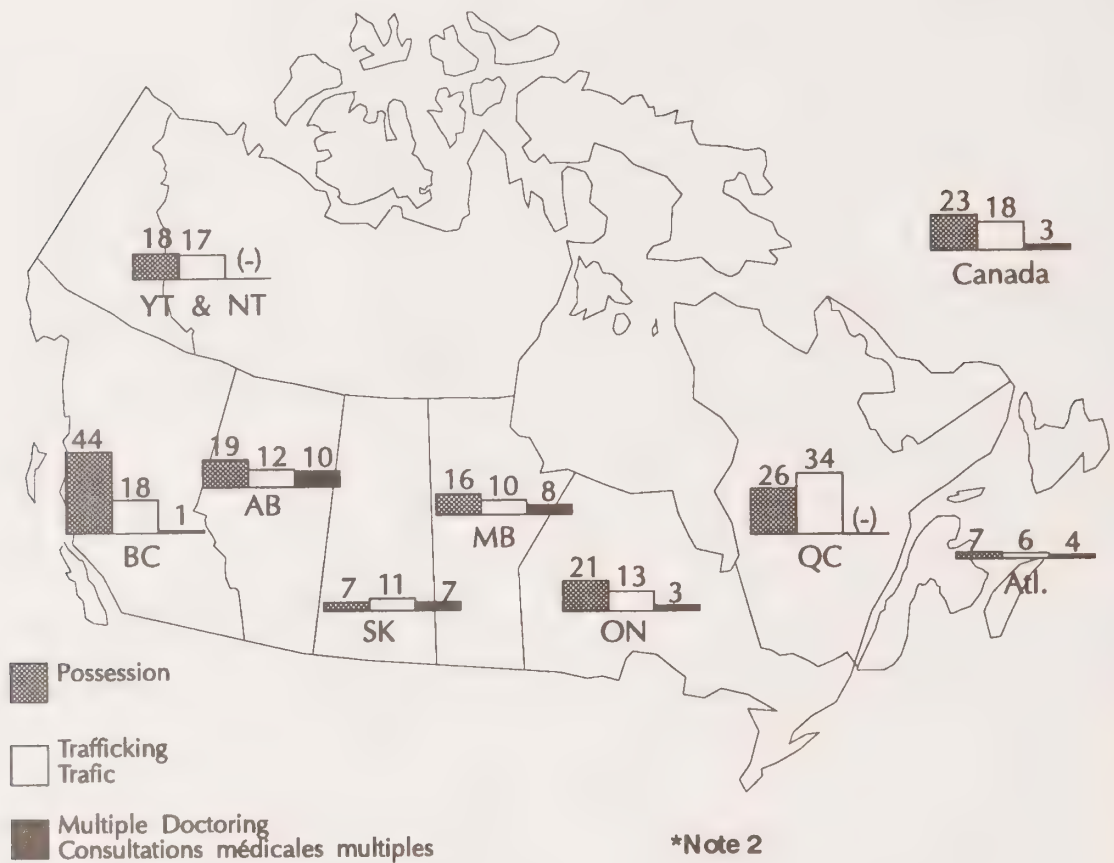

En 1989, 62 % de l'ensemble des condamnations pour possession se sont traduites par l'imposition d'une amende (note 3, figure 7). Les peines de détention comptaient pour 28 % du nombre total de condamnations pour possession. Il est à noter que plus de la moitié (59 %) de ces peines de détention supposaient une détention de moins d'un mois.

Par contre, la majeure partie des condamnations pour trafic (79 %) prononcées en 1989 a donné lieu à une peine de détention. Plus de la moitié des peines de détention pour trafic (57 %) supposaient une incarcération de six mois ou plus. Une proportion beaucoup moins importante (16 %) des condamnations pour trafic que des condamnations pour possession s'est traduite par une amende.

En 1989, plus du tiers (37 %) de l'ensemble des condamnations pour des consultations médicales multiples ont donné lieu à des peines de détention qui, dans presque tous les cas (99 %), supposaient une incarcération de moins de six mois. Contrairement aux infractions liées à la possession (11 %) et au trafic (5 %), environ la moitié (51 %) des infractions liées aux consultations médicales multiples ont donné lieu à un sursis de peine, à une probation ou à un acquittement. Pratiquement toutes les infractions liées à l'importation se sont traduites par une peine de détention (49 des 50 condamnations en 1989p), et la grande majorité de ces dernières (48) visait plus de deux ans.

**Figure 8 - Rate per 100,000 Population for Drug Offence Convictions, Canada and the Provinces/Territories, 1989\***

**Figure 8 - Taux de condamnations liées aux drogues pour 100 000 habitants, Canada, provinces et territoires, 1989\***

As shown in Figure 8, the conviction rate nationally and in the provinces/territories is higher for simple possession offences than for other type of offence convictions, except in Saskatchewan and Quebec. British Columbia has the highest rate for possession in Canada, while Quebec has the highest trafficking rate. Multiple doctoring conviction rates are highest for the Prairie provinces.

In 1989, the possession conviction rate has more than doubled over 1982 (earliest year figures available) for British Columbia, Quebec and Ontario, while the trafficking conviction rate has more than doubled for Quebec, Manitoba and Saskatchewan (Table 5).

Comme le montre la figure 8, le taux de condamnations dans l'ensemble du Canada et dans les provinces et territoires, à l'exception de la Saskatchewan et du Québec, est plus élevé pour les infractions liées à la simple possession que pour les autres genres d'infractions. C'est en Colombie-Britannique que le taux de condamnations pour possession est le plus élevé, et il en est de même pour le taux de trafic au Québec. Les provinces des Prairies présentent les taux de condamnations les plus élevés pour ce qui touche les consultations médicales multiples.

En 1989, les taux de condamnations pour possession ont augmenté de plus du double en Colombie-Britannique, au Québec et en Ontario, par rapport à 1982 (première année pour laquelle on retrouve des données); on note le même genre d'augmentation quant au nombre de condamnations pour trafic au Québec, au Manitoba et en Saskatchewan (tableau 5).

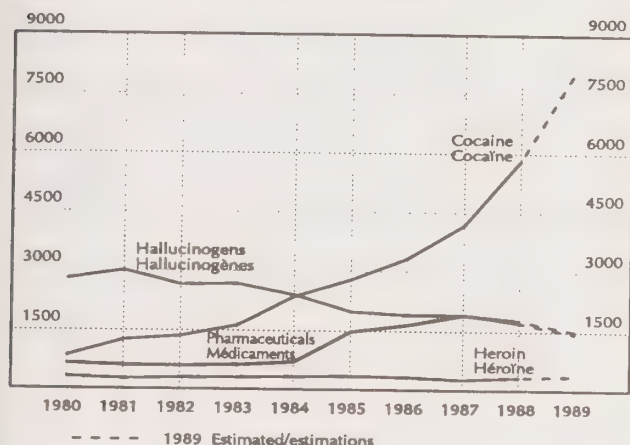

**1.3 Offences and Sentences by  
Type of Drug**

**1.3 Infractions et condamnations  
pour chaque catégorie de  
drogue**

## Total Convictions by Type of Drug, (Fig. 9) and Distribution of Heroin Offences (Fig. 10)

Figure 9 - Canada, 1980 - 1989e

In a ten-year period, convictions for cocaine increased, while those for hallucinogens and heroin decreased or remained relatively the same (Figure 9). Convictions involving pharmaceutical drugs were constant from 1980 to 1985, peaked in 1987 and have decreased since. These **trends** for pharmaceutical drugs were influenced by such factors as: changes in the drug schedule (i.e. transfer of pentazocine from FDA, part III to NCA in 1989); increases in penalties for multiple doctoring offences in 1986 (transfer from Narcotic Control Regulation to the Narcotic Control Act, with similar charges introduced to the Food and Drugs Act); and resulting changes in enforcement activities.

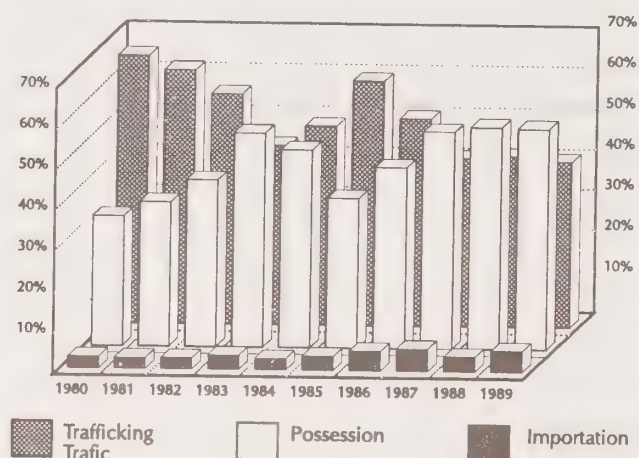

The numbers for cocaine convictions have increased almost tenfold in 1989 over 1980 and accounted for nearly three quarters (71%) of the total 1989 convictions (18% in 1980, Table 6). Hallucinogens continued to decline resulting in a percentage share drop (from 58% in 1980 to 13% in 1989). *Other drugs*, which include methamphetamine and other drugs not available on the Canadian medical market, decreased and accounted for less than 1% in 1989 (4% in 1980).

Since 1987, **heroin** trafficking offences accounted for about 40% to 42% of total heroin convictions; in the early 1980's trafficking accounted for more than half of all heroin convictions (Figure 10). Heroin importation accounted for a small percentage over ten years (3% to 6%) but higher than cocaine (less than 1%).

In 1989, 67% of the heroin charges resulted in convictions; 21% (64) were fines and 65% (199) were custodial sentences (Table 7). Over half of these custodial sentences (55%) were for a term of more than six months. Heroin sentences were highest in severity of penalties (average sentence length of 30.4 months) or almost three times as high when compared to cocaine (10.8 months).

## Nombre total de condamnations pour chaque catégorie de drogue (Fig. 9) et répartition des condamnations liées à l'héroïne (Fig. 10)

Figure 10 - Canada, 1980 - 1989e

Sur une période de dix ans, le nombre de condamnations liées à la cocaïne s'est accru, alors que celui qui concerne les hallucinogènes et l'héroïne a diminué ou est demeuré assez stable (figure 9). Le nombre de condamnations liées aux médicaments est demeuré stable entre 1980 et 1985, a atteint un sommet en 1987 et a diminué depuis. Ces **tendances** ont été influencées par des facteurs comme : des changements apportés aux annexes des médicaments (par exemple, le transfert en 1984 de la pentazocine de la Loi sur les aliments et drogues, partie III, à la Loi sur les stupéfiants), la majoration en 1986 des pénalités imposées dans les cas de consultations médicales multiples (transfert à partir du Règlement sur les stupéfiants à la Loi sur les stupéfiants, et changements semblables apportés à la Loi sur les aliments et drogues) et la transformation subséquente des activités d'application de la loi.

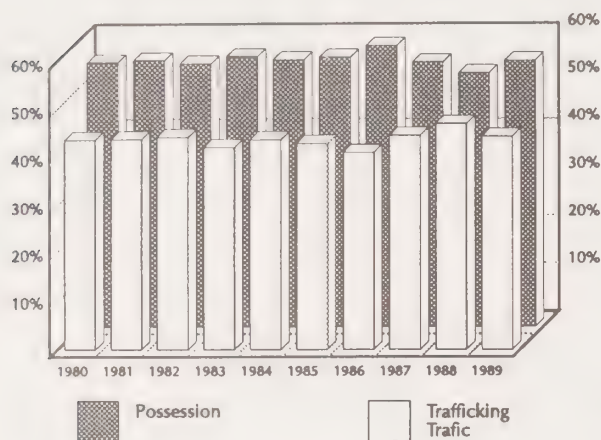

Les condamnations liées à la cocaïne ont été presque dix fois plus nombreuses en 1989 qu'en 1980, et elles comptaient pour près des trois quarts (71 %) du nombre total de condamnations en 1989 (18 % en 1980, tableau 6). Quant au nombre de condamnations liées aux hallucinogènes a continué de diminuer, ce qui s'est traduit par une chute du pourcentage qu'il représente dans l'ensemble (de 58 % en 1980 à 13 % en 1989). Le nombre de condamnations liées aux *autres drogues*, dont la métamphétamine et d'autres drogues qui ne sont pas offertes sur le marché médical canadien, a diminué et comptait pour moins de 1 % des condamnations en 1989 (4 % en 1980).

Depuis 1987, le trafic de l'**héroïne** représente environ 40 % des condamnations liées à cette drogue; au début des années (1980), le trafic comptait pour plus de la moitié des condamnations liées à l'héroïne (figure 10). Le pourcentage d'infractions liées à l'importation d'héroïne a été assez faible au cours des dix dernières années (de 3 à 6 %), mais s'est révélé plus élevé que dans le cas de la cocaïne (moins de 1 %).

En 1989, 67 % des accusations liées à l'héroïne ont donné lieu à une condamnation; 21 % (64) d'entre elles ont donné lieu à une amende, et 65 % (199), à une peine de détention (tableau 7). Plus de la moitié de ces peines (55 %) s'élevaient à plus de six mois. Les peines les plus sévères ont été imposées dans le cas de l'héroïne (durée moyenne de détention : 30,4 mois). La durée en était presque trois fois plus importante que dans le cas de la cocaïne (10,8 mois).

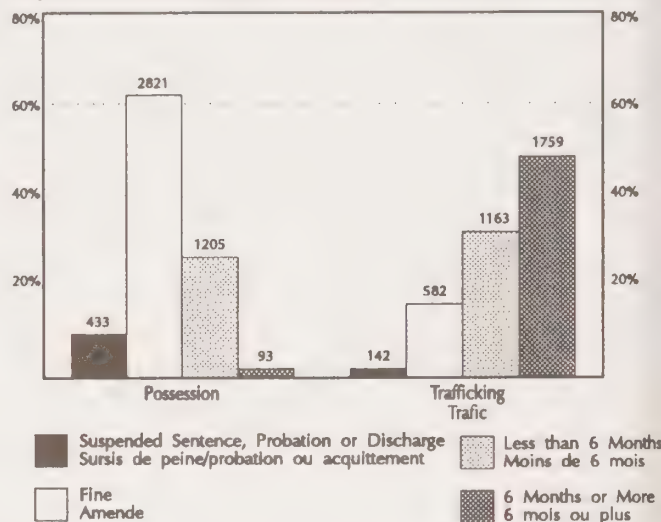

## Distribution of Convictions for Cocaine Offences (Fig. 11) and by Sentence (Fig. 12)\*

Figure 11 - Canada, 1980-1989e

## Nombre de condamnations liées à la cocaïne (Fig. 11) selon les peines (Fig. 12)\*

Figure 12 - Canada, 1989e

\*Note 3

Although the number of **cocaine** convictions has increased almost tenfold, there has been no change in offence distribution over the last ten years (Figure 11). Simple possession still accounts for more than half of all cocaine offence convictions (55% in 1989), while trafficking accounts for less than half (44%). Importation accounts for less than 1%.

In 1989, of the total cocaine convictions 41% resulted in a fine and 52% were custodial sentences (Table 7). The average length of custodial sentence for cocaine offence was 10.8 months. This was second to that of heroin offences but longer than that for other drugs.

More than half (62%) of the 1989 cocaine possession offences resulted in a fine and less than a third (29%) were custodial sentences (Figure 12). Of the custodial sentences for possession only 7% were for a term of more than six months. For trafficking the sentence penalties were more severe; most (80%) resulted in custodial sentences and less than a fifth (16%) were fines. Of the 34 importation offence convictions in 1989p, almost all (33) resulted in a custodial sentence and almost all of these (32) resulted in a sentence of six months or more (14 for more than 5 years).

**Crack, a derivative of cocaine**, is relatively new in Canada. The first specifically identified charge reported by police and recorded as crack cocaine was made in 1986. In 1989p, there were 184 crack charges; 144 resulted in convictions (Table 8). Of the 144 crack convictions, 22 resulted in fines and 119 in custodial sentences. Of the custodial sentences, 73 were for prison terms of less than six months. It should be noted that some crack charges may be reported simply as cocaine.

Quoique le nombre de condamnations liées à la **cocaïne** ait décuplé, on n'a observé aucun changement quant à la répartition des infractions au cours de la dernière décennie (figure 11). La simple possession compte toujours pour plus de la moitié des condamnations liées à la cocaïne (55 % en 1989), tandis qu'on attribue au trafic moins de la moitié de ces condamnations (44 %). L'importation est à l'origine de moins de 1 % des condamnations.

En 1989, 41 % des infractions liées à la cocaïne ont donné lieu à une amende, et 52 %, à des peines de détention (tableau 7). La durée moyenne de détention dans le cas des infractions liées à la cocaïne s'établissait à 10,8 mois, et seules les infractions liées à l'héroïne donnaient lieu à de plus longues peines; les peines de détention imposées dans le cas de la cocaïne étaient toutefois plus longues en moyenne que dans le cas des autres drogues.

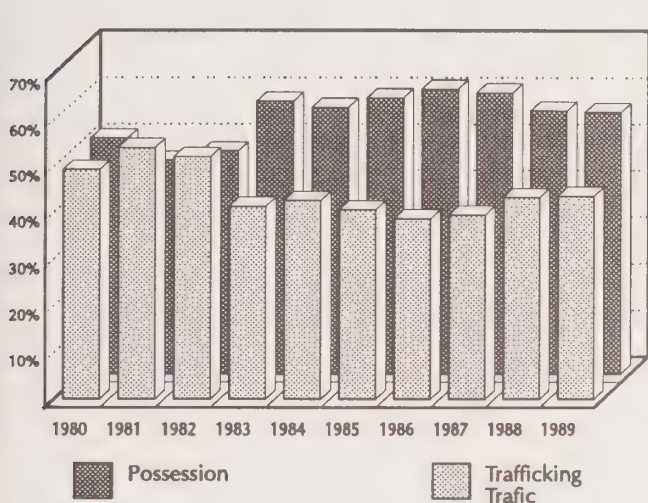

Plus de la moitié (62 %) des infractions liées à la possession de cocaïne en 1989 se sont traduites par une amende, et moins d'un tiers (29 %) d'entre elles ont donné lieu à des peines de détention (figure 12). Parmi ces peines de détention, seulement 7 % ont duré plus de six mois. Dans les cas du trafic, les peines étaient plus sévères : la plupart (80 %) consistaient en une peine de détention, et moins d'un cinquième (16 %), en une amende. En 1989p, presque toutes les condamnations pour importation (33 sur 34) se sont traduites par une peine de détention, et la grande majorité de ces dernières (32) s'élevait à six mois ou plus (14 visaient plus de cinq ans).

L'arrivée du **crack, dérivé de la cocaïne**, au Canada est relativement récente. C'est en 1986 que les forces policières ont porté pour la première fois des accusations concernant précisément le crack. En 1989p, on comptait 184 accusations liées au crack, dont 144 ont donné lieu à des condamnations (tableau 8); 22 se sont traduites par une amende, et 119, par une peine de détention. De plus, soixante-treize des peines de détention s'élevaient à moins de six mois. Il convient de noter que certaines accusations portées à cause du crack sont tout simplement classées dans la catégorie «cocaïne».

**Offence Convictions for All Hallucinogens (Fig. 13) and for Selected Hallucinogens and Methamphetamine (Fig. 14)**

**Nombre de condamnations liées aux taux hallucinogènes (Fig. 13) et de condamnations liées à certains hallucinogènes et à la méthamphétamine (Fig. 14)**

**Figure 13 - Canada, 1980 - 1989e**

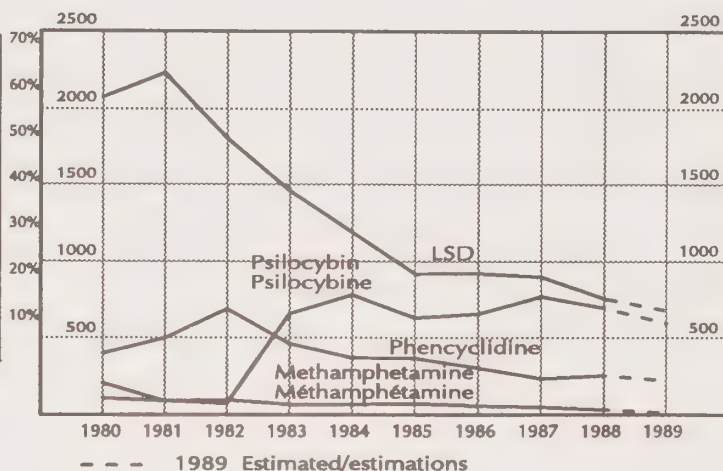

More than half of all **hallucinogenic** drug convictions are for possession offences, while the proportions of total convictions for trafficking offences have slightly increased since the mid-1980's, but are still lower than those in the early 1980's (Figure 13). Of the total hallucinogenic drug convictions, 47% resulted in fines and 41% resulted in custodial sentences (Table 7). Of the custodial sentences, only 36% resulted in a prison term of six months or more. The average term length of 7.9 months for all hallucinogens ranks third after heroin and cocaine offences.

Among the hallucinogens themselves the percent share for custodial sentences (46%) is highest for **Phencyclidine** (PCP, a narcotic-hallucinogenic drug); out of the custodial sentences 49% resulted in a prison term of six months or more (second to heroin, 55%).

Convictions for **Lysergic Acid Diethylamide** (LSD), a major restricted drug of abuse, have decreased since the early 1980's (Figure 14). Convictions for psilocybin have remained relatively the same since the mid 1980's.

Methamphetamine, with ten convictions, is the only drug of the illicit **other drugs** category that has had any convictions reported in 1989. Convictions and charges for methamphetamines have decreased substantially since 1980 (Figure 14). There have been no charges reported before the cut-off date for 1989 for **crank** or **ice**, forms of methamphetamines.

**Figure 14 - Canada, 1980 - 1989e**

Plus de la moitié de l'ensemble des condamnations liées aux **hallucinogènes** concernent la possession, et la proportion des condamnations pour trafic s'est accrue légèrement depuis le milieu des années 80, mais demeure inférieure à celle du début de la décennie (figure 13). Par ailleurs, 47 % du nombre total de condamnations liées aux hallucinogènes ont donné lieu à une amende, et 41 %, à une peine de détention (tableau 7). Seulement 36 % des détentions visaient six mois ou plus. Les hallucinogènes occupent le troisième rang quant à la durée moyenne de détention (7,9 mois), après l'héroïne et la cocaïne.

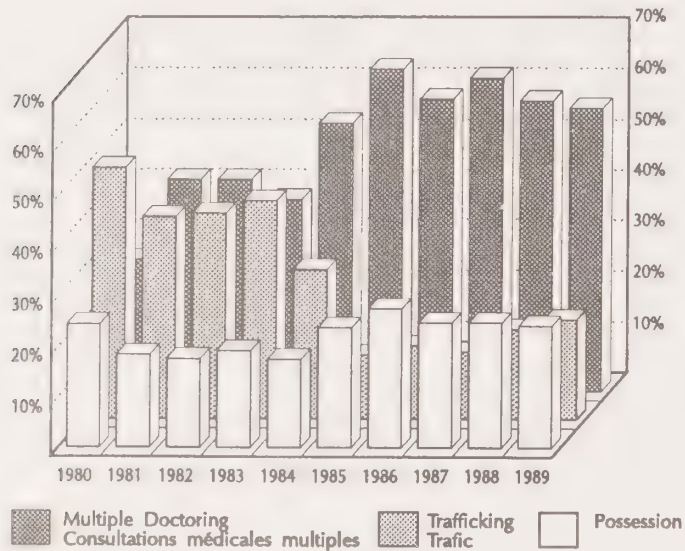

Parmi les hallucinogènes, c'est la **Phencyclidine** (PCP, un stupéfiant-hallucinogène) qui est associée au pourcentage le plus élevé (46 %) de condamnations; 49 % des peines de détention s'élevaient à six mois ou plus (cette proportion vient au deuxième rang après celle de l'héroïne, 55 %).

Le nombre de condamnations liées au **diéthylamide de l'acide lysergique** (LSD), une des principales drogues d'usage restreint qu'utilisent les toxicomanes, diminue depuis le début des années 80 (figure 14). Quant au nombre de condamnations liées à la psilocybine il est demeuré assez stable depuis le milieu des années 80.

La méthamphétamine, qui est à l'origine de dix accusations, constitue la seule drogue de la catégorie **autres drogues** illicites pour laquelle on a signalé des condamnations en 1989. Le nombre de condamnations et d'accusations en ce qui concerne la méthamphétamine a diminué substantiellement depuis 1980 (figure 14). Aucune accusation portée à cause du **crank** ou **ice**, dérivé de la méthamphétamine, n'a été signalée avant la date limite pour 1989.

**Convictions for All Pharmaceutical Drug Offences (Fig. 15) and for Selected Pharmaceuticals (Fig. 16)**

**Figure 15- Canada, 1980 - 1989e**

Drug offence convictions for multiple doctoring for pharmaceuticals increased and from 1985 accounted for about half of the total offence convictions (Figure 15).

Of the total charges for pharmaceutical drugs, 68% resulted in a conviction (Table 7). Of these convictions, less than half (46%) resulted in a custodial sentence. It should be noted that a third (33%) were suspended sentences, probation or discharged (highest among drugs). Less than a fifth (18%) of the total custodial sentences resulted in a term of six months or more and the average sentence length was 5.1 months (Table 7). This indicates that offences for pharmaceutical drugs have been lowest in severity of penalties.

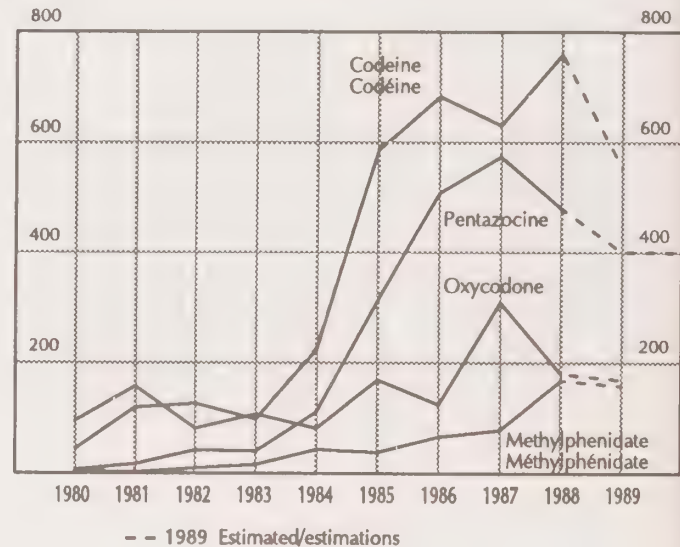

The majority of pharmaceutical drug convictions involve **opioids** (88% in 1989); **stimulants and hypnotics** account for the smaller share (12%) of total convictions (Table 6). Of all opioid drugs, **codeine** has the highest percentage share of pharmaceutical drug convictions (37% in 1989), **pentazocine** is second (26%) and **oxycodone** is third (11%).

**Methylphenidate** accounts for most (91% in 1989) of the convictions for stimulants and hypnotics, and it accounts for 11% of all pharmaceutical drug convictions.

This ranking of pharmaceutical drugs of choice, based on the highest number of convictions, has remained relatively the same since the mid-1980's (Figure 16).

**Nombre de condamnations liées aux des infractions visant tous les médicaments (Fig. 15) ainsi qu'à certains médicaments (Fig. 16)**

**Figure 16 - Canada, 1980 - 1989e**

Le nombre de **condamnations** liées à des infractions visant des consultations médicales multiples pour l'obtention de **médicaments** s'est accru et, depuis 1985, compte pour environ la moitié du nombre total de condamnations relatives aux infractions (figure 15).

Du nombre total d'accusations liées à des médicaments, 68 % se sont traduites par une condamnation (tableau 7). Moins de la moitié de ces condamnations (46 %), ont donné lieu à une peine de détention. Il est à noter qu'un tiers (33 %) d'entre elles ont donné lieu à un sursis de peine, à une probation ou à un acquittement (pourcentage le plus élevé parmi toutes les drogues). Moins de un cinquième (18 %) de l'ensemble des peines de détention visait un emprisonnement de six mois ou plus, et la durée moyenne de la peine s'établissait à 5,1 mois (tableau 7). Cela montre que les infractions liées aux médicaments ont entraîné les peines les moins sévères.

La majorité des condamnations liées aux médicaments était associée aux **opioïdes** (88 % en 1989); quant aux **stimulants** et aux **hypnotiques**, ils comptaient pour le pourcentage le plus faible (12 %) de condamnations (tableau 6). Parmi les opioïdes, la **codéine** est associée au pourcentage le plus élevé de condamnations liées aux médicaments (37 % en 1989), suivie de la **pentazocine** (26 %) et de l'**oxycodone** (11 %). Quant au **méthylphénidate**, il était à l'origine de 91 % des accusations liées aux stimulants et aux hypnotiques en 1989 et comptait pour 11 % des condamnations liées à l'ensemble des médicaments.

Cette répartition des condamnations liées aux médicaments privilégiés est demeurée assez stable depuis le milieu des années 80 (figure 16).

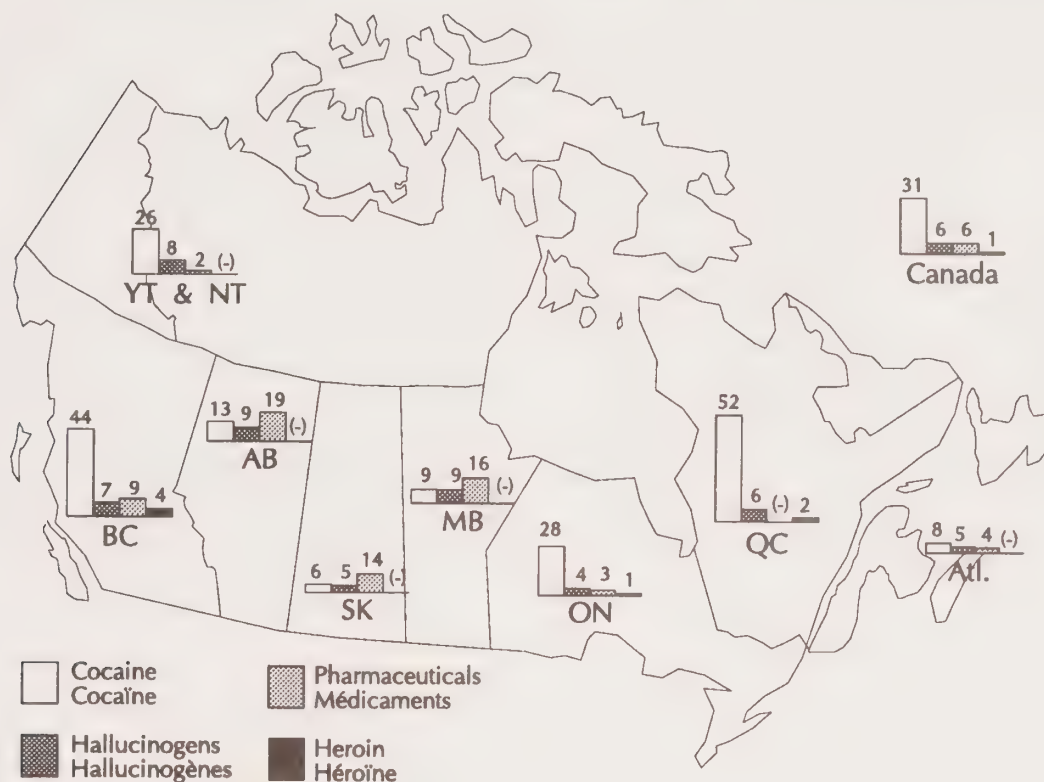

**1.4 Geographic Distribution by  
Type of Drug**

**1.4 Répartition par région pour  
chaque catégorie de drogue**

**Figure 17 - Rate per 100,000 Population of Convictions by Type of Drug, Canada and the Provinces/Territories, 1989e**

**Figure 17-Taux de condamnations par chaque catégorie de drogue pour 100 000 habitants, Canada, provinces et territoires, 1989e**

Examination of provincial and territorial conviction rates for 1989 by type of drug (Figure 17) reveals the following:

For **heroin**, British Columbia had the highest rate in Canada in 1989 and, with the exception of Quebec and Ontario, the number of convictions was too small or zero for all other provinces and territories to be expressed in these rates.

For **hallucinogens**, the Western provinces (including the Yukon and Northwest Territories), had the highest rates of hallucinogenic drug convictions. It should be noted that most of the convictions for phencyclidine (PCP) were in Quebec (90%) with some in Nova Scotia, Ontario and Alberta; convictions for other hallucinogenic drugs were made in all provinces/territories.

Un examen des **taux** de condamnations de 1989 par province et territoire pour chaque **catégorie de médicaments** (figure 17) révèle les points suivants :

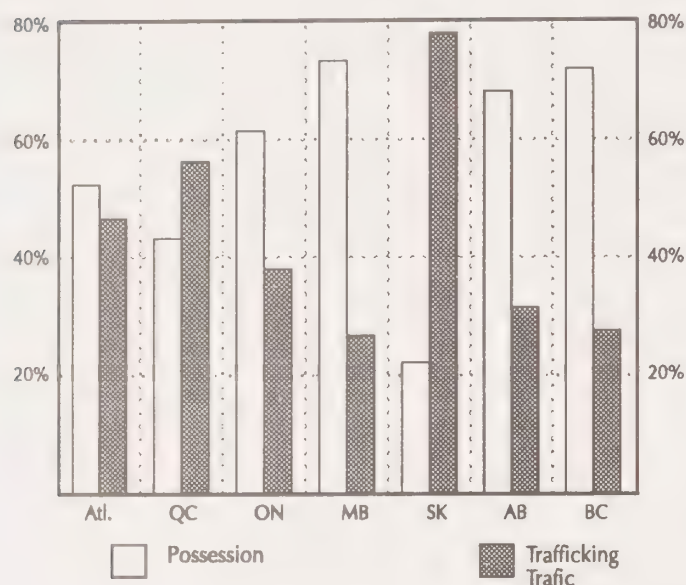

En ce qui concerne **l'héroïne**, la Colombie-Britannique présentait le taux le plus élevé au Canada, en 1989. À l'exception du Québec et de l'Ontario, le nombre de condamnations était très petit, voire nul dans les autres provinces et les territoires, de sorte qu'il ne peut être exprimé en taux.

En ce qui a trait aux **hallucinogènes**, les provinces de l'Ouest (dont le Yukon et les Territoires du Nord-Ouest) présentaient les taux les plus élevés en ce qui concerne les condamnations liées aux hallucinogènes. Il convient de noter que les condamnations liées à la phencyclidine (PCP) ont été signalées surtout au Québec (90 %) et, dans une moindre mesure en Nouvelle-Écosse, en Ontario et en Alberta; des condamnations liées aux autres hallucinogènes ont été prononcées dans toutes les provinces et dans tous les territoires.

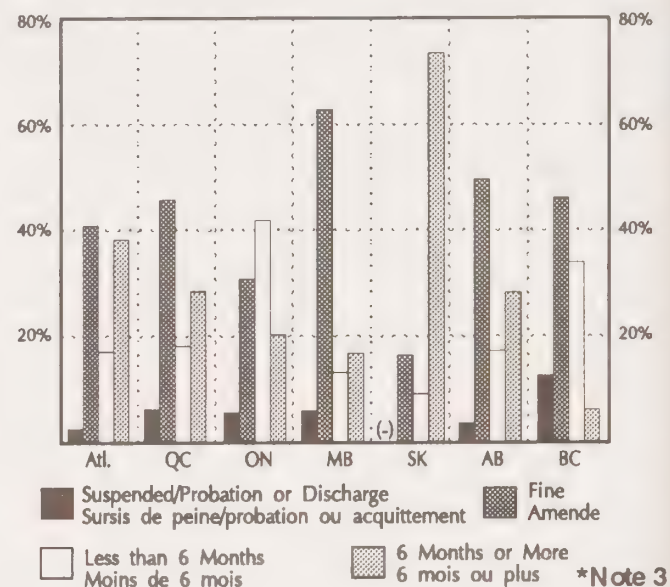

**Distribution of Cocaine Convictions by Offences (Fig. 18) and Sentences (Fig. 19)\***

**Répartition des condamnations liées à la cocaïne selon les infractions (Fig. 18) et selon les peines (Fig. 19)\***

**Figure 18 - Provinces, 1989e**

**Figure 19 - Provinces, 1989e**

\*Note 3

Quebec has the highest rate of **cocaine** convictions in Canada (Figure 17). Quebec, British Columbia (second) and Ontario (third) have a rate of at least two times the rate of cocaine convictions of other provinces.

Of 1989 cocaine offence convictions (Figure 18), Saskatchewan and Quebec had the lowest percentage share for possession while being the highest for trafficking. Of the provinces with a high rate of convictions, British Columbia and Ontario had a higher percentage for possession than for trafficking. Most of the importation offence convictions were reported for Quebec (14), Ontario (12) and British Columbia (5), in 1989p.

Of 1989 cocaine sentences (Figure 19), Manitoba had the highest proportion of fines. Saskatchewan had the highest proportion of custodial sentences (74%); 89% were for sentences of six months or more (Table 9). Ontario had a high proportion of custodial sentences (63%), but most (67%) were for less than six months.

Ontario had almost all of the reported 144 crack cocaine convictions in 1989p (131, Table 8).

Le Québec présente le taux le plus élevé de condamnations liées à la **cocaïne** au Canada (figure 17). Le Québec, la Colombie-Britannique (au deuxième rang) et l'Ontario (au troisième rang) présentent des taux au moins deux fois plus élevés que ceux des autres provinces.

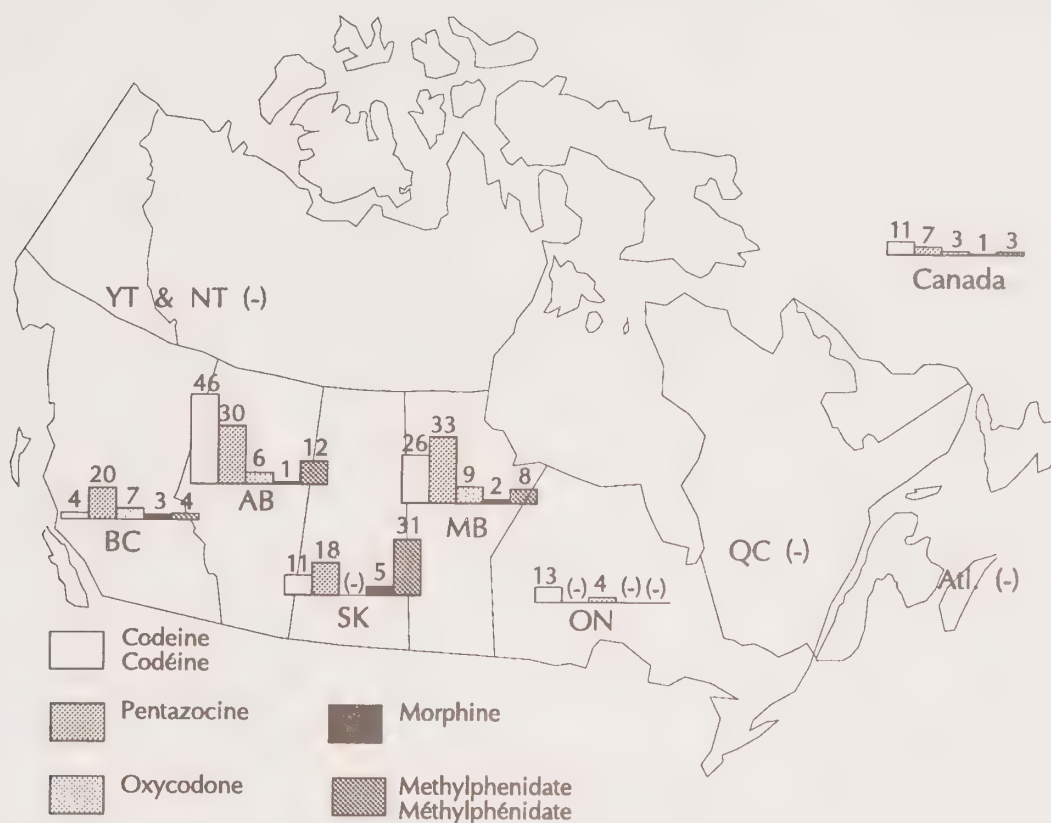

Toujours en ce qui concerne les condamnations liées à la cocaïne pour 1989 (figure 18), la Saskatchewan et le Québec présentaient les proportions les plus faibles quant à la possession, et les proportions les plus élevées, quant au trafic. En Colombie-Britannique et en Ontario, on a observé un pourcentage plus élevé de condamnations pour possession que pour trafic. En 1989p, la plupart des condamnations pour importation ont été signalées au Québec (14), en Ontario (12) et en Colombie-Britannique (5).

En 1989, le Manitoba présentait la proportion la plus élevée d'amendes liées à la cocaïne (figure 19). Par ailleurs, la Saskatchewan présentait la proportion la plus élevée de peines de détention (74 %) : 89 % de ces peines étaient de six mois ou plus (tableau 9). On a aussi noté une proportion élevée de peines de détention en Ontario (63 %), mais la plupart visaient moins de six mois (67 %).

La quasi-totalité des 144 condamnations liées au crack ont été prononcées en Ontario en 1989p (131, tableau 8).

**Figure 20 - Rate per 500,000 Population of Convictions for Selected Pharmaceuticals, Canada and the Provinces/Territories, 1989e**

**Figure 20 - Taux de condamnations pour 500 000 habitants, pour certains médicaments, Canada, provinces et territoires, 1989e**

For **pharmaceutical** drugs, as previously shown in Figure 17, Ontario and the Atlantic provinces had low rates and Quebec had no rate showing. In contrast, the Western provinces had the highest rates of convictions for pharmaceutical drug offences in Canada.

Convictions for selected pharmaceuticals were low and have been expressed per 500,000 population (Figure 20). The 1989 rate for codeine (opioid drug) convictions is highest for Alberta and Manitoba. Pentazocine and morphine conviction rates were found only in the Western provinces. Oxycodone rates were in Manitoba, British Columbia, Alberta and Ontario. Methylphenidate, similar to pentazocine, showed significant conviction rates for all of the Prairie provinces.

Comme le montre la figure 17, l'Ontario et les provinces de l'Atlantique présentaient de faibles taux de condamnations liées aux **médicaments**, taux qui était pratiquement nul au Québec. À l'inverse, les provinces de l'Ouest présentaient les taux les plus élevés au Canada à cet égard.

Les taux de condamnations liées à certains médicaments étaient faibles. Ils sont exprimés en fonction d'une population de 500 000 habitants (figure 20). En 1989, c'est en Alberta et au Manitoba que le taux de condamnations liées à la codéine (un opioïde) est le plus élevé. Des condamnations liées à la pentazocine et à la morphine n'ont été prononcées que dans les provinces de l'Ouest. Des condamnations liées à l'oxycodone ont été prononcées au Manitoba, en Colombie-Britannique, en Alberta et en Ontario. Le taux de condamnations liées au méthylphénidate, semblable à celui de la pentazocine, était élevé dans toutes les provinces des Prairies.

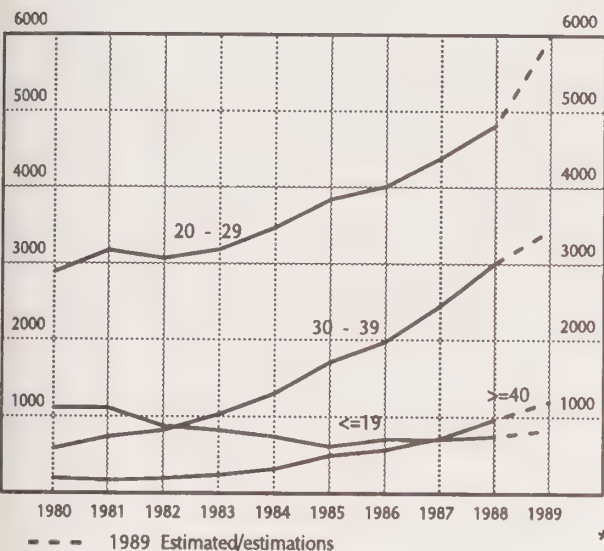

## **1.5 Convictions by Age and Sex**

## **1.5 Condamnations selon l'âge et le sexe**

## Number of Convictions (Fig. 21) and Percentage Distribution for Drug Offences by Age Groups (Fig. 22)\*

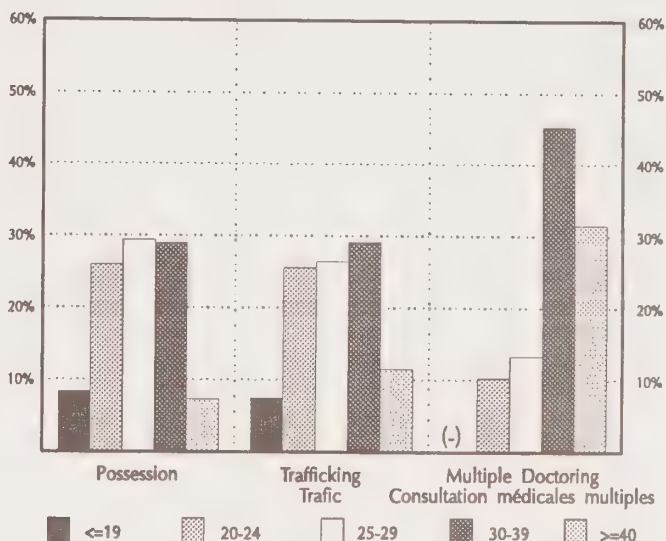

Figure 21 - Canada, 1980-1989e

\*Note 2

## Nombre total de condamnations (Fig. 21) et répartition en pourcentage des condamnations liées aux drogues selon le groupe d'âge (Fig. 22)\*

Figure 22 - Canada, 1989e

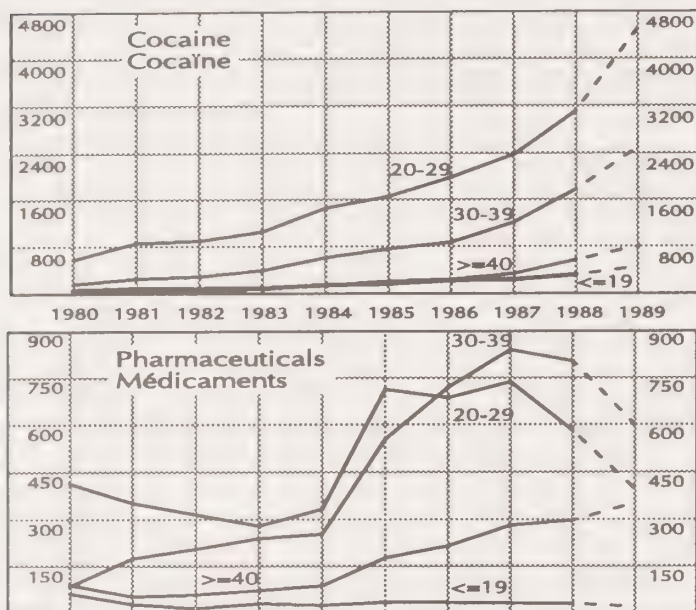

Convictions trends by Age (Figure 21) show that the total number of convictions for drug offences for the 19 and under age group decreased from 1981 to 1985 and remained stable from 1985 to 1989. During the same period the number of convictions generally increased for other age groups. The annual increase for the 20 to 29 age group (averaging 9% over 10 years) was more gradual than for the 30 to 39 age group (averaging 22%, Table 10). These changes in annual increases resulted in a decrease in the percentage share of total drug convictions for the 19 and under and the 20 to 29 age groups (from 83% in 1980 to 58% in 1989). There was an increase for the 30 and over age groups (from 16% in 1980 to 40% in 1989).

The percentages for possession offences were about the same as trafficking for all age groups in 1989 (Figure 22). The majority of multiple doctoring (and importation, 33 out of 50 in 1989p) offence convictions were for the 30 and over age group. It should be noted that, in contrast to other offences, multiple doctoring offences were nil (since 1986) for the 19 and under age group.

Le graphique des tendances de condamnation selon l'âge (figure 21) montre que le nombre total de condamnations relatives aux infractions liées aux drogues pour le groupe de personnes de 19 ans et moins a diminué de 1980 à 1985, puis est demeuré stable de 1985 à 1989. Au cours de la même période, le nombre des condamnations a généralement augmenté dans les autres groupes d'âge. L'accroissement annuel des condamnations était plus progressif chez les personnes de 20 à 29 ans (9 % en moyenne sur dix ans) que chez celles de 30 à 39 ans (22 % en moyenne; tableau 10). Les changements quant aux augmentations annuelles se sont accompagnés d'une baisse de la proportion des condamnations pour l'ensemble des drogues dans le cas des personnes de 19 ans ou moins et de 20 à 29 ans (de 83 % en 1980 à 58 % en 1989). Chez les personnes de 30 ans ou plus, on a observé une augmentation en ce qui a trait aux condamnations (de 16 % en 1980 à 40 % en 1989).

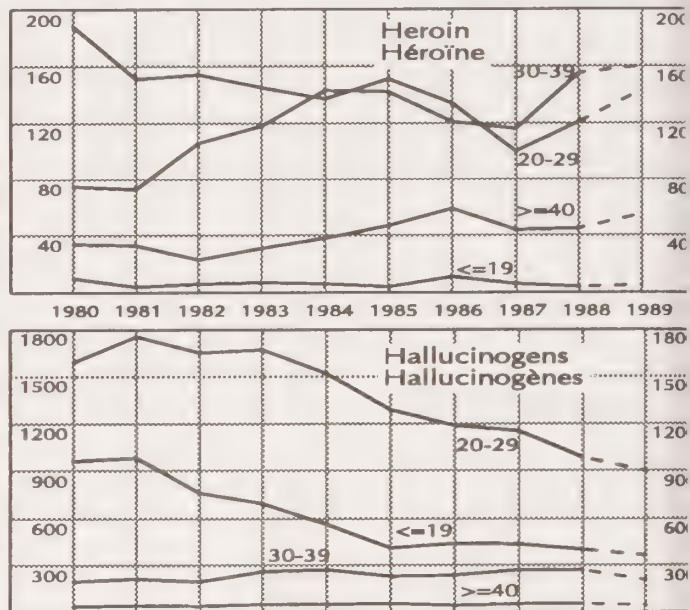

Les pourcentages notés dans le cas des infractions liées à la possession de drogues et au trafic étaient à peu près identiques pour tous les groupes d'âge en 1989 (figure 22). La majorité des condamnations pour consultations médicales multiples (et pour importation : 33 sur 50 en 1989p) était imputable à une personne de 30 ans ou plus. On doit noter que, par opposition aux autres infractions, les consultations médicales multiples se sont révélées pratiquement inexistantes au plan statistique de ce type (depuis 1986) chez les personnes de 19 ans et moins.

**Figure 23 - Number of Convictions by Age Group for Type of Drug, Canada, 1980-1989e**

--- 1989 Estimated/estimations

**Figure 23 - Nombre de condamnations selon le groupe d'âge, par catégorie de drogue, Canada, 1980-1989e**

A more detailed examination of trends for age groups and their comparative ranking differs by **type of drug** (Figure 23) than from that for all drugs (Figure 21), with some exception of cocaine. Cocaine accounts for a major share of the total of these drug convictions (71% in 1989), influencing the overall patterns and age group ranking. Increases in cocaine convictions differ for the 20 to 29 age group; increases were more marked (averaging 27% annually between 1980 and 1989) than the gradual increases for totals of all drugs (Figure 21) or decreases for heroin, hallucinogens and prescription drugs (Figure 23).

Unlike the patterns for cocaine convictions, more persons of the 30 to 39 age group were convicted for heroin (from 1987) and for pharmaceutical drugs (from 1986) than for other age groups. In fact the percentage share of total convictions for the 30 to 39 and 40 and over age groups for heroin (58% in 1989) and pharmaceutical drugs (63% in 1989) has been increasing since the mid-1980's and accounts for a greater proportion than that of the 29 and under age groups (Table 11).

In contrast to the previously mentioned drugs, the number of hallucinogenic drug convictions has remained lowest for the 30 and over age group, while the 20 to 29 and 19 and under age groups remained higher in the proportion of convictions (although the numbers have been decreasing). The percentage share of total convictions for the 19 and under age group was high for LSD averaging 26% for 1985 to 1989, and for psilocybin (21%) but slightly lower for phencyclidine (17%).

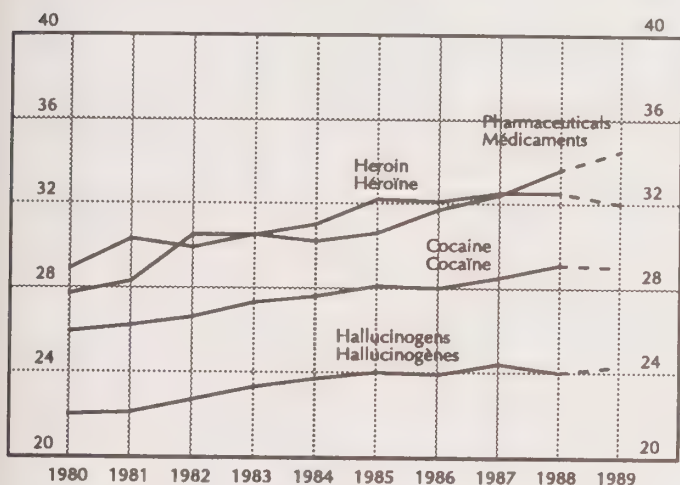

Un examen plus détaillé des tendances relevées dans les groupes d'âge et de leur classement comparatifs fait ressortir des différences pour chaque **catégorie de drogues** (figure 23) par rapport à l'ensemble des drogues (figure 21), à l'exception de la cocaïne. La cocaïne est à l'origine d'une grande partie des condamnations liées aux drogues (71 % en 1989) et influe sur les tendances globales et le classement par âge. L'augmentation du nombre de condamnations mettant en cause la cocaïne est différente chez les personnes de 20 à 29 ans; dans ce groupe, l'augmentation a été plus marquée (elle s'est élevée en moyenne à 27 % annuellement entre 1980 et 1989) que l'augmentation graduelle observée pour l'ensemble des drogues (figure 21), ou la diminution du nombre de condamnations relatives à l'héroïne, aux hallucinogènes et aux médicaments d'ordonnance (figure 23).

Contrairement aux tendances observées en ce qui concerne les condamnations liées à la cocaïne, c'est aux personnes de 30 à 39 ans qu'on associe le plus grand nombre de condamnations liées à l'héroïne (depuis 1987) et aux médicaments (depuis 1986). En fait, la proportion des condamnations totales attribuables aux personnes de 30 à 39 ans et de 40 ans ou plus pour des infractions liées à l'héroïne (58 % en 1989) et aux médicaments (63 % en 1989) augmente depuis le milieu des années 80 et est supérieure à celle qu'on associe aux personnes de 29 ans ou moins (tableau 11).

Contrairement à ce qu'on note dans le cas des drogues déjà décrites, c'est chez les personnes de 30 ans ou plus que le nombre des condamnations liées aux hallucinogènes est demeuré le plus faible, alors que c'est chez les personnes de 20 à 29 ans et de 19 ans ou moins que l'on constate une proportion plus élevée de condamnations (bien que les chiffres aient diminué). La proportion de condamnations imposées aux personnes de 19 ans ou moins était élevée pour ce qui touche le LSD (avec une moyenne de 26 % entre 1985 et 1989) et la psilocybine (21 %); la proportion était un peu plus faible pour la phencyclidine (17 %).

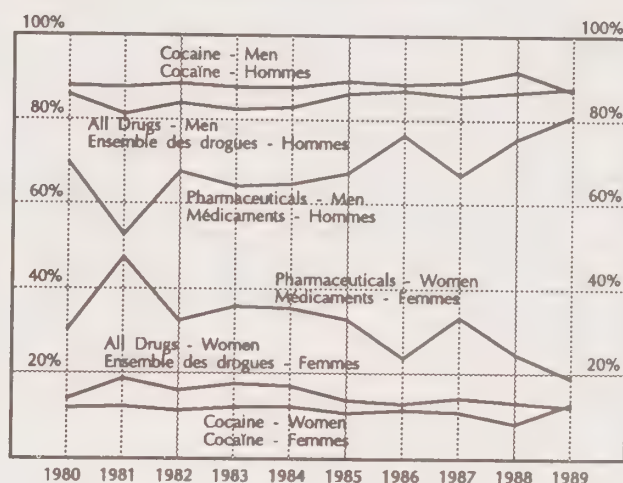

**Average Age Distribution of Persons Convicted by Type of Drug (Fig. 24) and Percentage of Convictions by Sex for All\* and Selected Drugs (Fig. 25)**

**Figure 24 - Canada, 1980 - 1989e**

**Répartition selon la moyenne d'âge des personnes condamnées, selon la catégorie de drogue (Fig. 24) et répartition en pourcentage des condamnations liées à tous\* et certaines drogues, selon le sexe (Fig. 25)**

**Figure 25 - Canada, 1980 - 1989e**

**\*Note 2**

The comparisons of age groups according to type of drugs and conviction patterns is even more apparent, as shown in Figure 24. Over a ten-year period there has been an increase in the **average age** of persons convicted for all these drug offences. The increase in the average age was twice as high for pharmaceutical drugs (28 years in 1980 to 35 in 1989) than for all other drugs, which increased only by about 3 years. Based on these averages for the past several years, pharmaceuticals and heroin tended to be the drugs of choice of the 30 and over age groups; cocaine of the mid- to late 20's and hallucinogens of the younger under 25 age groups.

Over a ten-year period, **women** accounted for a small portion, on the average less than one eighth of total convictions for all drugs annually (Figure 25). The proportionality for women and men by age group tended to differ for pharmaceutical drugs and cocaine. Women accounted, on the average, for almost a third of the total convictions for pharmaceuticals but just over one-eighth for cocaine. **Men** convicted for cocaine offences, over a ten year period, tended to be slightly older than women by about two years (28 years for men and 26 years for women). The age difference in convictions for pharmaceutical drug offences was less than one year. For heroin men were older by about two years and for hallucinogens there was no difference in the average age of men and women convicted over a ten year period.

Une comparaison des groupes d'âge selon la catégorie de drogue et les tendances sur le plan des condamnations rend les données encore plus claires, comme on peut le voir à la figure 24. Sur une période de dix ans, on peut observer une élévation de l'**âge moyen** des personnes condamnées pour l'ensemble des infractions liées aux drogues. L'augmentation de l'âge moyen était deux fois plus élevée dans le cas des médicaments (de 28 ans en 1980 à 35 ans en 1989) que dans celui de toutes les autres drogues, pour lesquels elle ne s'établit qu'à trois ans environ. Selon ces moyennes, établies sur plusieurs années, les médicaments et l'héroïne tendent à devenir les drogues privilégiées par les personnes de 30 ans ou plus; il en est de même pour la cocaïne chez les personnes de 25 à 30 ans, et les hallucinogènes, chez les personnes de 25 ans ou moins.

Sur une période de dix ans, les **femmes** ne comptent que pour une faible proportion, en moyenne moins de 1/8, de l'ensemble des condamnations annuelles relatives à toutes les drogues (figure 25). La proportion comparée des femmes et des hommes selon le groupe d'âge tendait à être différente pour les médicaments et la cocaïne. En moyenne, près du tiers de l'ensemble des condamnations sont attribuables aux femmes en ce qui concerne les médicaments, et seulement un peu plus de 1/8, en ce qui concerne la cocaïne. Les **hommes** accusés d'infractions liées à la cocaïne tendaient à être un peu plus vieux (de deux ans environ, selon les données obtenues sur une période de dix ans) que les femmes (28 ans pour les hommes et 26 ans pour les femmes). La différence d'âge en ce qui concerne les condamnations liées aux médicaments était inférieur à un an. Pour l'héroïne, les hommes étaient plus âgés par deux ans et en ce qui concerne les hallucinogènes il n'y avait aucune différence entre l'âge moyen des hommes et des femmes accusés pendant une période de dix ans.

***Section Two : Reported Cases of  
Diversion of  
Pharmaceutical Drugs  
through Thefts and  
Other Losses***

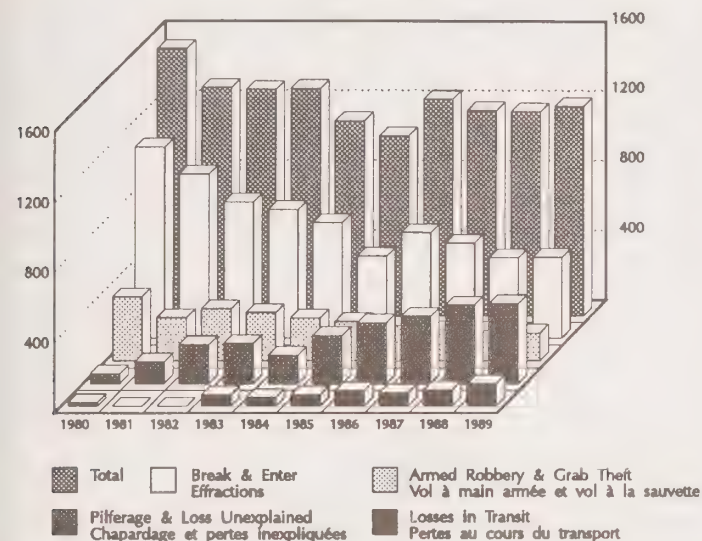

***Deuxième section : Cas signalés de  
détournement  
de médicaments par  
vols et autres pertes***

**Total Cases of Theft and Other Losses (Fig. 26) and Cases Involving Selected Prescription Drugs (Fig. 27)**

**Nombre total de vols et d'autres pertes (Fig. 26) et liés à certains médicaments d'ordonnance (Fig. 27)**

**Figure 26 - Canada, 1980 - 1989e**

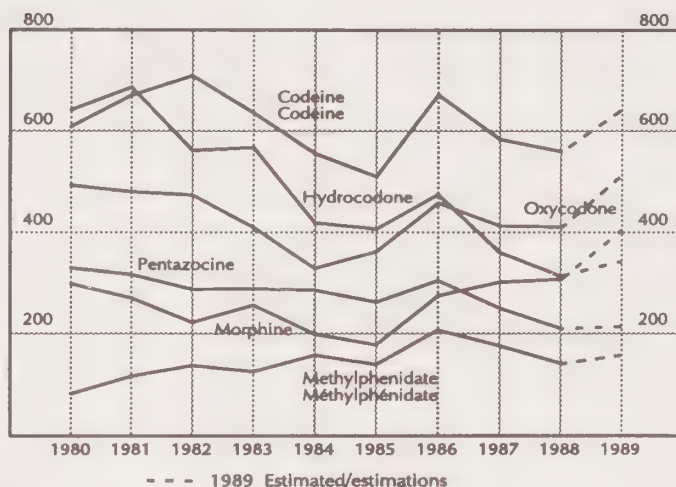

As shown in Figure 26, the number of reported diversion cases through **thefts and other losses** involving narcotic and/or controlled pharmaceutical drugs decreased **since 1980**. The decrease was largely due to a decline in the number of break and entry cases but this was offset in part by increases in reports of pilferage and loss unexplained. Figures for 1989 indicated a slight increase (5%) over 1988.

The numbers and percent share of total cases has decreased for **pharmacies** (from 93% in 1980 to 62% in 1989), while they increased substantially for hospitals (from 3% in 1980 to 24% in 1989) and licensed dealers (from 1% in 1980 to 12% in 1989).

Break and enter (59% in 1989) and armed robbery (17%) are the two highest **modes of diversion** of prescription drugs from pharmacies (Appendix C, Table 70). Loss unexplained (78%) and pilferage (14%) are the two highest modes of diversion for hospitals. Losses in transit (67%) and loss unexplained (29%) are the two highest modes of diversion for licensed dealers. Losses in transit increased in 1989 over 1988, (from 92 cases in 1988 to 130 in 1989).

As in convictions, opioids have historically accounted for the majority of theft and other losses cases and in 1989 they accounted for 80% of all cases, while stimulants and hypnotics accounted for 20% of the cases (Table 13). Although the number of cases increased over the years for morphine and decreased for hydrocodone, the ranking of drugs remained generally the same (Figure 27).

**Figure 27 - Canada, 1980 - 1989e**

Comme le montre la figure 26, le nombre de cas déclarés de détournement de stupéfiants et (ou) de médicaments contrôlés par **vols et autres pertes** a diminué **depuis 1980**. Cette diminution s'expliquait pour une large partie par une baisse du nombre de vols avec effraction; elle était toutefois contrebalancée en partie par l'augmentation des cas déclarés de chapardage et de pertes inexplicées. Les chiffres de 1989 font ressortir une légère augmentation (5 %) par rapport à 1988.

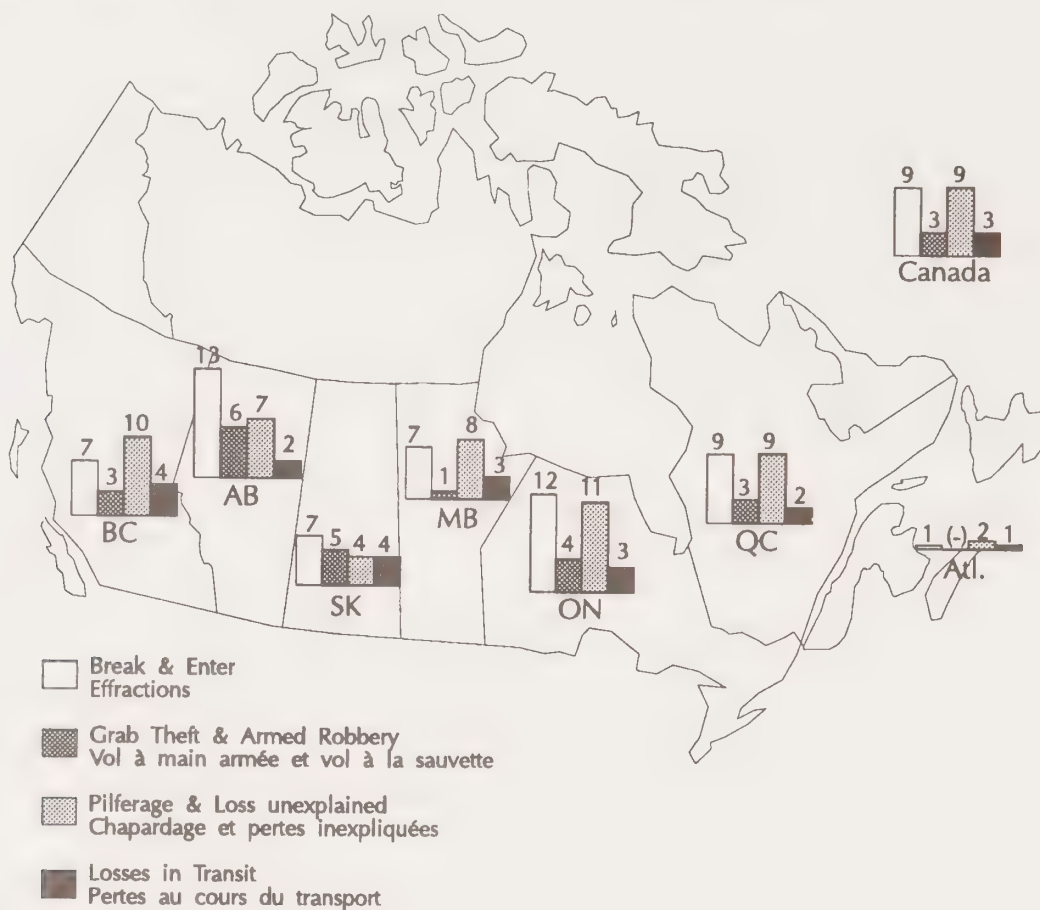

Le nombre et la proportion des vols et autres pertes par rapport à l'ensemble des cas ont diminué pour les **pharmacies** (de 93 % en 1980 à 62 % en 1989), alors qu'ils augmentaient de façon importante pour les hôpitaux (de 3 % en 1980 à 24 % en 1989) et pour les distributeurs autorisés (de 1 % en 1980 à 12 % en 1989).

Les vols avec effraction (59 % en 1989) et les vols à main armée (17 %) constituent les deux principales **méthodes de détournement** de médicaments d'ordonnance dans les pharmacies (annexe C, tableau 70). Dans les hôpitaux, ce sont les pertes inexplicées (78 %) et le chapardage (14 %) qui sont les deux principales méthodes de détournement de drogues. Les pertes au cours du transport (67 %) et les pertes inexplicées (29 %) sont les deux principales méthodes de détournement dans le cas des distributeurs autorisés. Les pertes au cours du transport ont augmenté de 1988 à 1989 (de 92 cas en 1988 à 130 en 1989).

Comme c'est le cas pour les condamnations, les opioïdes font depuis longtemps l'objet de la majorité des vols et autres pertes; en 1989, ils ont représenté 80 % de l'ensemble des cas relevés, alors que les stimulants et les hypnotiques représentaient les autres 20 % (tableau 13). Même si, au cours des années, le nombre de cas de vols et autres pertes a augmenté pour la morphine et a diminué pour l'hydrocodone, le rang respectif de chaque drogue est resté identique en général (figure 27).

**Figure 28 - Rate per 500,000 Population of Theft and Losses Cases, Canada and the Provinces, 1989e**

**Figure 28 - Taux pour 500 000 habitants des cas de vols et pertes, Canada et provinces, 1989e**

The **rate** of theft and losses cases for Canada and for provinces has decreased in 1989 over 1980, except for Manitoba (Table 14). In 1989 the highest rates were for Ontario and Alberta, with 29 and 27 per 500,000 population, respectively. British Columbia had the highest decrease in rate of break and enter cases in 1989 over 1980, from 40 in 1980 to 7 in 1989.

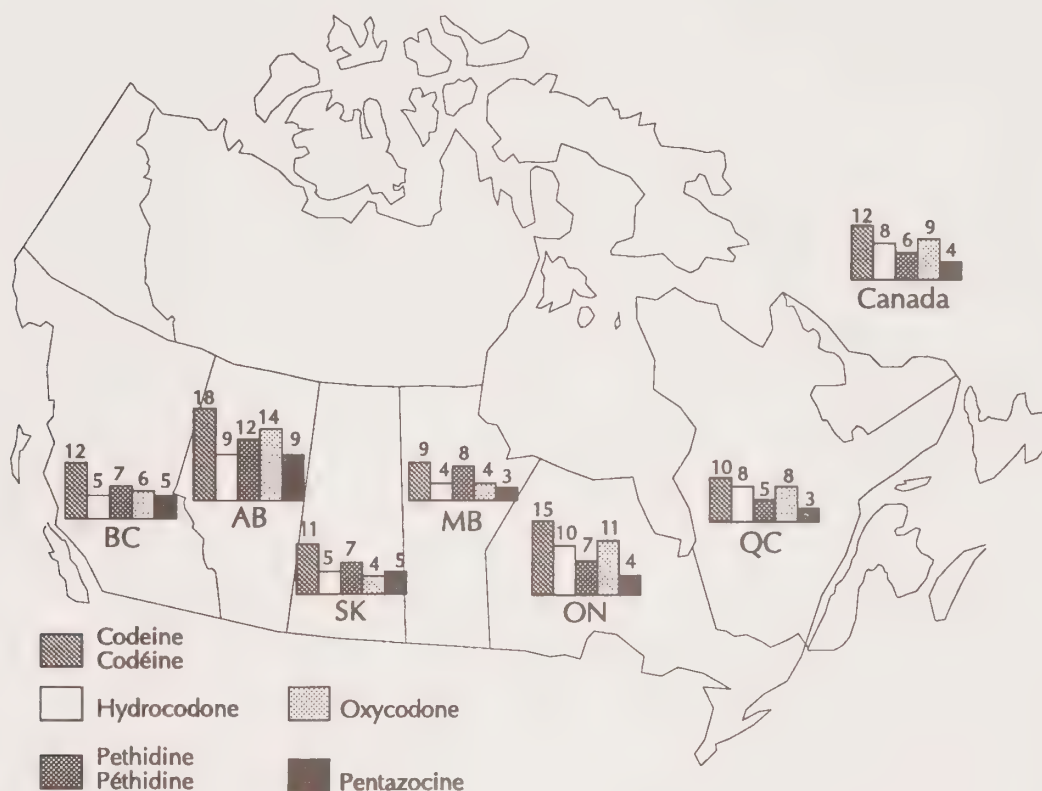

In 1989 break and enter rates were highest for Alberta, Ontario and Quebec (Figure 28). Alberta, Saskatchewan and Ontario have the highest rates in grab theft and armed robbery. Pilferage and loss unexplained is highest in Ontario and British Columbia, while losses in transit are highest in British Columbia and Saskatchewan.

Le **taux** des vols et pertes au Canada et dans les provinces a diminué en 1989 par rapport à 1980, sauf au Manitoba (tableau 14). En 1989, les taux les plus élevés ont été enregistrés en Ontario et en Alberta, soit 29 et 27 pour 500 000 habitants, respectivement. C'est en Colombie-Britannique que l'on a observé la baisse la plus importante du taux des vols avec effraction en 1989, par comparaison avec 1980 : les valeurs sont passées de 40 en 1980 à 7 en 1989.

En 1989, les taux de vols avec effraction les plus élevés ont été relevés en Alberta, en Ontario et au Québec (figure 28). L'Alberta, la Saskatchewan et l'Ontario ont présenté les taux les plus élevés de vols à la sauvette et de vols à main armée. C'est en Ontario et en Colombie-Britannique que l'on a observé les taux les plus élevés de chapardage et de pertes inexpliquées, alors que la Colombie-Britannique et la Saskatchewan présentent les taux les plus élevés de pertes au cours du transport.

**Figure 29 - Rate per 500,000 Population of Thefts and Losses for Selected Opioids, Canada and the Provinces, 1989e**

**Figure 29 - Taux pour 500 000 habitants de vols et de pertes concernant certains opioïdes, Canada et provinces, 1989e**

The rates per 500,000 population for 1989 theft and losses cases **involving codeine** were highest among opioids for all of the provinces; Alberta, Ontario and British Columbia had the highest rates (Figure 29). Oxycodone and hydrocodone rates were highest in Ontario, Alberta and Quebec.

Pentazocine (as well as methylphenidate, Table 15) rates were highest in the Western provinces. The rate for morphine was highest in Alberta and British Columbia. The rate for all barbiturate drugs is highest in Alberta, Ontario and British Columbia.

In comparing theft and losses to convictions data (Figure 29 and Figure 20) by provinces/territories, Quebec has a high rate of diversion cases, but a very low rate in convictions reported for the same drugs. In this comparison, similarities are noted for the Western provinces (to a smaller degree for Ontario), for codeine, pentazocine, methylphenidate and oxycodone.

En 1989, le taux des vols et pertes **mettant en cause la codéine** a été le plus élevé dans le cas des opioïdes pour l'ensemble des provinces; ce sont l'Alberta, la Colombie-Britannique et l'Ontario qui présentaient les taux les plus élevés (figure 29). C'est en Ontario, en Alberta et au Québec que l'on a enregistré les taux les plus élevés de vols et pertes concernant l'oxycodone et l'hydrocodone.

En ce qui concerne la pentazocine (et le méthylphénidate, tableau 15), les taux les plus élevés ont été relevés dans les provinces de l'Ouest. Il en a été de même pour la morphine en Alberta et en Colombie-Britannique. Quant à l'ensemble des barbituriques, c'est en Alberta, en Ontario et en Colombie-Britannique que l'on a enregistré les taux les plus élevés.

Si l'on compare les données concernant, d'une part, les vols et pertes et, d'autre part, les condamnations (figure 29 et figure 20) par province et par territoire, on remarque que le Québec présente un taux très élevé de cas de détournement, mais un taux très faible de condamnations relevées pour les drogues détournées. La comparaison fait également ressortir des tendances analogues dans les provinces de l'Ouest (et d'une façon moins marquée, en Ontario) pour ce qui est de la codéine, de la pentazocine, du méthylphénidate et de l'oxycodone.

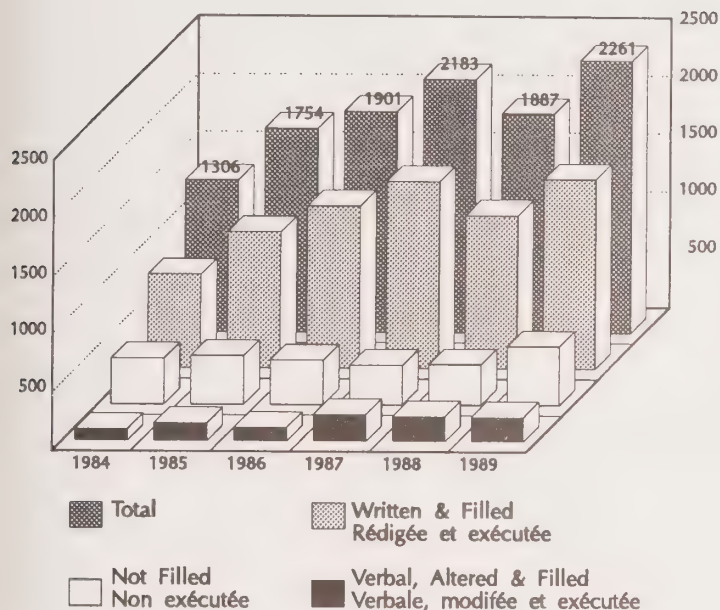

**Section Three :**    *Reported Cases of  
Diversión of Prescription  
Drugs through  
Forged Prescriptions*

**Troisième section :**    *Cas signalés de  
détournement  
de médicaments  
par contrefaçons  
d'ordonnance*

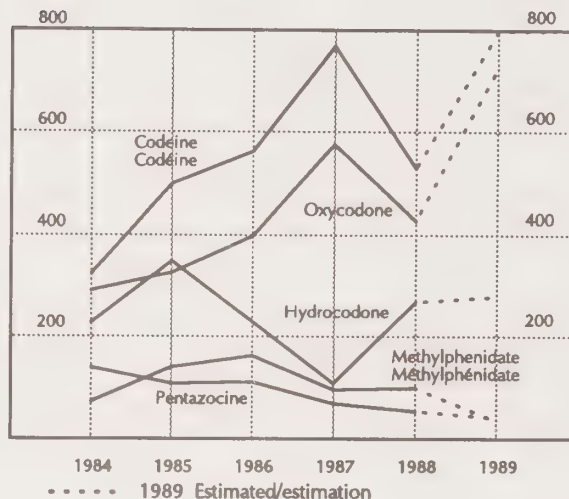

## Total Cases of Prescription Forgeries, Canada, 1984-1989e

Figure 30 - By Forgery Type  
- Par genre de contrefaçon

## Nombre total d'ordonnances contrefaites, Canada, 1984-1989e

Figure 31 - By Selected Drug  
- Pour certaines drogues

**Trends** indicate that the total number of detected and reported diversion cases through forged prescriptions involving narcotic and controlled drugs increased since 1984 (first year data collected, Figure 30). This increase was largely due to an increase in written and filled forged prescriptions, which accounted for the large majority of forgeries (70% in 1989). The written, verbal and altered forgeries that were attempted but not filled, accounted for about one-fifth of the total over the years (22% in 1989).

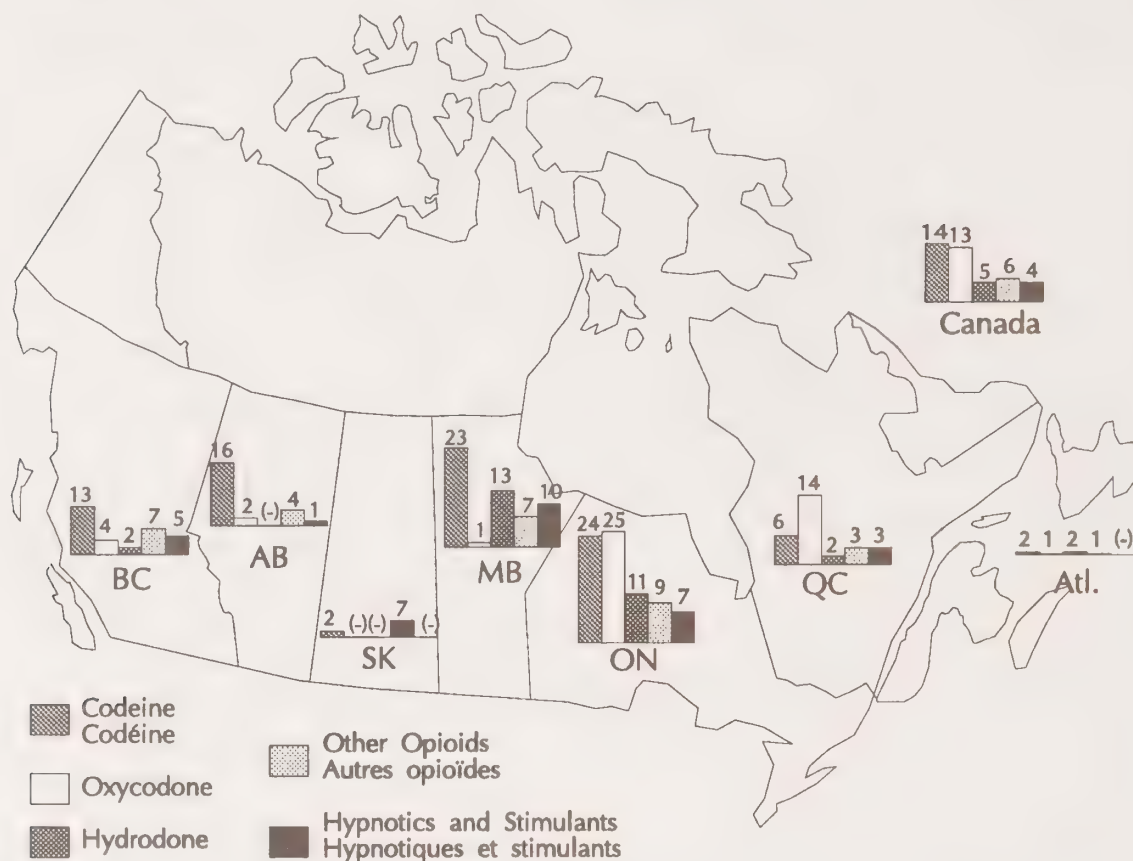

The number of prescription forgeries for **products** containing codeine and oxycodone increased between 1984 and 1989 (Figure 31). Pentazocine continued to decrease in 1989 and decreases were also noted for methylphenidate. As in convictions and thefts and losses opioids were involved in the majority (90%) of prescription forgeries in 1989.

Des **tendances** indiquent que le nombre total de cas décelés et déclarés de détournements faits au moyen d'ordonnances contrefaites visant des stupéfiants et des drogues contrôlées a augmenté depuis 1984 (première année de collecte des données) (figure 30). Cette augmentation était largement attribuable à un accroissement du nombre de contrefaçons d'ordonnance écrites et exécutées, qui représentaient la grande majorité des contrefaçons (70 % en 1989). Les ordonnances qu'ont tenté de faire accepter les fraudeurs par voie écrite ou verbale ou encore sous forme de modifications, mais qui n'ont pas été exécutées par les pharmaciens ont représenté environ un cinquième du total ces dernières années (22 % en 1989).

Le nombre d'ordonnances contrefaites relatives à **des produits** contenant de la codéine ou de l'oxycodone a augmenté entre 1984 et 1989 (figure 31). En ce qui a trait à la pentazocine, le nombre des cas de contrefaçon a continué à diminuer en 1989; le nombre d'ordonnances contrefaites visant le méthylphénidate a également baissé. Comme dans le cas des condamnations et des vols et pertes, ce sont les opioïdes qui ont fait l'objet de la majorité (90 %) des contrefaçons d'ordonnance en 1989.

**Figure 32 - Rate per 500,000 Population for Prescription Forgeries, Canada and the Provinces, 1989e**

**Figure 32 - Taux pour 500 000 habitants des ordonnances contrefaites, Canada et provinces, 1989e**

Ontario has the highest **rate** per 500,000 population for total reported prescription forgeries for 1989. Manitoba is second highest, British Columbia third, Quebec fourth and Alberta fifth (Table 16).

C'est l'Ontario qui a présenté le **taux** le plus élevé pour 500 000 habitants en ce qui concerne l'ensemble des contrefaçons d'ordonnance déclarées en 1989. Le Manitoba occupe le deuxième rang, la Colombie-Britannique le troisième, le Québec le quatrième et l'Alberta le cinquième (tableau 16).

As in convictions, and theft and losses cases the 1989 rate for reported prescription forgeries that **involved** codeine was highest, among opioids, in Canada and all provinces except for Saskatchewan and Quebec (Figure 32). The rate for codeine was highest in Ontario, Manitoba and Alberta. Oxycodone was highest in Ontario and in Quebec. The rate for hypnotics and stimulants was highest in Manitoba and in Ontario.

Comme dans le cas des condamnations et des vols et pertes, c'est la **codéine qui présentait**, en 1989, le taux le plus élevé parmi les opioïdes, au Canada et dans toutes les provinces sauf la Saskatchewan et le Québec (figure 32). Les taux de contrefaçons relatives à la codéine étaient les plus élevés en Ontario, au Manitoba et en Alberta, comme c'était le cas pour l'oxycodone en Ontario et au Québec. En ce qui concerne les hypnotiques et les stimulants, les taux les plus élevés ont été enregistrés au Manitoba et en Ontario.

Manitoba has the highest rate of prescription forgeries for barbiturates (7), while a low rate is shown for British Columbia (2) and only 1 per 500,000 population for all of Canada (Table 16). It should be noted that methylphenidate, with the highest rate in Manitoba (2) and British Columbia (2), accounted for a much smaller amount of these forgeries in 1989 (15%), than in previous years (averaging 36% between 1985 and 1988).

Le Manitoba a présenté le taux le plus élevé de contrefaçons d'ordonnance en ce qui a trait aux barbituriques, (7); en Colombie-Britannique, par contre, le taux de contrefaçons s'est révélé très faible (2); il s'est établi à seulement 1 pour 500 000 habitants dans l'ensemble du Canada (tableau 16). Mentionnons que le méthylphénidate, à l'égard duquel les taux les plus élevés ont été relevés au Manitoba (2) et en Colombie-Britannique (2), représentait une proportion beaucoup plus faible de ces contrefaçons en 1989 (15 %) que durant les années précédentes (36 % en moyenne entre 1985 et 1988).

**Section Four: Methadone Maintenance  
Statistics**

**Quatrième section : Statistiques  
concernant le  
traitement d'entretien  
à la méthadone**

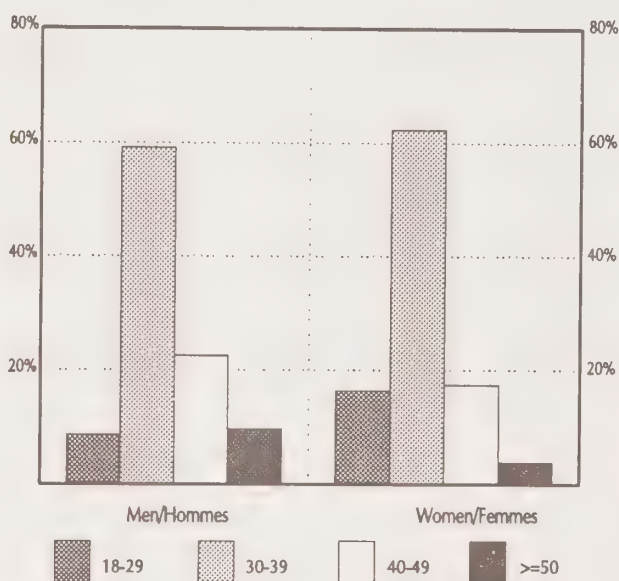

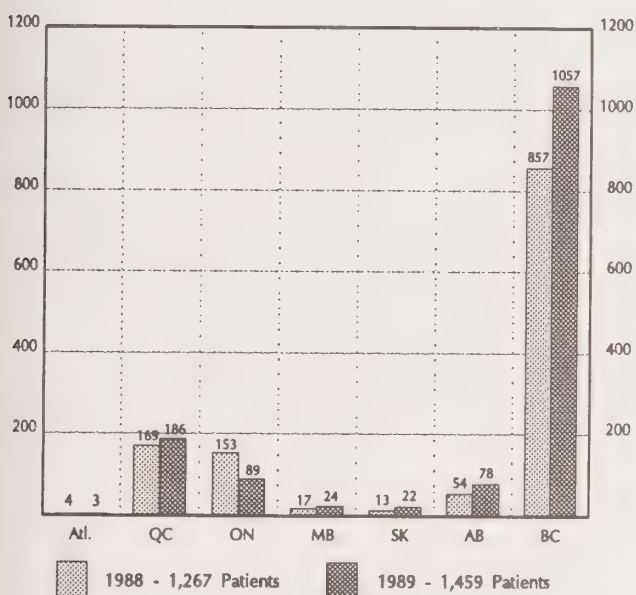

**Total Number of Methadone Maintenance Cases (Fig. 33) and Percentage Distribution by Age Group and Sex (Fig. 34)**

**Nombre total de personnes traitées à la méthadone (Fig. 33) et répartition en pourcentage, selon le groupe d'âge et le sexe (Fig. 34)**

**Figure 33 - Provinces, 1988 and/et 1989**

**Figure 34 - Canada, 1989**

As of December 31, 1989, there were 1,459 patients receiving methadone maintenance treatment in Canada for narcotic addiction. This represents an increase of 192 patients over the previous year. Seventy-two percent of the patients resided in British Columbia (Figure 33). Sixty percent (60%) of all patients in Canada were males and the majority were in the 30 to 39 age group (Figure 34).

Au 31 décembre, 1989, 1 459 personnes recevaient un traitement à la méthadone au Canada pour dépendance aux stupéfiants. Cela représente une augmentation de 192 malades par rapport à l'année précédente. Soixante-douze pour cent des patients résidaient en Colombie-Britannique (figure 33). Soixante pour cent (60 %) de ces personnes étaient de sexe masculin, et la plupart faisaient partie du groupe d'âge des 30 à 39 ans (figure 34).

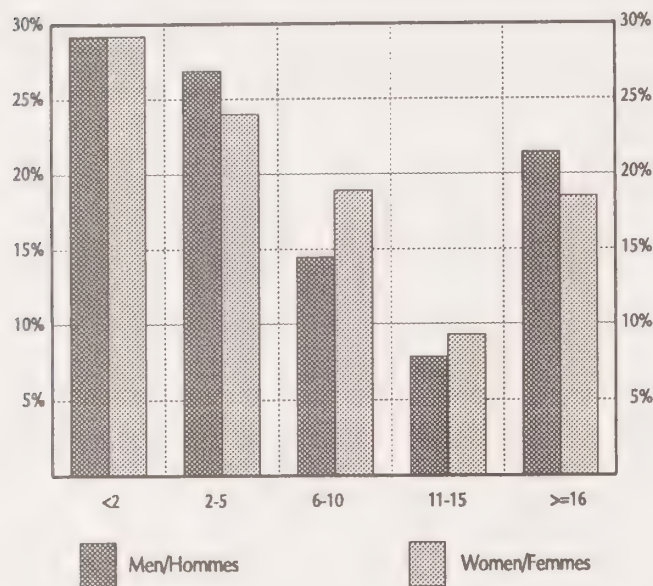

The drug of dependence prior to methadone treatment was specified for 1,400 patients; in 82% of the cases the drug was heroin. As previously noted (Figure 17, p. 31), British Columbia has the highest rate of heroin convictions.

La drogue responsable de la toxicomanie a été précisée pour 1 400 malades. Quatre-vingt-deux pour cent (82 %) ont déclaré être héroïnomane. Comme on l'a déjà signalé (figure 17, p. 31), c'est la Colombie-Britannique qui a présenté le taux le plus élevé de condamnations liées à l'héroïne.

**Percentage Distribution in Years of Treatment (Fig. 35) and by Duration of Dependence in Years, Prior to Treatment (Fig. 36)**

**Répartition en pourcentage selon la durée de traitement (Fig. 35) et selon la durée de la pharmacodépendance en nombres d'années (avant le traitement) Fig. 36)**

**Figure 35 - Canada, 1989**

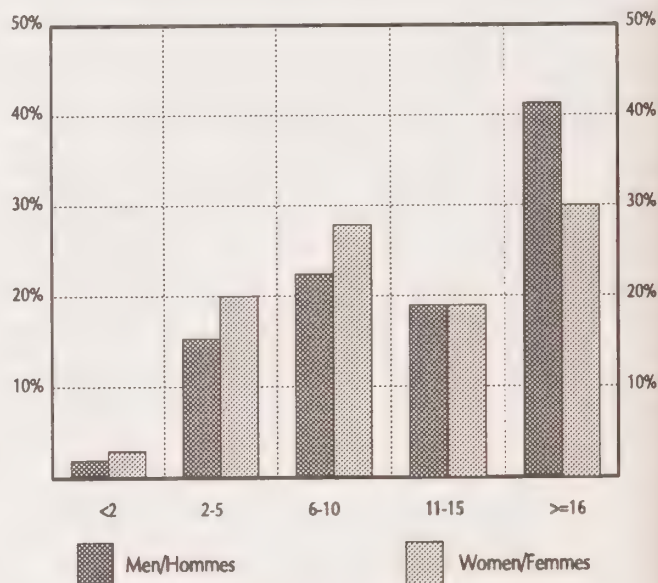

The **date of the first treatment** with methadone was specified for 1,343 of the 1,459 patients. Of these, 272 patients (20%) first received methadone over fifteen years ago (Figure 35).

The **duration of dependence** before treatment was stated for 1,336 cases. Seven hundred and forty-four patients (56%) reported a duration of dependence of over ten years (Figure 36).

Where specified, 95% of the patients admitted to a history of **intravenous drug use**, 79% to a history of **needle sharing** and 85% to a history of **illicit activity** associated with drug-seeking behaviour.

**Figure 36 - Canada, 1989**

The **date du premier traitement** d'entretien à la méthadone est connue pour 1 343 malades sur 1 459. Parmi ces personnes, 272 malades (20 %) ont reçu de la méthadone pendant plus de quinze ans (figure 35).

La **durée de la pharmacodépendance** ayant précédé le traitement est connue pour 1 336 malades. Sept cent quarante-quatre malades (56 %) mentionnent une durée de dépendance de plus de dix ans (figure 36).

Parmi les personnes ayant accepté de répondre, 95 % ont admis **avoir pris des drogues par voie intraveineuse**, 79 % avoir **mis en commun des aiguilles** et 85 % avoir pratiqué des **activités illicites** liées à la recherche de drogues.

## **APPENDIX A**

**- Description of Sections**

## **ANNEXE A**

**- Description des sections**

## Legal Statistics

The Minister of National Health and Welfare is responsible for the disposition of drugs and assets seized by police forces under the Narcotic Control Act and Parts III and IV of the Food and Drugs Act. To fulfill this responsibility, the Minister requires police forces to report details of cases in which offences have been committed under these statutes and their respective regulations. In addition, some police forces submit information on offences under the Criminal Code when drugs are involved. Data represented in this section have been extracted from these reports.

To properly interpret the information contained in these tables, the following points should be noted:

- the date of disposition of a case is used to determine the year in which it is recorded in the statistics;
- the age upon the date of arrest is used as the criteria for inclusion in tables dealing with age groups;
- in some cases when one sentence is imposed for more than one drug, the sentence will be recorded in the statistics for each drug;
- in some cases multiple penalties are imposed (e.g. two years gaol and \$1,000, six months gaol or \$200). The Drug Offence Report does not, in most cases, identify the final sentence option chosen or imposed. As such a priority ranking of "gaol" over "fines" over "probation" is used. Although this eliminates multiple counting of individual convictions, it does introduce a few limiting factors when interpreting some of the tables;
- multiple doctoring charges were changed in 1986 from the Narcotic Control Regulations (Section 3(3) to the Narcotic Control Act (Section 3.1(1)). Similar charges have been introduced to the Food and Drugs Act (Section 33(1)).

## Statistiques judiciaires

Le Ministre de la Santé nationale et du Bien-être social a pour responsabilité la disposition des drogues et des biens saisis par les agents de police en vertu de la Loi sur les stupéfiants et des parties III et IV de la Loi des aliments et drogues. Afin de s'acquitter de cette responsabilité, le Ministre exige que les corps de police fassent des rapports détaillés sur les cas d'infraction à ces lois et à leurs règlements respectifs. En outre, certains corps de police, fournissent des renseignements sur les infractions au Code criminel liées à la drogue. Les données présentées sont tirées de ces rapports.

Pour interpréter correctement les renseignements contenus dans les tableaux, il importe de se rappeler les points suivants :

- la date du jugement d'une cause sert à déterminer l'année où cette cause est enregistrée dans les statistiques;
- l'âge du prévenu au moment de son arrestation est celui qui figure dans les tableaux présentant les groupes d'âge;
- dans certaines causes lorsqu'une peine est infligée pour plus d'une drogue, cette peine sera enregistrée dans les statistiques sous chacune de ces drogues;
- dans certains cas, des peines multiples sont imposées (par ex. 2 ans d'emprisonnement et \$1,000 d'amende, 6 mois d'emprisonnement ou \$200 d'amende). Le plus souvent, le "Rapport concernant une infraction aux lois sur la drogue" n'indique pas quelle sentence a été finalement choisie ou imposée. C'est pourquoi les sentences sont classées dans l'ordre de priorités suivant : emprisonnement, amende, libération conditionnelle. La possibilité de compter plus d'une fois une même condamnation est ainsi éliminée, mais par la même occasion, des facteurs de confusion se trouvent introduits dans l'interprétation de certains tableaux; et
- les accusations pour consultations médicales multiples ont été modifiées en 1986 et font maintenant partie de la Loi sur les stupéfiants (article 3.1(1)) et non plus du Règlement sur les stupéfiants (article 3(3)). Des accusations similaires ont été incorporées à la Loi des aliments et drogues (article 33(1)).

## ***Explanatory Notes***

### **Narcotic Control Act**

- Section 3(1) - Possession
- Section 3.1(1) - Obtaining drugs from more than one physician within a 30 day period
- Section 4(1) - Trafficking
- Section 4(2) - Possession for the purpose of trafficking
- Section 5(1) - Importing
- Section 6(1) - Cultivating

### **Food and Drugs Act, Part III**

- Section 38.1(1) - Obtaining drugs from more than one physician within a 30 day period
- Section 39(1) - Trafficking
- Section 39(2) - Possession for the purpose of trafficking

### **Food and Drugs Act, Part IV**

- Section 47(1) - Possession
- Section 48(1) - Trafficking
- Section 48(2) - Possession for the purpose of trafficking

### **Criminal Code**

- Section 253 - Drive while impaired
- Section 322 - Theft
- Section 348 - Break and enter with intent
- Section 354 - Possession of stolen property
- Section 366 - Forgery
- Section 368 - Uttering forged document
- Section 403 - Personation with intent
- Section 463 - Attempt to commit, accessory to commission
- Section 465 - Conspiracy

## ***Notes explicatives***

### **Loi sur les stupéfiants**

- Article 3(1) - Possession
- Article 3.1(1) - Obtention de drogues de plus d'un médecin au cours d'une période de 30 jours
- Article 4(1) - Trafic
- Article 4(2) - Possession en vue d'un trafic
- Article 5(1) - Importation
- Article 6(1) - Culture

### **Loi sur les aliments et drogues, Partie III**

- Article 38.1(1) - Obtention de drogues de plus d'un médecin au cours d'une période de 30 jours
- Article 39(1) - Trafic
- Article 39(2) - Possession en vue d'un trafic

### **Loi sur les aliments et drogues, Partie IV**

- Article 47(1) - Possession
- Article 48(1) - Trafic
- Article 48(2) - Possession en vue d'un trafic

### **Code criminel**

- Article 253 - Conduire avec facultés affaiblies
- Article 322 - Vol
- Article 348 - Effraction avec intention
- Article 354 - Possession de biens volés
- Article 366 - Contrefaçon
- Article 368 - Usage de faux
- Article 403 - Supposition intentionnelle de personne
- Article 463 - Tentative de commettre une infraction complice de
- Article 465 - Conspiration

## **Diversion Statistics**

For the purpose of these statistics "diversion" is defined as the movement of licit narcotic and controlled drugs from the health care system for non-medical use. It encompasses the following:

- theft in all forms, including break and enter, armed robbery, snatch and grab, pilferage;
- unexplained losses;
- losses during transit;
- forged prescriptions;
- verbal misrepresentation.

Diversion may occur at any point between the manufacturing or importation of the drug and its utilization by the patient.

The Regulations to the Narcotic Control Act and the Food and Drugs Act stipulate that the loss or theft of a narcotic or controlled drug must be reported to the Minister of Health and Welfare within ten days of discovery. Information is extracted from these reports, compiled and published as a component of the Diversion Statistics. In interpreting tables on the thefts and losses cases by drug involved, it should be noted that most cases (incidents) involve more than one drug.

Reports involving the diversion of narcotic and controlled drugs obtained by means of forged prescriptions and verbal misrepresentation are received from various sources, including police agencies, inspection staff with the Bureau of Dangerous Drugs and, on a voluntary basis, from pharmacists.

A reporting system has been developed to promote and facilitate the reporting of diversion by prescription forgery and verbal misrepresentation. The basis of the system is a form to be submitted by pharmacists when a successful or attempted diversion by these means is identified. The data collected are presented for 1985 to 1989.

## **Statistiques sur les détournements**

Aux fins des présentes statistiques, le terme "détournement" désigne le mouvement de stupéfiants et de drogues contrôlées licites obtenus par l'intermédiaire du système de santé et destinés à des usages non médicaux. Il englobe :

- le vol sous toutes ses formes, dont le vol par effraction, le vol à main armée, le vol à la sauvette et le chapardage;
- les pertes inexplicables;
- la perte de drogues pendant leur transport;
- les ordonnances contrefaites;
- les déclarations trompeuses.

Il peut y avoir détournement à n'importe quel point entre le moment où le médicament est fabriqué ou importé, et celui où il est utilisé par le patient.

Les règlements respectifs de la Loi sur les stupéfiants et de la Loi sur les aliments et drogues stipulent que la perte ou le vol d'un stupéfiant ou d'une drogue contrôlée doit être signalé au ministre de la Santé nationale et du Bien-être social dans les dix jours qui suivent la constatation. Les renseignements tirés de ces rapports sont réunis et publiés dans les statistiques sur les détournements. Lors de l'interprétation des tableaux sur les vols et pertes, selon les drogues concernées, il est bon de se rappeler que dans la plupart des cas plus d'une drogue est concernée.

Les rapports ayant trait au détournement de stupéfiants et de drogues contrôlées par fausses ordonnances et déclarations trompeuses proviennent de diverses sources dont les corps de police, les inspecteurs du Bureau des drogues dangereuses et les pharmaciens agissant de leur propre chef.

Un système a été mis au point afin d'encourager et de faciliter la présentation de rapports sur les détournements résultant d'ordonnances contrefaites ou de déclarations trompeuses. Ce système repose sur l'utilisation d'une formule que doivent remplir les pharmaciens témoins d'une tentative (réussie ou ratée) de détournement par ces moyens. Les données ainsi recueillies sont présentées pour les années 1985 à 1989.

### **Methadone Maintenance Statistics**

Methadone is a long-acting synthetic opioid that can be used in the treatment of persons dependent on heroin or other opioids. The Bureau of Dangerous Drugs authorizes practitioners to prescribe methadone in the treatment of opioid-dependent patients. Every practitioner is required to submit information to the Bureau for each patient receiving methadone.

It should be noted that 1988 and 1989 are the first years for which data were entered on the computer.

### **Drug Analysis Statistics**

The information contained in the following tables represents workload measurement data regarding the identity and number of drug samples analyzed by regional offices of the Bureau of Field Operations (Field Operations Directorate, Health Protection Branch) and the Bureau of Drug Research (Drugs Directorate, Health Protection Branch). The drug samples in question are submitted for analysis by police agencies as part of the evidence-gathering process in preparation for the prosecution of a drug-related charge. Used in conjunction with other data, these tables can demonstrate trends in drug misuse and street availability.

### **Statistiques sur les traitements d'entretien à la méthadone**

La méthadone est un opioïde de synthèse à longue durée d'action que l'on peut utiliser dans le traitement des personnes qui ont une dépendance à l'égard de l'héroïne ou d'autres opioïdes. Le Bureau des drogues dangereuses autorise des médecins à prescrire de la méthadone pour le traitement des personnes dépendantes des opioïdes. Ces médecins doivent communiquer des renseignements au Bureau sur chacun des patients recevant de la méthadone.

Il est à signaler que 1988 et 1989 sont les premières années pour lesquelles les données présentées dans ces tableaux ont été informatisées.

### **Statistiques sur les analyses de drogues**

Les renseignements contenus dans les tableaux suivants représentent des données sur le volume de travail relatif à l'identification et au nombre d'échantillons de drogue analysés par les bureaux régionaux du Bureau des opérations régionales (Direction des opérations régionales, Direction générale de la protection de la santé) et par le Bureau de recherche, Médicaments (Direction des médicaments, Direction générale de la protection de la santé). Les échantillons en question sont soumis pour analyse par des corps de police en prévision de poursuites relatives à une accusation d'infraction aux lois sur les drogues. Utilisées conjointement avec d'autres données, les données de ces tableaux peuvent indiquer certaines tendances en matière de consommation et de disponibilité des drogues.

\* Quebec figures were further estimated (adjusted upwards by 25%) due to known reports not received for data capture before the cutoff date.

\*\* Nil for the Yukon and Northwest Territories

\* Les chiffres pour le Québec ont été révisés (à la hausse à raison de 25 %) du fait qu'à la date limite de saisie des données, certains rapports établis n'avaient pas été reçus.

\*\* Aucun cas pour le Yukon et les Territoires du Nord-Ouest.

Statistiques  
concernant les  
stupéfiants, les  
drogues contrôlées  
et les drogues  
d'usage restreint –  
Rapport des tableaux  
1989

## Introduction

The 1989 Narcotic, Controlled and Restricted Drug statistics are published in two separate reports; this Tables Report and the Analysis Report, which can be obtained upon request. The Analysis Report further explains and provides highlights of data available here in table format.

This report is divided into four sections. Section one of the tables contains legal statistics on disposition of charges and resulting sentences by narcotic, controlled and restricted drug-related legislation. Data for this section were extracted from the Drug Offence and Disposition Reports submitted to BDD by all enforcement agencies in Canada.

Section two contains statistical data on the use of methadone in the management of opioid dependence in Canada. Data for this section of the report were extracted from Patient Information Forms submitted by practitioners authorized to prescribe methadone.

Section three contains data on the diversion of licit narcotic and controlled drugs from the health care system, for non-medical use. Narcotic and Controlled Drug Loss and Theft Reports and the Forgery Reports are submitted to BDD by health professionals and Bureau inspectors.

Section four contains data on the number of drugs analysed at the request of enforcement agencies for evidence-gathering purposes. The compiled reports are submitted to BDD by the Field Operations Directorate of Health and Welfare Canada.

## Introduction

Pour 1989, le rapport statistique sur les stupéfiants, les drogues contrôlées et les drogues d'usage restreint est divisé en deux publications distinctes; la présente qui est le Rapport des tableaux et le Rapport d'analyse peut être obtenue sur demande. Le Rapport d'analyse souligne et explique davantage les données présentées dans le Rapport des tableaux.

Le Rapport des tableaux est divisé en plusieurs sections. La première section contient des statistiques judiciaires sur le règlement des accusations et les sentences consécutives, selon les lois régissant les stupéfiants, les drogues contrôlées et les drogues d'usage restreint. Les données de cette section ont été extraites des rapports sur les infractions liées aux drogues et le règlement des cas, soumis au BDD par tous les services de police du Canada.

La deuxième section contient des données statistiques sur l'usage de la méthadone dans le traitement de la dépendance à l'égard des opioïdes au Canada. Les données de cette section proviennent des formules d'information concernant le patient, soumises par les médecins autorisés à prescrire de la méthadone.

La troisième section contient des données sur les stupéfiants et les drogues contrôlées licites détournées du système de soins à des fins non médicales. Des rapports sur les pertes et les vols de stupéfiants et de drogues contrôlées et sur les contrefaçons sont soumis au BDD par les professionnels de la santé et les inspecteurs du Bureau.

La quatrième section présente des données sur le nombre de drogues analysées à la demande des services de police en prévision de poursuites en justice. Les rapports compilés sont soumis au BDD par la Direction des opérations régionales de Santé et Bien-être social Canada.

- 81. Summary of number of samples analysed by drug category

### **Section 3 : Statistiques sur les détournements**

- 70. Vols et autres pertes rapportés impliquant les stupéfiants ou des drogues contrôlées
- 71. Nombre de vols et autres pertes rapportés par stupéfiant
- 72. Quantités de stupéfiants détournés lors de vols et autres pertes
- 73. Nombre de vols et autres pertes rapportés par drogue contrôlée
- 74. Quantités de drogues contrôlées détournées lors de vols et autres pertes
- 75. Nombre d'ordonnances contrefaites rapportées par stupéfiant
- 76. Nombre d'ordonnances contrefaites rapportées par drogue contrôlée
- 77. Quantités de stupéfiants et drogues contrôlées impliquées dans les fausses ordonnances rapportées

### **Section 4 : Statistiques sur les analyses de drogues**

- 78. Nombre d'échantillons analysés contenant un stupéfiant
- 79. Nombre d'échantillons analysés contenant une drogue contrôlée
- 80. Nombre d'échantillons analysés contenant une drogue d'usage restreint
- 81. Nombre d'échantillons analysés par catégorie de drogue

## SECTION I

### LEGAL STATISTICS

Tables 1 - 60

### STATISTIQUES JUDICIAIRES

Tableaux 1 - 60

## Legal Statistics

The Minister of National Health and Welfare is responsible for the disposition of drugs and assets seized by police forces under the Narcotic Control Act and Parts III and IV of the Food and Drugs Act. To fulfill this responsibility, the Minister requires police forces to report details of offences committed under these statutes and their respective regulations. In addition, some police forces submit information on offences under the Criminal Code when drugs are involved. Data represented in this section have been extracted from these reports.

In order to properly interpret the information contained in these tables, the following points should be noted:

- The date of disposition of a case is used to determine the year in which it is recorded in the statistics.
- The age upon the date of arrest is used as the criteria for inclusion in tables dealing with age groups.
- In some cases where one sentence is imposed for more than one drug, that sentence is recorded in the statistics for each drug.
- In some cases multiple penalties are imposed (e.g. two years in jail and \$1,000, six months in jail or \$200). The Drug Offence Report does not, in most cases, identify the final sentence option chosen or imposed. As such, a priority ranking of "gaol" over "fines" over "probation" is used. While this eliminates multiple counting of individual convictions, it does introduce a few limiting factors when interpreting some of the tables.
- Multiple doctoring charges changed in 1986 from the Narcotic Control Regulations (Section 3(3)) to the Narcotic Control Act (Section 3.1(1)). Similar charges were introduced to the Food and Drugs Act (Section 33(1)).

## Statistiques judiciaires

Le ministre de la Santé nationale et du Bien-être social a pour responsabilité la disposition des drogues et des biens saisis par les agents de police en vertu de la Loi sur les stupéfiants et des parties III et IV de la Loi sur les aliments et drogues. À fin de s'acquitter de cette responsabilité, le Ministre exige que les corps de police fassent des rapports détaillés sur les cas d'infraction à ces lois et à leurs règlements respectifs. En outre, certains corps de police, fournissent des renseignements sur les infractions au Code criminel liées à la drogue. Les données présentées sont tirées de ces rapports.

Pour interpréter correctement les renseignements contenus dans les tableaux, il importe de se rappeler les points suivants:

- la date du jugement d'une cause sert à déterminer l'année où cette cause est enregistrée dans les statistiques;
- l'âge du prévenu au moment de son arrestation est celui qui figure dans les tableaux présentant les groupes d'âge;
- dans certaines causes lorsqu'une peine est infligée pour plus d'une drogue, cette peine sera enregistrée dans les statistiques sous chacune de ces drogues.
- dans certains cas, des peines multiples sont imposées (par exemple deux ans d'emprisonnement et 1 000\$ d'amende, six mois d'emprisonnement ou 200\$ d'amende). Le plus souvent, le "Rapport concernant une infraction aux lois sur la drogue" n'indique pas quelle sentence a été finalement choisie ou imposée. C'est pourquoi les sentences sont classées dans l'ordre de priorités suivant: emprisonnement, amende, libération conditionnelle. La possibilité de compter plus d'une fois une même condamnation est ainsi éliminée, mais par la même occasion, des facteurs de confusion se trouvent introduits dans l'interprétation de certains tableaux.
- les accusations pour consultations médicales multiples ont été modifiées en 1986 et font maintenant partie de la Loi sur les stupéfiants (article 3.1(1)) et non plus du Règlement sur les stupéfiants (article 3(3)). Des accusations similaires ont été incorporées à la Loi sur les aliments et drogues (article 33(1)).

## **Explanatory Note**

### **Narcotic Control Act**

## **SECTION II**

### **METHADONE MAINTENANCE STATISTICS**

**Tables 61 - 69**

### **STATISTIQUES SUR LES TRAITEMENTS À LA MÉTHADONE**

**Tableaux 61 - 69**

Methadone Maintenance Statistics

Methadone is a long-acting synthetic opioid which can be used in the treatment of persons dependent on heroin or other opioids. The Bureau of Dangerous Drugs authorizes practitioners to prescribe methadone in the treatment of opioid-dependent patients. Every practitioner is required to submit information to the Bureau for each patient receiving methadone.

Tables 61 to 69 refer to national results. Except for data from Ontario, provincial statistics may be obtained upon written request. They are not included here for reasons of brevity.

It should be noted that 1988 and 1989 are the first years for which data presented in these tables were entered on the computer.

Statistiques sur les traitements d'entretien à la méthadone

La méthadone est un opioïde de synthèse à longue durée d'action que l'on peut utiliser dans le traitement des personnes qui ont une dépendance à l'égard de l'héroïne ou d'autres opioïdes. Le Bureau des drogues dangereuses autorise des médecins à prescrire de la méthadone pour le traitement des personnes dépendantes des opioïdes. Ces médecins doivent communiquer des renseignements au Bureau sur chacun des patients recevant de la méthadone.

Les tableaux 61 à 69 présentent des données pour l'ensemble du Canada. Les données par province n'ont pas été incluses pour des raisons de concision, mais on peut se les procurer sur demande, à l'exception de celles concernant l'Ontario.

Il est à signaler que 1988 et 1989 sont les premières années pour lesquelles les données présentées dans ces tableaux ont été informatisées.

### SECTION III

#### DIVERSION STATISTICS

Tables 70 - 77

#### STATISTIQUES SUR LES DÉTOURNEMENTS

Tableaux 70 - 77

## Diversion Statistics

For the purpose of these statistics, "diversion" is defined as the movement of licit narcotic and controlled drugs from the health care system for non-medical use. It encompasses the following:

- theft in all forms including break and entry, armed robbery, snatch and grab, pilferage;
- unexplained losses;
- losses during transit;
- forged prescriptions;
- verbal misrepresentation.

Diversion may occur at any point between the manufacturing or importation of the drug and its utilization by the patient.

The Regulations to the Narcotic Control Act and the Food and Drugs Act stipulate that the loss or theft of a narcotic or controlled drug must be reported to the Minister of Health and Welfare within ten days of discovery. Information is extracted from these reports, compiled and published as a component of the Diversion Statistics. In interpreting tables on the theft and loss cases by drug involved, it should be noted that most cases (incidents) involve more than one drug.

Reports involving the diversion of narcotic and controlled drugs obtained by means of forged prescriptions and verbal misrepresentation are received from various sources, including police agencies, inspection staff with the Bureau of Dangerous Drugs and, on a voluntary basis, pharmacists.

In order to promote and facilitate the reporting of diversion by prescription, forgery and verbal misrepresentation, a reporting system has been developed. The basis of the system is a form to be submitted by pharmacists when successful or attempted diversion by these means is identified. The data collected are presented for 1985 to 1989.

## Statistiques sur les détournements

Aux fins des présentes statistiques, le terme "détournement" désigne le mouvement de stupéfiants et de drogues contrôlées licites obtenus par l'intermédiaire du système de santé et destinés à des usages non médicaux. Il englobe:

- le vol sous toutes ses formes, dont le vol par effraction, le vol à main armée, le vol à la sauvette et le chapardage;
- les pertes inexplicables;
- la perte de drogues pendant leur transport;
- les ordonnances contrefaites;
- les déclarations trompeuses.

Il peut y avoir détournement à n'importe quel point entre le moment où le médicament est fabriqué ou importé, et celui où il est utilisé par le patient.

Les règlements respectifs de la Loi sur les stupéfiants et de la Loi sur les aliments et drogues stipulent que la perte ou le vol d'un stupéfiant ou d'une drogue contrôlée doit être signalé au ministre de la Santé nationale et du Bien-être social dans les dix jours qui suivent la constatation. Les renseignements tirés de ces rapports sont réunis et publiés dans les statistiques sur les détournements. Lors de l'interprétation des tableaux sur les vols et pertes, selon les drogues concernées, il est bon de se rappeler que dans la plupart des cas plus d'une drogue est concernée.

Les rapports ayant trait au détournement de stupéfiants et de drogues contrôlées par fausses ordonnances et déclarations trompeuses proviennent de diverses sources dont les corps de police, les inspecteurs du Bureau des drogues dangereuses et les pharmaciens agissant de leur propre chef.

Un système a été mis au point afin d'encourager et de faciliter la présentation de rapports sur les détournements résultant d'ordonnances contrefaites ou de déclarations trompeuses. Ce système repose sur l'utilisation d'une formule que doivent remplir les pharmaciens témoins d'une tentative (réussie ou ratée) de détournement par ces moyens. Les données ainsi recueillies sont présentées pour les années 1985 à 1989.

## SECTION IV

### DRUG ANALYSIS STATISTICS

Tables 78 - 81

### STATISTIQUES SUR LES ANALYSES DE DROGUES

Tableaux 78 - 81

## Drug Analysis Statistics

The information contained in the following tables represents workload measurement data regarding the identity and number of drug samples analysed by regional offices of Bureau of Field Operations (Field Operations Directorate, Health Protection Branch) and Bureau of Drug Research (Drugs Directorate, Health Protection Branch). The drug samples in question are submitted for analysis by police agencies as part of the evidence-gathering process in preparation for the prosecution of a drug-related charge. Used in conjunction with other data, these tables can demonstrate trends in drug misuse and street availability.

## Statistiques sur les analyses de drogues

Les renseignements contenus dans les tableaux suivants représentent des données sur le volume de travail relatif à l'identification et au nombre d'échantillons de drogue analysés par les bureaux régionaux du Bureau des opérations régionales (Direction des opérations régionales, Direction générale de la protection de la santé) et par le Bureau de recherche, Médicaments (Direction des médicaments, Direction générale de la protection de la santé). Les échantillons en question sont soumis pour analyse par des corps de police en prévision de poursuites relatives à une accusation d'infraction aux lois sur les drogues. Utilisées conjointement avec d'autres données, les données de ces tableaux peuvent indiquer certaines tendances en matière de consommation et de disponibilité des drogues.
